## INDEX UNIVERSALIS OTORHINOLARYNGOLOGICUS.

This Index, which is published as a supplement to the *Rassegna Internazionale di Oto-rino-laringologia* and is edited by Professor Guido Guida, is drawn up on the lines of the *Index Medicus*. It is hoped to make it an annual publication and it should be most useful to all Members of our specialty.

# Peroral Endoscopy Table

Fitted with Head Rest for BRONCHOSCOPY, ŒSOPHAGOSCOPY,  
NASAL OPERATIONS Etc.

Designed by V. E. NEGUS, M.B., B.S., F.R.C.S.

The head rest enables the operator himself to place the patient in the desired position for a variety of operations. All parts touched by the operator are sterilisable.

The apparatus is an elaboration of Haslinger's Bronchoscopic head rest, but its range of utility is extended to enable the patient to be supported with the shoulders beyond the end of the table for œsophagoscopy, and to be kept in the correct attitude during operations performed in the sitting or semi-sitting position.
