# Phycologia

*Published for the International Phycological Society*

This is the official journal of the International Phycological Society, dedicated to the promotion of phycology and the encouragement of international cooperation among phycologists and phycological institutes. The purpose of *Phycologia* is to serve as a clearing house for phycological news and information. In addition to research papers and occasional review articles it also publishes information on meetings and excursions, reports from laboratories and institutions, and book reviews. Original contributions are accepted on a wide range of subjects provided they are of international interest and make a significant contribution to the study of phycology.

Manuscripts for publication should be sent to the Editor, Dr W.J. Woelkerling, Department of Botany, La Trobe University, Bundoora, Victoria 3083, Australia.

## Subscription Information

*Phycologia* is published quarterly.

Subscription rates for 1983 are:  
£58.00 (U.K.)  
£63.00 (overseas)  
\$110.00 (U.S.A. & Canada)  
*post free*

## Order Form

Send to **Blackwell Scientific Publications Ltd, P.O. Box 88, Oxford, England**

*Please tick the appropriate box*

- I would like to subscribe to *Phycologia* and I enclose my remittance for the current volume
- I would like a free specimen copy of *Phycologia*

# Journal of Animal Ecology

*An official journal of the British Ecological Society*

Edited by **L.R. Taylor** and **J.M. Elliott**

This journal acts as the British organ of research on animal ecology and publishes primarily papers dealing with aspects of animal ecology such as population and migration studies, and also with the methodology of ecological research with particular reference to animals. An experimental or theoretical approach is preferred, though purely descriptive papers and reviews are occasionally published. It is a well-established title and is recognized throughout the world as one of the most prestigious publications in the field.

## **Subscription Information**

The *Journal of Animal Ecology* is published three times a year and the subscription rates for 1984 are: £62.00 (U.K.), £74.50 (overseas), \$155.00 (U.S.A. & Canada) post free. Subscriptions and free specimen copies are available from:

**Blackwell Scientific Publications Ltd, P.O. Box 88, Oxford, England**

## Tanaids

**D. M. HOLDICH and J. A. JONES**

This authoritative survey serves both as a key to identification and as a stimulus to better understanding of this group of crustaceans. It provides details of the general biology and systematics of tanaids and gives descriptions of the twenty-seven species which inhabit shallow marine waters around the British Isles.

£15.00 net

*Synopses of the British Fauna 27*

## Freeliving Marine Nematodes

Volume 1: British Enoplids

**H. M. PLATT and R. M. WARWICK**

This, the first of three volumes dealing with the most abundant group of animals on the seabed, contains detailed drawings and descriptions of species of the order Enoplida recorded from the British Isles. As with other volumes in the series it will facilitate identification for specialist and non-specialist alike.

£27.50 net

*Synopses of the British Fauna 28*

## Light and Photosynthesis in Aquatic Ecosystems

**JOHN T. O. KIRK**

In his unique general study, John Kirk considers the variations of intensity and colour of light that occur underwater and the effect that these have on the ecosystem. He looks in turn at the physics of light transmission through water, the biochemistry and physiology of aquatic photosynthesis and the ecological relationships which the underwater light balance helps to determine.

## Methods for the Study of Marine Benthos

*International Biological Programme Handbook No. 16*

**Edited by N.A. Holme, Marine Biological Laboratory, Plymouth**  
and **A.D. McIntyre, Marine Laboratory, Aberdeen**

*Some comments on the first edition*

'This excellent handbook covers the field of benthic ecological techniques from every conceivable viewpoint... As an outcome of the International Biological Programme, this book is an important contribution to the field of marine biology, and all research workers concerned with benthic ecology will find it invaluable.' *Biological Conservation*

'This handbook should be "required reading" for anyone starting work on benthos and is also a valuable up-to-date reference book for the established worker in this field.' *Underwater Journal*

**Second Edition, Early 1984. 393 pages, 80 illustrations.**  
**Paper, about £16.50**

# THE MARINE BIOLOGICAL ASSOCIATION OF THE UNITED KINGDOM

THE ASSOCIATION was founded in 1884 to promote accurate researches leading to the advancement of zoological and botanical science and to an increase in our knowledge of the food, life, conditions and habits of British fishes. The work of the Association is controlled by a Council elected annually by its subscribing members.

Professor T. H. Huxley took the chair at the initial meeting held in the rooms of the Royal Society and was elected the first President. Among those present were Sir John Lubbock (afterwards Lord Avebury), Sir Joseph Hooker, Professor H. N. Moseley, Mr G. J. Romanes, and Sir E. Ray Lankester who, after Professor Huxley, was for many years president of the Association. It was decided to build a laboratory at Plymouth, where a rich and varied fauna is found.

The Plymouth Laboratory was opened in June 1888, and, since that date, considerable additions have been made to the buildings, including a library, lecture-hall, and extensive laboratory accommodation with up-to-date equipment. Additional sea-water reservoirs have also been built, and an aquarium, modernized in 1959, opened to the public.

Since its foundation the Association has been supported by subscriptions and donations from private members, universities, learned societies, the Fishmongers' Company and other public bodies. For some time past, however, the main financial support for the work of the Plymouth Laboratory has come from Government funds, and since 1965 the Laboratory has been grant-aided through the Natural Environment Research Council.

The Marine Biological Association, under the direction of its Council, undertakes research in all branches of marine science and the main results are published in this journal. Accounts of the laboratory and aquarium are to be found in Vol. 27 (p. 761), Vol. 39 (p. 391) and Vol. 43 (p. 281), and summaries of the activities and research of the Association are given annually in the Report of the Council in the November issue of the Journal.

The laboratory is open throughout the year and its work is carried out by a fully qualified research staff under the supervision of the Director. The names of the members of the staff will be found on the inner page of the front cover. Accommodation is available for British and foreign scientific workers who wish to carry out independent research in all branches of marine science. Arrangements are made for courses for advanced students, and marine animals and plants are supplied to educational institutions.

Work at sea is undertaken by three research vessels and by a motor boat, and these also collect the specimens required in the laboratory.

## TERMS OF MEMBERSHIP

	£
Annual Members, receiving the Journal . . . per annum	15.00
Annual Members, without the Journal . . . per annum	3.00
Founders . . . . .	100.00
Governors . . . . .	500.00

Annual subscriptions become due on 1 January.

Members of the Association have the following rights and privileges: they elect annually the Officers and Council; they are entitled to receive the Journal of the Association at a reduced rate; they are admitted to view the laboratory at Plymouth; they have the first claim to rent a place in the laboratory for research, with use of tanks, boats, etc.; they have the privilege of occupying a table for one week in each year free of charge; and they have access to the books in the library at Plymouth during working hours.

The Commissioners of Inland Revenue have approved the Association for the purposes of Section 16, Finance Act, 1958, and that the whole of the annual subscription paid by a member who qualifies for relief under the section will be allowable as a deduction from his emoluments assessable to income tax under Schedule E.

All correspondence should be addressed to the Director, The Laboratory, Citadel Hill, Plymouth, PL1 2PB.
