Pain and Emotion

Roger Trigg

Is pain a sensation or an emotion? Does it have to be unpleasant? Is it the 'opposite' of pleasure? These are some of the questions Dr Trigg examines from the standpoint of a philosopher. He is primarily concerned to establish that physical pain is a definite kind of sensation which is logically distinct from our normal dislike of it. 42/-

Descartes: Philosophical Letters

Translated and edited by ANTHONY KENNY

Descartes's philosophical correspondence is unique. No philosopher of comparable stature put so much of his philosophy into letters, and almost half the standard edition of his collected works is devoted to correspondence, only a handful of which has been translated into English hitherto. This book contains more than ninety letters translated in whole or in part; virtually all the letters of contemporary philosophical interest are included. 55/-

A History of Islamic Philosophy

BY MAJID FAKHRY

The most detailed historical survey to date of the development of both Islamic philosophy and theology from the seventh century to the present. It is based on an unusually wide acquaintance with the great collections of Arabic manuscripts and books around the world. In this general survey Mr. Fakhry presents comprehensive expositions of the thought and work of all the major philosophers as well as discussions of the legalism, rationalism, and mysticism in Islamic thought, the various interpretations of that thought, the spread of Islam throughout most of the world, and the rise since the nineteenth century of Pan-Islamism.

Studies in Medieval Jewish Philosophy

BY ISRAEL ISAAC EFROS

The first part of this volume presents a comprehensive view of the philosophy of Saadia Gaon, a pioneer in various literary fields who wrote in Arabic about virtually all of the major problems inherited from a syncretism of Greek thought in which Platonic, Aristotelian, and Neo-Platonic strains were intertwined. Later parts of the study seek to show lexicographically how the Tibbon family of translators, together with others who stated their own philosophies in Hebrew, endowed the poetic Hebrew of the Bible with that plastic power to express abstract concepts without which the language could not have revived.

The Career of Philosophy

Volume I: From the Middle Ages to the Enlightenment

Volume II: From the Enlightenment to the Age of Darwin

BY JOHN HERMAN RANDALL, JR.

"Randall certainly has the gift of making the history of philosophy live, of reconstructing its life, as it were, before our eyes. He combines clarity with penetration; and he concentrates on trying to show what the various philosophers were about, what their problems were, and how they dealt with them . . . A remarkable achievement."—*Frederick C. Copleston, The Journal of Philosophy*.

The Elusive Mind

H. D. LEWIS

Maintains that mental processes are of a quite different nature from physical ones and belong to an entity which is elusive in the sense that it can only be known, in the first instance, by each person in his own case in the course of having any kind of experience.

'This is a work for which I at least have hardly anything but unqualified praise . . . I wait for the reactions of Professor Lewis's opponents, who have had things all their way far too long.' E. L. MASCALL, *The Kingsman*.

The Appeal to the Given

JACOB JOSHUA ROSS

A Study in Epistemology

This work attempts to evaluate the appeal to the sensually given, which played an important role in epistemological discussions during the earlier part of the century. While many contemporary philosophers regard this appeal as a mistake, some defend the notion and even make it the foundation of their views regarding perception.

Meaning in the Arts

LOUIS ARNAUD REID

Explores in a new way the crucial problem of aesthetic meaning. The thesis of embodiment (rather than expression) as a key idea is worked and tested out in different arts and in the process, most of the seminal topics of aesthetics are lucidly discussed.

PHILOSOPHICAL BOOKS

Philosophical Books, edited by Professor J. Kemp, was started in 1960 with the object of assisting librarians and individuals in the choice of books in the field of philosophy. Reviews in the professional journals often appear some considerable time after the publication of the book, while reviews in the general weeklies are often inadequate in length and in quality for professional purposes. The aim of *Philosophical Books* is to provide reviews that are both reasonably prompt and of a high professional standard. Reviews are normally between 300 and 1,000 words in length, though they are occasionally longer. The journal appears three times a year, in January, May and October. Paper covered. 36 pp. Subscription 20s. (\$2.40) per year. Single copies 7s.

The Implications of Induction

L. Jonathan Cohen

This book should be of interest to anyone concerned with problems about basic patterns of human reasoning; it presents a theory, which in regard to the logic of evidence combines power and generality, with practical applicability, in a way that no previous one has managed to do. 75s

Fallacies

C. L. Hamblin

Professor Hamblin presents a new approach to a traditional subject neglected by modern writers on logic; tracing the history of logical thought, he restores order out of confusion and broadens the subject of logic into the field of philosophical disputation and the rules that govern it. 55s

The Nature of Intention

J. W. Meiland

The nature of intention is a theme that has greatly occupied philosophers in recent times. It is Professor Meiland's purpose in this book to delineate some of the important characteristics of intentions and to take a first step towards a general theory. 35s

Plato's Thought

G. M. A. Grube

A reprint of a book which has long been unobtainable and which should be welcomed by all who are interested in Platonic philosophy. Eight cardinal points of Plato's philosophy are taken in turn and his treatment of them followed through the whole of his work.

Aquinas

A Collection of Critical Essays

Edited by Anthony Kenny

Readers within the philosophical tradition now dominant in Britain and the United States are more likely to underrate Aquinas than to overrate him. In assembling this anthology, the editor has tried to choose essays by writers whose interests and methods would be intelligible to philosophers brought up in the analytic tradition. The volume is divided into four parts corresponding to the four areas in which Aquinas' philosophical contribution was most significant: informal logic and metaphysics, philosophical theology, philosophy of mind, and moral philosophy.

Language and Being: An Analytic Phenomenology

by *Stephen A. Erickson*

Raising some fundamental philosophical questions that have, in his estimation, been overlooked in the contemporary schism between phenomenology and analysis, Mr. Erickson works toward a *rapprochement* between the two major schools. He analyses some basic problems in Heidegger's *Being and Time* in the light of the earlier and later Wittgenstein—with a respect for an understanding of Heidegger that is rarely found in the Anglo-American tradition in which Erickson works. Using analytic techniques as it does, the book will elucidate Heidegger for many who have found him needlessly obscure. 192 pages 58s

Reflections on the Problem of Relevance

by *Alfred Schutz*

edited, annotated, and with an introduction by *Richard M. Zaner*

This work provides a key to understanding Alfred Schutz's final visions of social reality and the foundations of the social sciences. "This work of Schutz' is of great originality, and carries phenomenological research into the important region of the problematic, thus making a scholarly connection between modern problems and the views of the Middle Academy. Professor Zaner has written admirable notes to the work, and an admirable Introduction."—*John N. Findlay, Clark Professor of Moral Philosophy and Metaphysics, Yale University.* 210 pages 62s

The Route of Parmenides

A Study of Word, Image, and Argument in the Fragments

by *Alexander P. D. Mourelatos*

In his rigorous study of the fragments of Parmenides' hexameter poem, "On Nature", Alexander P. D. Mourelatos combines traditional philological reconstruction with the approaches of literary criticism and philosophical analysis to reveal the coherence and expressive unity of the best preserved, most important and coherent text of Greek philosophy before Plato. 320 pages 113s

Bradley's Metaphysics and the Self

by *Garrett L. Vander Veer*

Mr. Vander Veer has three main objectives: to expose the real intent of Bradley's metaphysical claims through an analysis of his work; to defend some controversial theses of Bradley against both inaccurate and prejudiced criticism; and to show that a viable metaphysical position can be revitalized when both criticized and defended in the light of contemporary tools of analysis and argument. 352 pages 90s

The Therapy of the Word in Classical Antiquity

by *Pedro Lain Entralgo*

edited and translated by *L. J. Rather and John M. Sharp*

This is a study of the curative power of the word (verbal psychotherapy in today's terms) in Homer, in the pre-Socratic philosophers and Sophists, in Plato and the Greek dramatists of the classical period, and in Aristotle. Pedro Lain Entralgo examines the historical origins of an enduring feature of Western medicine—the bias against verbal therapy in favour of somatic therapy. 276 pages 90s
