

PROCEEDINGS  
OF THE  
EDINBURGH  
MATHEMATICAL SOCIETY.

---

VOLUME I.

---

SESSION 1883.

WILLIAMS AND NORGATE,  
14 HENRIETTA STREET, COVENT GARDEN, LONDON; AND  
20 SOUTH FREDERICK STREET, EDINBURGH.  
1894.

**PRINTED BY**  
**JOHN LINDSAY, HIGH STREET, EDINBURGH.**

# I N D E X.

---

	PAGE
CHRYSTAL, G.	
Present fields of mathematical research [Title], -	3
FRASER, A. Y.	
The fundamental notions of the Differential Calculus [Title], - - - - -	129
KNOTT, C. G.	
An account of Newton's "Opticks" [Title], - -	129
Plücker's first equation connecting the singularities of curves, - - - - -	130
Some notes on Quaternions [Title], - - - -	136
LIST OF MEMBERS, - - - - -	137
MACKAY, J. S.	
The triangle and its six scribed circles, - -	4
Notation, - - - - -	6
§ 1. Centroid, - - - - -	13
§ 2. Circumcentre, - - - - -	32
§ 3. Incentre, - - - - -	39
§ 4. Excentres, - - - - -	47
§ 5. Orthocentre, - - - - -	60
§ 6. Euler's line, - - - - -	97
§ 7. Relations among radii, - - - - -	104
§ 8. Area, - - - - -	117
MUIR, T.	
New proof of Professor Tait's problem of arrangement [Title], - - - - -	129
Some short notes of interest to Teachers [Title], -	129

	PAGE
MUNN, D.	
The nine-point circle [Title], - - - - -	129
Some theorems on radical axes [Title], - - - - -	136
OFFICE-BEARERS, - - - - -	3

---

- PAGE 7. Last line but one, W. J. should be J. W.
- „ 18. Sixth line, MM should be MM'.
- „ 23. Last line but one, maximum should be minimum.
- „ 48. The following historical note in reference to (5) has been omitted:—

As regards the expressions for  $s$ ,  $s_1$ ,  $s_2$ ,  $s_3$  some are given in Heron's theorem regarding the area of a triangle; some are given by Euler in *Novi Commentarii Academiae...Petropolitanae* for the years 1747–8, I. 49–66 (1750). All except those where D, E, F occur are given in the *Ladies' Diary* for 1759; all are given by T. S. Davies in the *Ladies' Diary* for 1835, pp. 51–2.

Six of the expressions for  $a$ ,  $b$ ,  $c$  are given by T. S. Davies in the *Ladies' Diary* for 1835, p. 52.
