# The Behavioral and Brain Sciences

## Editor

Stevan Harnad  
20 Nassau St., Suite 240  
Princeton, NJ 08542

## Assistant Editor

Helaine Randerson

## Associate Editors

### *Behavioral Biology*

Jack P. Hailman/U. Wisconsin  
Hubert Markl/Universität Konstanz

### *Biosocial Behavior*

Glendon Schubert/U. Hawaii, Manoa

### *Cognition and Artificial Intelligence*

Zenon Pylyshyn/U. Western Ontario

### *Cognitive Development*

Annette Karmiloff-Smith/MRC, London and MPI, Nijmegen

### *Cognitive Neuroscience*

Lynn Nadel/U. California, Irvine

### *Developmental Psychology*

Charles J. Brainerd/University of Alberta

### *Evolutionary Biology*

Michael T. Ghiselin/California Academy of Sciences

### *Experimental Analysis of Behavior*

A. Charles Catania/U. Maryland, Baltimore County

### *History and Systems*

Julian Jaynes/Princeton

### *Language and Cognition*

Peter Wason/University College, London

### *Language and Language Disorders*

Max Coltheart/U. London

### *Neurobiology*

Graham Hoyle/U. Oregon

### *Neuropharmacology*

Susan D. Iversen/Merck Sharp and Dohme, Ltd.

### *Neuropsychology*

Jeffrey A. Gray/Inst. Psychiatry, London

### *Neurophysiology*

Sten Grillner/Karolinska Institutet

### *Paleoneurology*

Stephen Jay Gould/Harvard

### *Philosophy*

Daniel C. Dennett/Tufts

### *Psychobiology*

Victor H. Denenberg/U. Connecticut

David S. Olton/Johns Hopkins

### *Quantitative Methods*

Donald B. Rubin/U. Chicago

### *Vision and Artificial Intelligence*

Stuart Sutherland/U. Sussex

**Editorial Policy** *The Behavioral and Brain Sciences* (BBS) is an international journal providing a special service called Open Peer Commentary\* to researchers in any area of psychology, neuroscience, behavioral biology, or cognitive science who wish to solicit, from fellow specialists within and across these BBS disciplines, multiple responses to a particularly significant and controversial piece of work. (See *Instructions for Authors and Commentators*, inside back cover.) The purpose of this service is to contribute to the communication, criticism, stimulation, and particularly the unification of research in the behavioral and brain sciences, from molecular neurobiology to artificial intelligence and the philosophy of mind.

Papers judged by the editors and referees to be appropriate for Commentary are circulated to a large number of commentators selected by the editors, referees, and author to provide substantive criticism, interpretation, elaboration, and pertinent complementary and supplementary material from a full cross-disciplinary perspective. The article, accepted commentaries, and the author's response then appear simultaneously in BBS.

Commentary on BBS articles may be provided by any qualified professional in the behavioral and brain sciences, but much of it is drawn from a large body of BBS Associates who have become formally affiliated with the project.

Qualified professionals are eligible to become BBS Associates if they have (1) been nominated by a current BBS Associate, (2) refereed for BBS, or (3) had a commentary or article accepted for publication. A special subscription rate is available to Associates. Individuals interested in serving as BBS Associates are asked to write to the editor.

This publication was supported in part by NIH Grant LM 03539 from the National Library of Medicine.

\*Modelled on the 'CA Comment' service of the journal *Current Anthropology*.

**Copying** This journal is registered with the Copyright Clearance Center (21 Congress St., Salem, MA 01970). Organizations in the U.S.A. who are also registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of U.S. Copyright Law) subject to payment to the CCC of the per-copy fee indicated in the code on the first page of the article. This consent does not extend to multiple copying for promotional or commercial purposes.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, PA 19104, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from the Cambridge or New York offices of the Press.

**Subscriptions** *The Behavioral and Brain Sciences* (ISSN 0140-525X) is published quarterly in March, June, September and December. Four parts form a volume. The subscription price, which includes postage, of Volume 7 (1984) is US \$120.00 net in the U.S.A. and Canada (£66.00 in the U.K. and rest of the world) for institutions; US \$55.00 net (£33.00) for individuals; US \$32.00 net (£20.00) for BBS Associates; and US \$32.00 net for students (in the U.S.A. and Canada only) who provide proof of eligibility with order. Single parts cost US \$33.00 net (£19.00) plus postage. Institutional orders may be sent to a bookseller or, in the U.S.A. and Canada direct to: Cambridge University Press, 32 East 57 Street, New York, N.Y. 10022; in the U.K. and rest of the world to: Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, England. Individuals must order direct from the Press. Second class postage paid at New York, N.Y. and at additional mailing offices. Postmaster: send address changes in the U.S.A. and Canada to BBS, Cambridge University Press, 32 East 57 Street, New York, N.Y. 10022.

**Advertising** Inquiries about advertising should be sent to the Journals Promotion Department of the Cambridge or New York office of Cambridge University Press.

<b>Ebbesson, Sven O. E.</b> Evolution and ontogeny of neural circuits		<b>321</b>
<b>Open Peer Commentary</b>		
<b>Alberch, P.</b> A return to the <i>Bauplan</i>	332	
<b>Braford, M. R., Jr.</b> Parcellation: An explanation of the arrangement of apples and oranges on a severely pruned phylogenetic tree?	332	
<b>Bullock, T. H.</b> A milestone in comparative neurology: A specific hypothesis claims rules for conservative connectivity	333	
<b>Calvin, W. H.</b> Precision timing requirements suggest wider brain connections, not more restricted ones	334	
<b>Campbell, C. B. G.</b> Parcellation theory: New wine in old wineskins	334	
<b>Clarke, P. G. H.</b> Parcellation: A hard theory to test	335	
<b>Demski, L. S.</b> Can parcellation account for the evolution of behavioral plasticity associated with large brains?	335	
<b>Diamond, I. T.</b> How do the lateral geniculate and pulvinar evolve?	336	
<b>Ewert, J.-P.</b> Behavioral selectivity based on thalamotectal interactions: Ontogenetic and phylogenetic aspects in amphibians	337	
<b>Falk, D.</b> Implications of the parcellation theory for paleoneurology	338	
<b>Finger, T. E.</b> Is parcellation parsimonious?	339	
<b>Fritsch, B.</b> Parcellation or invasion: A case for pluralism	339	
<b>Innocenti, G. M.</b> On evolution by loss of exuberancy	340	
<b>Ito, H.</b> Possibility of "invasion" in the sensory area	341	
<b>Kaas, J. H.</b> Duplication of brain parts in evolution	342	
<b>Koenderink, J. J.</b> Parcellation: A reflection of the structure of the animal's world	343	
<b>MacLean, P. D.</b> A brain theory commensurate with Procrustes' bed	344	
<b>Northcutt, R. G.</b> Parcellation: The resurrection of Hartsoeker and Haeckel	345	
<b>Ramon-Moliner, E.</b> Exploratory neural connectivity	345	
<b>Schneider, G. E.</b> Axon development and plasticity: Clues from species differences and suggestions for mechanisms of evolutionary change	346	
<b>Szentágothai, J.</b> Cytodiversification and parcellation	347	
<b>Wilczynski, W.</b> The parcellation theory: What does the evidence tell us?	348	
<b>Willis, W. D., Jr. &amp; Kevetter, G. A.</b> The mammalian spinthalamic system and the parcellation hypothesis	349	
<b>Young, J. Z.</b> Yes, but what is the basis of homology? An invertebrate parallel	350	
<b>Author's Response</b>		
<b>Ebbesson, Sven O. E.</b> An update of the parcellation theory		350
<b>Hoyle, Graham</b> The scope of neuroethology		<b>367</b>
<b>Open Peer Commentary</b>		
<b>Arbib, M. A.</b> Neuroethology: A call for less exclusivity and more theory	381	
<b>Bässler, U.</b> Neuroethology: An overnarrow definition can become a source of dogmatism	382	
<b>Bateson, P.</b> Flow diagrams and hydraulic models	382	
<b>Bullock, T. H.</b> Neuroethology: In defense of open range; don't fence me in	383	
<b>Clarac, F.</b> Difficulties and relevance of a neuroethological approach to neurobiology	383	
<b>Davis, J.</b> Neuroethology: Why put it in a straitjacket?	384	
<b>Delcomyn, F.</b> Can neuroethologists be led?	385	
<b>Ehret, G.</b> Disregarding vertebrates is neither useful nor necessary	385	
<b>Erber, J.</b> Neuroethology or motorethology?	386	
<b>Ewert, J.-P.</b> Hoyle's new view of neuroethology: Limited and restrictive	386	
<b>Fernald, R. D.</b> Neuroethology according to Hoyle	387	
<b>Grossberg, S.</b> Neuroethology and theoretical neurobiology	388	
<b>Guthrie, D. M.</b> Can the aims of neuroethology be selective, while avoiding exclusivity?	390	
<b>Hinde, R. A.</b> Ethology has progressed	391	
<b>Huber, F.</b> Neuroethology, according to Hoyle	391	
<b>Ingle, D. J.</b> Vertebrate neuroethology: Doomed from the start?	392	
<b>Kupfermann, I.</b> They are really complex when you get to know them	393	
<b>Leonard, J. L. &amp; Lukowiak, K.</b> The squishy revisited: A call for ethological affirmative action	394	
<b>Macmillan, D. L.</b> We are making good progress in the neural analysis of behaviour	395	
<b>Manning, A.</b> Neuroethology: Not losing sight of behaviour	395	
<b>Markl, H.</b> The ethology of neuroethology	396	
<b>Rowell, C. H. F.</b> Resurrecting Lorenz's hydraulic model: Phlogiston explained by quantum mechanics	397	
<b>Schleidt, W. M.</b> Points of congruence between ethology and neuroscience	398	
<b>Selverston, A. I.</b> Neuroethology – how exclusive a club?	399	
<b>Simmons, J. A.</b> Keep the scope of neuroethology broad	400	
<b>Steklis, H. D.</b> The proper domain of neuroethology	401	
<b>Walters, E. T.</b> Ethology and neuroethology: Easy accessibility has been and still is important	402	
<b>Young, J. Z.</b> Is neuroethology wise?	403	
<b>Author's Response</b>		
<b>Hoyle, Graham</b> Neuroethology: To be, or not to be?		403

# Zuckerman, Marvin Sensation seeking: A comparative approach to a human trait

413

## Open Peer Commentary

- Baldwin, J. D.** A balanced emphasis on environmental influences 434
- Barratt, E. S.** Personality traits: Causation, correlation, or neo-Bayesian 435
- Callaway, E.** Biological correlates of personality: Suppose it's not so simple 436
- Claridge, G.** Going over the top with optimal arousal theory 436
- Clark, A.** The logic of the comparative approach 437
- Clavier, R. M.** Monoamines and human traits: A nice idea, but . . . 438
- Eterović, V. A. & Ferchmin, P. A.** Are sensation-seeking behavior, sleep patterns, and brain plasticity related? 439
- Eysenck, H. J.** The comparative approach in personality study 440
- Gray, J. A.** Is there a relationship between sensation seeking and strength of the nervous system? 441
- Haier, R. J.** Sensation seeking and augmenting-reducing: Does a nerve have nerve? 441
- Izard, C. E.** Emotion variables as personality traits 442
- Katz, R. J.** Sensation seeking: A clarification, a caveat, and a conjecture 443
- Knorring, L. von** The biochemical basis of sensation-seeking behavior 443
- Mason, S. T.** The noradrenergic locus coeruleus – the center of attention? 445
- Neufeld, R. W. J.** Physiological substrates of a psychological dimension 445
- Panksepp, J. & Siviy, S.** Spanning the transspecies gulf 446
- Redmond, D. E., Jr.** Biochemical substrates for a human “sensation-seeking” trait 447
- Royce, J. R.** The concept of sensation seeking and the structure of personality 448
- Simmel, E. C.** Sensation seeking: Exploration of empty spaces or novel stimuli? 449
- Sokolov, E. N.** Sensation seeking and the orienting reflex 450
- Stelmack, R. M.** Sensation seeking, orientation, and defense: Empirical and theoretical reservations 450
- Strelau, J.** Zuckerman's sensation-seeking theory: A view from Eastern Europe 451
- Suedfeld, P.** Sensation seeking: Where is the meat in the stew? 452
- Wohlwill, J. F.** What are sensation seekers seeking? 453

## Author's Response

- Zuckerman, Marvin** Home from a perilous journey 453
