New Launch in 2016

BJHS Themes

Published for the British Society for the History of Science

A new peer-reviewed, open access, thematic journal for the history of science

Editor

Jon Agar, *University College London, UK*

BJHS Themes is a collaborative venture between the British Society for the History of Science and Cambridge University Press aimed at establishing the first fully open access journal for the history of science community. It aims to publish open access, high-quality, scholarly, engaging collections of history of science papers, which address provocative themes, and which will be free for readers and offer no financial barrier to publication for authors. Like its sister publication, *British Journal for the History of Science*, *BJHS Themes* is a journal of the British Society for the History of Science, a major learned society for its subject.

The 1st volume will be '*Intersections: Science and Technology in Twentieth Century China and India*', a focus on a history of science and technology in China and India, which will be convened by historians Jahnvi Phalkey and Tong Lam. It will be published in early 2016.

British Journal for the History of Science

Published for the British Society for the History of Science

Editor

Charlotte Sleigh, *University of Kent, UK*

This leading international journal publishes scholarly papers and review articles on all aspects of the history of science. History of science is interpreted widely to include medicine, technology and social studies of science.

BJHS papers make important and lively contributions to scholarship and the journal has been an essential library resource for more than thirty years. It is also used extensively by historians and scholars in related fields. A substantial book review section is a central feature. There are four issues a year, comprising an annual volume of over 600 pages.

Science in Context

Editors

Leo Corry, *The Cohn Institute for the History and Philosophy of Science and Ideas, Tel Aviv University, Israel*

Jürgen Renn, *Max-Planck-Institut für Wissenschaftsgeschichte, Berlin, Germany*

Science in Context is an international journal edited at The Cohn Institute for the History and Philosophy of Science and Ideas, Tel Aviv University, with the support of the Van Leer Jerusalem Institute. It is devoted to the study of the sciences from the points of view of comparative epistemology and historical sociology of scientific knowledge. The journal is committed to an interdisciplinary approach to the study of science and its cultural development - it does not segregate considerations drawn from history, philosophy and sociology. Controversies within scientific knowledge and debates about methodology are presented in their contexts.

Arabic Sciences and Philosophy

A Historical Journal

Executive Editor

Roshdi Rashed, *CNRS, Paris, France & University of Tokyo, Japan*

Managing Editor

Ahmed Hasnaoui, *CNRS, Paris, France*

Arabic Sciences and Philosophy (ASP) is an international journal devoted to the Arabic sciences, mathematics and philosophy in the world of Islam between the eighth and eighteenth centuries, in a cross-cultural context. In 2009, the journal extended its scope to include important papers on scientific modernization from the nineteenth century in the Islamic world. Together with original studies on the history of all these fields, *ASP* also offers work on the inter-relations between Arabic and Greek, Indian, Chinese, Latin, Byzantine, Syriac and Hebrew sciences and philosophy. Casting new light on the growth of these disciplines, as well as on the social and ideological context in which this growth took place, *ASP* is essential reading for those interested in these areas.
