

Clay Minerals

VOLUME 8 • NUMBER 1 • JULY 1969

CONTENTS

G. PRUDEN and H. G. C. KING. A scheme of semi-micro analysis for the major elements in clay minerals, based on modifications to conventional methods of silicate analysis	1
C. D. CURTIS, P. E. BROWN and V. A. SOMOGYI. A naturally occurring sodium vermiculite from Unst, Shetland	15
B. SCOTT and T. G. CARRUTHERS. Hydrothermal reactions and crystallographic relationship found during the reactive hot pressing of kaolinites	21
M. J. PURTON and R. F. YOUELL. An X-ray investigation of some argillaceous rocks from the Skipton anticline, Yorkshire	29
J. L. PEREZ-RODRIGUEZ and M. J. WILSON. Effects of pretreatment on a 14 Å swelling mineral from Gartly, Aberdeenshire	39
G. HALMA. A simple and rapid method to obtain a linear density gradient	47
G. HALMA. The separation of clay mineral fractions with linear heavy liquid density gradient columns	59
R. SCHOONHEYDT and JAN B. UYTTERHOEVEN. Electrical conductivity study on synthetic faujasites type X and Y	71
J. D. RUSSELL, W. J. MCHARDY and A. R. FRASER. Imogolite: a unique aluminosilicate	87
Notes	
W. U. MALIK, S. K. SRIVASTAVA and D. GUPTA. Viscosimetric studies on the interaction of surface active compounds with bentonite	101
E. PASSAGLIA. Roggianite, a new silicate material	107
J. A. GARD. An electron microscope and diffraction study of roggianite	112
Book Reviews	115
