

CAMBRIDGE History of Science

Science under Control

The French Academy of Sciences
1795–1914

M. P. CROSLAND

The nineteenth-century Academy of Sciences was the only national body for science in France and it controlled all recognised branches of science. This book examines governmental control of science and sets it in a historical and sociological context.

The Investigation of Difficult Things

Essays on Newton and the History of the Exact Sciences in Honour of D. T. Whiteside

Edited by P. M. HARMAN and ALAN E. SHAPIRO

The volume has been published in honour of D. T. Whiteside, famous for his edition of *Mathematical Papers of Isaac Newton*, published by Cambridge University Press.

£90.00 net HB 0 521 37435 99 548 pp. 1992

The Rise of Public Science

Rhetoric, Technology, and Natural Philosophy in Newtonian Britain

LARRY STEWART

By examining the activities and the promotions in which Newton's disciples became involved, Stewart sheds new light on prevailing and practising attitudes to science and technology before the Industrial Revolution.

£45.00 net HB 0 521 41700 7 475 pp. 1992

Crowds, Psychology and Politics, 1871–1899

JAAP VAN GINNEKEN

This study demonstrates how Le Bon derived most of his key conceptions on crowd psychology from his immediate predecessors. Van Ginneken traces the descendants and heirs of the original authors throughout Europe, to shed a new light on their mutual relations.

Johannes Kepler, New Astronomy

WILLIAM H. DONAHUE

Foreword by OWEN GINGERICH

Kepler tested the deductive geometrical approach to astronomy used since ancient times and replaced it with fundamental physical theory. His discovery of elliptical planetary orbits was a crucial step towards a unified scientific view of the cosmos.

All About Arthritis

Past, Present, Future

DERRICK

BREWERTON

Brewerton tells the intriguing story of arthritis research, from the days before germs were recognized as causes of disease and when reasons for inflammation were

obscure, to the present, when breakthroughs in genetics, epidemiology, x-ray crystallography, cell biology, and molecular biology support major advances in research and treatment.

Nature Lost?

Natural Science and the German Theological Traditions of the Nineteenth Century

FREDERICK GREGORY

Unlike their British and American counterparts, nineteenth century German theologians paid little attention to natural science. Gregory shows that the loss of nature from theological discourse is only one reflection of the larger cultural change that marks the transition of European society from nineteenth to a twentieth-century mentality.

Making Sex

Body and Gender from the Greeks to Freud

THOMAS LAQUEUR

"[In this] challenging analysis of our ideas on gender...Laqueur shows how radically our consciousness of ourselves, our bodies, our sex has changed over the centuries. The categories we think of as most basic turn out to be mutable ...And in this transformation, Laqueur emphasizes, social changes were as crucial as medical teachings." R.Porter, THE INDEPENDENT

£10.25/\$15.50 paperback

A Skeptical Biochemist

JOSEPH FRUTON

"Fruton's approach to the study of the history of science will strike a responsive chord in many working scientists ... Fruton concludes with a fascinating discussion of the evolution of

scientific language and its effect on communication ... Scientists, historians and journal editors could all benefit from reading this section... Fruton has produced a book that demonstrates the sources of tension between scientists on the one hand and historians and philosophers of science on the other, and, as such, it can be commended to anyone engaged in these disciplines." Scenes from Deep Time

Early Pictorial Representations of the Prehistoric World

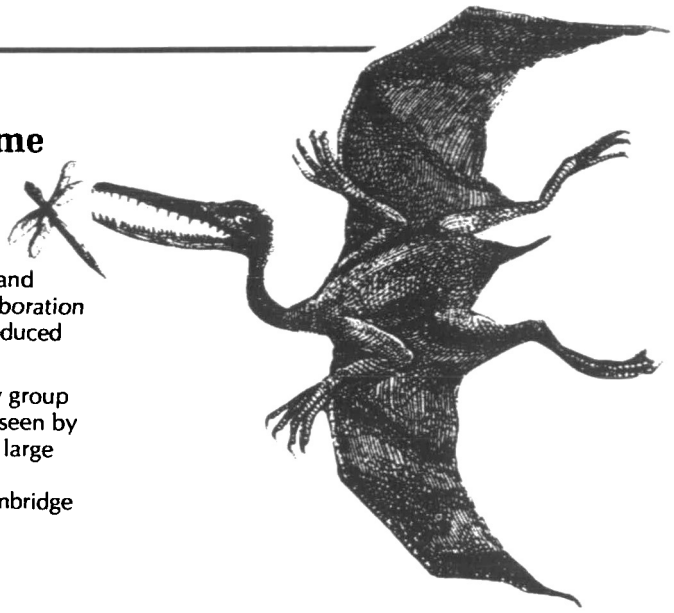

Martin J. S. Rudwick

Rudwick analyzes how fossil finds and biological research fueled the collaboration between scientists and artists that produced the first images of prehistory.

"This work reveals an extraordinary group of illustrations of the 'deep past' as seen by geologists, artists, and the public at large during the nineteenth century."

—James A. Secord, University of Cambridge

The Politics of Evolution

Morphology, Medicine, and Reform in Radical London

Adrian Desmond

Looking for the first time at the cut-price anatomy schools rather than genteel Oxbridge, Desmond analyzes pre-Darwinian evolutionary ideas in reform-minded and politically charged early nineteenth-century London.

"A *tour de force* on the history of biological evolution in 19th-century Britain. . . . One of those rare books that not only stakes out new territory but demands a radical overhaul of conventional wisdom. . . . [A] majestic achievement."—John Hedley Brooke, *Times Higher Education Supplement*

Albert Einstein Mileva Marić

The Love Letters

*Edited and with an
introduction by Jürgen Renn
and Robert Schulmann*

Translated by Shawn Smith

In 1903 Albert Einstein married Mileva Marić, his companion, colleague, and confidante. Beginning in 1897 and ending shortly after their

marriage, these 54 love letters offer a rare and fascinating glimpse into Einstein's relationship with his first wife while shedding light on his formative intellectual development.

"... will further undermine the stereotype and reward all who delight in the company of young people deliciously in love. We all have trunks in the attic harboring letters that reveal the same impatience with parents, the same youthful naïveté, passion and delight. But this was Einstein, and that makes all the difference."—*New York Times Book Review*

Cloth: £12.50 ISBN 0-691-08760-1

Conceptual Revolutions

Paul Thagard

In this path-breaking work, Paul Thagard draws on history and philosophy of science, cognitive psychology, and the field of artificial intelligence to develop a theory of conceptual change capable of accounting for all major scientific revolutions. He discusses the psychological mechanisms by which new concepts and links between them are formed, and advances a computational theory of explanatory coherence to show how new theories can be judged to be superior to previous ones.

Cloth: £24.00 ISBN 0-691-08745-8

The Right Tools for the Job

At Work in Twentieth-Century Life Sciences

Edited by Adele E. Clarke and Joan H. Fujimura

This volume examines scientific practice through studies of research tools in an array of twentieth-century life sciences. The contributors draw upon and extend the multidisciplinary perspectives in current science studies to understand the processes through which scientific researchers constructed the right—and, in some cases, the wrong—tools for the job.

Cloth: £27.50 ISBN 0-691-08581-1

THE BRITISH SOCIETY FOR THE HISTORY OF SCIENCE

Membership of the Society, which normally includes a subscription to *The British Journal for the History of Science*, is open to all persons approved by the Council of the Society and elected at an ordinary meeting. The annual subscription for the membership year 1991 is £18.50 (\$40.00) or £9.25 (\$25.00) for associate membership, which includes students at centres of higher education. There is an Introductory Offer for ordinary members who pay £14.00 (\$30.00) for the first year. Applications for membership should be made on a form which is available from the Society's Executive Secretary at the address below.

Meetings: The Society mounts an ambitious programme of meetings. The pattern is flexible, but includes a three-day summer meeting, usually held at a different British University or Polytechnic each year. About four other meetings, lasting for between one and three days, are held during the year, sometimes devoted to a clearly defined theme or an important anniversary, and often arranged in conjunction with other scholarly societies.

The British Journal for the History of Science is the official organ of the Society. All correspondence on the contents of the *Journal* should be addressed to the Editor, Dr J. H. Brooke, Department of History, University of Lancaster, Lancaster LA1 4YG, England. Books for review should be sent to the Reviews Editor, Dr John Henry, Science Studies Unit, University of Edinburgh, 21 Buccleuch Place, Edinburgh EH8 9LN.

Advertising: Contact the Journals Advertising Manager, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU.

Other publications: BSHS Monograph Series is designed to allow the publication of monographic studies in the history of science quickly and cheaply. All correspondence on the subject of monographs, and any new suggestions for titles, should be sent to the Series Editor, Dr P. Weindling, Wellcome Unit for the History of Medicine, 45-47 Banbury Road, Oxford OX2 6PE, England. Monographs are available to members at a special price, post-free from the Society's Executive Secretary. Non-members may obtain them through bookshops, or post-free from the Executive Secretary. Titles are as follows:

2. *The Letters of Georges Cuvier: A Summary Calendar*. Ed. by Dorinda Outram. 1980. £4.50/\$10.00 (£3.50/\$8.00 to members).
3. *Rationality and Ritual: the Windscale Inquiry and Nuclear Decisions in Britain*. By Brian Wynne. 1982. £7.00/\$15.00 (£5.00/\$11.00 to members).
4. *The Royal Society and Its Fellows 1660-1700: the Morphology of an Early Scientific Institution*. By Michael Hunter. 1982, reprinted 1985. £9.00/\$19.00 (£6.50/\$14.00 to members).
5. *Francis Bacon's Natural Philosophy: A New Source. A Transcription of Manuscript Hardwick 72A with Translation and Commentary*. By Graham Rees, assisted by Christopher Upton. 1984. £7.90/\$17.00 (£5.60/\$12.00 to members).
6. *Archives of the British Chemical Industry, 1750-1914: A Handlist*. By Peter J. T. Morris and Colin A. Russell. Contributing editor John Graham Smith. 1988. £14.50/\$31.00 (£9.00/\$19.00 to members).
7. *Index to the Scientific Correspondence of John William Dawson*. By Susan Sheets-Pyenson. 1992. £20.00/\$44.00 (£12.00/\$26.00 to members).

Each year, the Society publishes a *List of Theses in History of Science* in British universities. This is available free to members, and at £3.00 (\$6.00) to non-members on request to the Executive Secretary. Standing orders are accepted from members or non-members who wish to receive the list regularly.

The Society's *Newsletter*, an informal publication edited by Dr Frank A. J. L. James, RICHST, The Royal Institution, 21 Albemarle Street, London W1X 4BS, appears in January, May and September each year. It is free to members, £6.00 (\$12.00) for institutions and non-members. The Society's Education Section also has a regular *Newsletter, Education Forum*, edited by Peter Ellis, 12 Belvedere St, Ryde, Isle of Wight, PO33 2JW.

Administrative business of the Society is handled by The Executive Secretary, Wing-Commander G. Bennett, 31 High Street, Stanford in the Vale, Faringdon, Oxfordshire SN7 8LH. The Society is registered in England as a Limited Company (No. 562208) and is a Registered Charity (No. 258854).

Copying: This journal is registered with the Copyright Clearance Center, 27 Congress Street, Salem, MA 01970. Organizations in the USA who are also registered with the CCC may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to CCC of the per-copy fee of \$5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-0874/92 \$5.00+.00.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American branch of Cambridge University Press.

Back volumes are obtainable as follows: Volumes 18-24: Wing-Commander G. Bennett, 31 High Street, Stanford in the Vale, Faringdon, Oxon SN7 8LH.
