

## Index of Subjects

- Acinetobacter, comparison of clinical, strains using a carbon source growth assay, 443
- African horse sickness virus, a competitive ELISA for the detection of group-specific antibodies to, 303
- Avian viruses, detection of antibody to, in human populations, 519
- Beansprouts, an outbreak of *Salmonella saint-paul* infection associated with, 229
- Botulism, an outbreak of foodborne, associated with contaminated hazelnut yoghurt, 389
- Campylobacter jejuni*, bismuth subsalicylate in the prevention of colonization of infant mice with, 397
- Campylobacter jejuni*, horizontal transmission of, amongst broiler chicks: experimental studies, 101
- Campylobacters, application of a new phagetyping scheme to, isolated during outbreaks, 405
- Chlamydia, a prospective study of genital infections in a family-planning clinic. 2. Infection – the identification of a high-risk group, 55
- Chlamydial, a study of human respiratory tract, infections in Cambridgeshire 1986–88, 479
- Cryptosporidiosis, epidemiological aspects of human, 1
- Dengue, serologically proven acute rubella infection in patients with clinical diagnosis of, 297
- Diarrhoea, environmental sanitation, food and water contamination and, in rural Bangladesh, 253
- Eastern equine encephalitis, trajectory analysis of winds and, in USA, 1980–5, 329
- Egg, a comparative study of the heat resistance of salmonellas in homogenized whole, egg yolk or albumen, 237
- Escherichia coli*, lack of association of, exhibiting both mannose-resistant haemagglutination and diffuse adherence to HEp-2 cells with acute diarrhoea in children, 127
- Genital infections, a prospective study of, in a family-planning clinic. 1. Microbiological findings and their association with vaginal symptoms, 47
- Genital infections, a prospective study of, in a family-planning clinic. 2. Chlamydia infection – the identification of a high-risk group, 55
- Goat cheese, bacteriological quality of on-farm manufactured, 87
- Hepatitis B, HBV-DNA, HBeAg/anti-HBe serological status in chronic individuals from central Italy, 511
- Hepatitis B, immunization against – what can we expect?, 499
- Hepatitis B, immunogenicity of yeast-derived, vaccine from two different producers, 143
- Hepatitis B, prevention of, in Italy: lessons from surveillance of type-specific acute viral hepatitis, 135
- HHV6, production of IgM antibody to, in reactivation and primary infection, 289
- '*Klebsiella aerogenes*', comparison of SDS-PAGE protein patterns with other typing methods for investigating the epidemiology of, 455
- Legionellaceae, prevalence of antibodies to 15 antigens of, in patients with community-acquired pneumonia, 39
- Legionella pneumophila*, a field study of the survival of, in a hospital hot-water system, 381
- Legionella pneumophila*, phenotypic variation amongst genotypically homogeneous, serogroup 1 isolates: implications for the investigation of outbreaks of Legionnaires' disease, 171
- Legionnaires' disease, maintenance of cooling towers following two outbreaks of, in a city, 29
- Legionnaires' disease, phenotypic variation amongst genotypically homogeneous *Legionella pneumophila* serogroup 1 isolates; implications for the investigation of outbreaks of, 171

- Legionnaires' disease, the Stafford outbreak of, 361  
Legionnaires' disease, two outbreaks of, in Bolton Health District, 159  
Listeriosis, human, in Britain, 1967–85, a summary of 722 cases. 1. Listeriosis during pregnancy and in the newborn, 181  
Listeriosis, human, in Britain, 1967–85, a summary of 722 cases. 2. Listeriosis in non-pregnant individuals, a changing pattern of infection and seasonal incidence, 191
- Milk, excretion of *Yersinia* spp. associated with consumption of pasteurized, 345  
Milk, the source of *Yersinia* spp. in pasteurized: an investigation at a dairy, 351
- Necrobacillosis, experimental observations on the pathogenesis of, 73  
*Neisseria meningitidis*, secretor status, smoking and carriage of, 203
- Q fever, an epidemiological study of an outbreak of, in a secondary school, 467  
Q fever vaccine, a randomized, controlled, double-blind, cross-over, clinical trial of, in selected Queensland abattoirs, 267  
Q fever, vaccine prophylaxis of abattoir-associated: eight years' experience in Australian abattoirs, 275
- Rubella, serologically proven acute, infection in patients with clinical diagnosis of dengue, 297  
Rubella, the avidity of specific IgM detected in primary, and reinfection, 489
- Salmonella enteritidis*, serological response of chickens to, infection, 63  
Salmonellas, a comparative study of the heat resistance of, in homogenized whole egg, egg yolk or albumen, 237  
*Salmonella saint-paul*, an outbreak of, infection associated with beansprouts, 229  
*Salmonella typhimurium*, further studies on the inhibition of colonization of the chicken alimentary tract with, by pre-colonization with an avirulent mutant, 427  
*Salmonella typhimurium*, plasmid profile typing can be used to subdivide phage-type 49 of, in outbreak investigations, 243  
*Salmonella typhimurium*, reduction in faecal excretion of, strain F98 in chickens vaccinated with live and killed *S. typhimurium* organisms, 413  
*Shigella dysenteriae* 1, trimethoprim resistance gene in isolates obtained from widely scattered locations of Asia, 219  
Spirochaetes, intestinal, in a Gulf Arab population, 261  
*Staphylococcus aureus*, bacteriophage 604: a marker phage for multi-resistant, in Australia, 211  
*Staphylococcus epidermidis*, development of a new set of phages as an epidemiological marker in, causing nosocomial infections, 111  
Streptococci, the epidemiology of beta-haemolytic non-Group A, isolated from the throats of children over a one-year period, 119  
Subacute sclerosing panencephalitis, high incidence of, in South India, 151
- Vesicular stomatitis, trajectory analysis of winds and, in North America, 1982–5, 313
- Water, bacterial contamination of weaning foods and drinking, in rural Bangladesh, 79  
Weaning, bacterial contamination of, foods and drinking water in rural Bangladesh, 79
- Yersinia*, the source of, spp. associated with consumption of pasteurized milk, 345  
*Yersinia*, the source of, spp. in pasteurized milk: an investigation at a dairy, 351
