CORRIGENDUM

Boundary layer flow and bed shear stress under a solitary wave – CORRIGENDUM

P. L.-F. Liu, Y. S. Park and E. A. Cowen

Key words: corrigendum

This corrigendum notice is to inform the readers that we have discovered that some terms were missing in the nonlinear boundary-layer equation studied in the article by Liu, Park & Cowen (2007), which gave a theoretical and experimental treatise of the bottom boundary layer under a solitary wave. The revision is available in a separate note (Park, Verschaeve, Pedersen & Liu 2014), which shows some improvements in agreement between the revised theory and experimental data. Additional experimental data (Park 2009) were used for comparisons in the revision.
