International Journal of Technology Assessment in Health Care

Official Journal of Health Technology Assessment International

Editor-in-Chief

Marjukka Mäkelä, M.D., Ph.D., M.Sc.

Research Professor, FINOHTA (Finnish Office for Health Technology Assessment)
at THL (National Institute for Health and Welfare)

P.O. Box 30

00271 Helsinki, Finland

Telephone: +358 29 524 7290

Email: marjukka.makela@thl.fi

Aims and Scope: The *International Journal of Technology Assessment in Health Care* has as its specific scope of interest the generation, evaluation, diffusion, and use of health care technology. It addresses the diverse audience of health care providers within medicine, public health, nursing, and the allied health professions; decision makers in government, industry, and health care organizations; and the scholarly disciplines such as ethics, economics, law, history, sociology, psychology, and engineering. The journal aims to fill the needs of those interested in the complexities of interaction between people and technology; technology as a force in social and organizational change; and technology as it is created, produced, applied, and paid for. It examines descriptively and analytically the effects of technology as perceived from the vantage point of different academic disciplines and policy-making organizations and examines methods necessary to conduct studies and evaluations of technology.

The focus of the journal is the international health care community. The experience of different countries in their encounter with health care technology, viewed comparatively, is invaluable to understanding its effects. Further, it is important to establish ties with the scholars, governments, and private institutions concerned with health care technology so that the experiences and learning of the international community in its parts can benefit the whole. The use of technology in health care has created some of the major dilemmas in society today. The journal serves as a forum for the wide range of professionals interested in the assessment of medical technology, its consequences for patients, and its impact on society.

Publishing, Advertising, and Subscription Offices: Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, U.S.A. (for U.S.A., Canada, and Mexico); or Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK (for U.K. and elsewhere).

2013 Subscription Information: *International Journal of Technology Assessment in Health Care* (ISSN 0266-4623)

is published quarterly in January, April, July, and October by Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473; Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK. Annual institutional subscription rates for Volume 29 (2013): Institutions online only US \$509.00, and online only UK and elsewhere £292.00. Individuals online only US \$268.00, and online only UK and elsewhere £151.00. Single part: US \$160.00 in the U.S.A., Canada and Mexico; UK £92.00 and elsewhere. Online only for all institutions. Print editions ceasing for 2013. Back volume prices are available upon request. *International Journal of Technology Assessment in Health Care* and other Cambridge journals can be found at <http://journals.cambridge.org>

CONTENTS

EDITORIAL

- 115** Structure for economic evaluations
Marjukka Mäkelä and Harri Sintonen

METHODS

- 117** Consolidated Health Economic Evaluation Reporting Standards (CHEERS) statement
Don Husereau, Michael Drummond, Stavros Petrou, Chris Carswell, David Moher, Dan Greenberg, Federico Augustovski, Andrew H. Briggs, Josephine Mauskopf, and Elizabeth Loder on behalf of the CHEERS Task Force
- 123** Bayesian hierarchical meta-analysis model for medical device evaluation: Application to intracranial stents
Leslie Pibouleau and Sylvie Chevret
- 131** Canadian Cancer Risk Management Model: Evaluation of cancer control
William K. Evans, Michael C. Wolfson, William M. Flanagan, Janey Shin, John Goffin, Anthony B. Miller, Keiko Asakawa, Craig Earle, Nicole Mittmann, Lee Fairclough, Jillian Oderkirk, Philippe Finès, Stephen Gribble, Jeffrey Hoch, Chantal Hicks, D. Walter R. Omariba and Edward Ng

ASSESSMENTS

- 140** Cost-effectiveness analysis of cardiac resynchronization therapy in patients with NYHA I and NYHA II heart failure in Spain
Luis Almenar, Beatriz Díaz, Aurelio Quesada, Carlos Crespo, Belén Martí, Stuart Mealing, Cecilia Linde and Claude Daubert
- 147** Evolution of a cost-utility model of donepezil for Alzheimer's disease
Jaime L. Peters, Rob Anderson, Martin Hoyle and Chris Hyde
- 155** Home telemonitoring for chronic disease management: An economic assessment
Guy Paré, Placide Poba-Nzaou and Claude Sicotte
- 162** Usability of digital media in patients with COPD: A pilot study
Amy Cheung, Anton Janssen, Oliver Amft, Emiel F. M. Wouters and Martijn A. Spruit
- 166** Quality indicators to assess a colorectal cancer prevention program
Victoria Serra-Sutton, Carmela Barrantes Serrano and Mireia Espallargues Carreras

POLICIES

- 174** Case studies that illustrate disinvestment and resource allocation decision-making processes in health care: A systematic review
Julie Polisena, Tammy Clifford, Adam G. Elshaug, Craig Mitton, Erin Russell and Becky Skidmore
- 185** Hospital-based health technology assessment for innovative medical devices in university hospitals and the role of hospital pharmacists: Learning from international experience
Nicolas Martelli, Anne-Sophie Lelong, Patrice Prognon and Judith Pineau
- 192** Assessing the international use of health technology assessments: Exploring the merits of different methods when applied to the National Institute of Health Research Health Technology Assessment (NIHR HTA) Programme
David Wright, Ruairidh Milne, Alison Price and Nicola Tose

- 198** National guidelines for high-cost drugs in Brazil: Achievements and constraints of an innovative national evidence-based public health policy
Paulo D. Picon, Alberto Beltrame and David Banta
- 207** Improving access to skilled attendance at delivery: A policy brief for Uganda
Harriet Nabudere, Delius Asiimwe and Jacinto Amandua
- 212** Human resource capacity to effectively implement malaria elimination: A policy brief for Ethiopia
Adugna Woyessa, Mamuye Hadis and Amha Kebede

BBS

Behavioral and Brain Sciences

EDITORS

Paul Bloom, *Yale University, USA* | **Barbara L. Finlay**, *Cornell University, USA*

Behavioral and Brain Sciences (BBS) is the internationally renowned journal with the innovative format known as Open Peer Commentary. Particularly significant and controversial pieces of work are published from researchers in any area of psychology, neuroscience, behavioural biology or cognitive science, together with 10-25 commentaries on each article from specialists within and across these disciplines, plus the author's response to them. The result is a fascinating and unique forum for the communication, criticism, stimulation, and particularly the unification of research in behavioural and brain sciences from molecular neurobiology to artificial intelligence and the philosophy of the mind.
