## *Withstanding the Test of Time*

**P**ROBABLY few preparations which have been introduced to the medical profession during the past forty years have met with wider recognition and approval, in constantly increasing measure, than has Antiphlogistine Brand Dressing.

Needless to say, its pre-eminent position has been attained squarely on its merits. Year by year clinical evidence has accumulated from leading specialists and from general practitioners in all civilised countries as to the specific value of this preparation, and to-day it is regarded as the topical application of choice wherever inflammation and congestion are present.

The esteem in which this preparation is held by the medical profession has tempted many to market inferior imitations, which, upon analysis, have not been found to possess the therapeutic qualities of the prototype. In order to avoid disappointment, therefore, physicians, when prescribing, are respectfully cautioned always to specify Antiphlogistine Dressing in the original, unopened, tin.

Antiphlogistine Dressing maintains its supremacy through its ability to fulfil the need for which it was created. It has withstood the acid test of time.
