

Wright's  
is the 'rule'  
for the  
Toilet and  
Nursery  
*because . . .*

Wright's Coal Tar Soap incorporates in its basic formula the active principle Liquor Carbonis Detergens. This unique preparation is abstracted from Tar oils and isolates the known antiseptic and antipruritic agents contained in these oils from the inert substances and irritants of no therapeutic value. Wright's Liquor Carbonis Detergens has, in the 80 years since it was first introduced, achieved a high place in dermatological practice; and today is prescribed by many leading skin specialists and specified in their authoritative works of reference. The use of Liquor Carbonis Detergens as the antiseptic medium makes Wright's Coal Tar Soap safe for everyday Toilet and Nursery use and soothing to the tenderest skin.
