

THE AERONAUTICAL JOURNAL

Covering all aspects of Aerospace

Volume 115 Number 1173

November 2011

THE AERONAUTICAL JOURNAL

Editor-in-chief: Prof Peter Bearman

Associate Editors

Chairman: Prof Mike Graham

Professor Chris Atkin
City University, London

Professor Holger Babinsky
University of Cambridge

Professor Ken Badcock
University of Liverpool

Professor Rene de Borst
Eindhoven University of Technology

Dr Trevor Birch
DSTL

Wg Cdr Mike Bratby
RAeS Air Power Group

Professor Richard Brown
University of Strathclyde, Glasgow

Professor Jonathan Cooper
University of Liverpool

Mr Anthony Cross
BAE Systems, Warton

Professor Laurent Dala
University of the Witwatersrand, Johannesburg

Professor Glyn Davies
Imperial College, London

Professor Dimitris Drikakis
Cranfield University

Mr Chris Fielding
BAE Systems, Warton

Professor Victor Giurgiutiu
University of South Carolina

Professor Ismet Gursul
University of Bath

Dr John Green
Consultant Chief Scientist, ARA

Professor Keith Hayward
RAeS Head of Research

Professor Michael J de C Henshaw
Loughborough University

Professor Richard Hillier
Imperial College, London

Dr John Loizou
VEGA Space

Professor Ken Morgan
Swansea University

Dr Ravi Nayak
National Aerospace Laboratories, India

Professor Gareth Padfield
University of Liverpool

Professor Shahrokh Shahpar
Rolls-Royce

Dr Howard Smith
Cranfield University

Professor Marilyn Smith
Georgia Institute of Technology

Professor Constantinos Soutis
University of Sheffield

Professor John Stollery
Cranfield University

Professor Anthony Waas
University of Michigan

Aims and scope

The aims and scope of *The Aeronautical Journal* are intended to reflect the objectives of the Royal Aeronautical Society as expressed in its Charter of Incorporation. Briefly, these are to encourage and foster the advancement of all aspects of aeronautical and space science. Thus the topics of *The Aeronautical Journal* include most of those covered by the various Specialist Groups of the Society, which include:

Aircraft design, aerodynamics, air law, air power, air transport, air navigation, airworthiness and maintenance, aviation medicine, avionics and systems, environmental issues, flight operations, flight simulation, fluid dynamics, fluid mechanics, general aviation, guided flight, human factors, human powered flight, light aviation, management studies, propulsion, rotorcraft, safety, space, structures and materials, structural mechanics, systems and test procedures and UAVs.

Papers are therefore solicited on all aspects of research, design and development, construction and operation of aircraft and space vehicles. Papers are also welcomed which review, comprehensively, the results of recent research developments in any of the above topics.

We recognise the inhibiting pressures of time and confidentiality and acknowledge that many of the design testing, manufacturing and operational problems that industry has to solve contain important information for the whole aerospace community. *The Aeronautical Journal* provides a platform for refereeing and presenting your work to an international audience.

Papers will be considered for publication in *The Aeronautical Journal* if they meet the terms and conditions listed in The Instructions for authors. If these are not met, the Editor reserves the right to withdraw the paper without redress, which may be at any time up to publication.

Papers should be sent to: Prof Peter Bearman, Royal Aeronautical Society, No. 4 Hamilton Place, London W1J 7BQ, United Kingdom or wayne.davis@aerosociety.com

Subscriptions

Non-members

Annual subscription (12 issues) £399, Single copies, including back issues £36; *Non-member subscription orders are available from*; Royal Aeronautical Society, Publications Subscriptions Department, Dovetail Services Ltd, 800 Guillat Avenue, Kent Science Park, Sittingbourne, Kent ME9 8GU, UK.

Tel: +44 (0)844 848 8426, Fax: +44 (0)844 856 0650, email: ras@servicehelpline.co.uk

RAeS members

Annual subscription (12 issues) £69, Single copies, including back issues £6; *member subscription orders are available from*; Membership Department, Royal Aeronautical Society, No. 4 Hamilton Place, London W1J 7BQ, UK. Tel: +44 (0)20 7670 4300, Fax: +44 (0)20 7670 4309, email: membership@aerosociety.com

RAeS Conference Proceedings

Details, price and availability of Royal Aeronautical Society Conference Proceedings can be obtained from; RAeS Conference and Events Department, No. 4 Hamilton Place, London W1J 7BQ, UK. Tel: +44 (0)20 7670 4300, email: conference@aerosociety.com or via www.aerosociety.com/proceedings

All papers are available to view free of charge for subscribers and to purchase by others at: www.aerosociety.com

THE AERONAUTICAL JOURNAL

Instructions for authors

CORRESPONDING AUTHORS

The author willing to handle correspondence at all stages of refereeing, production and post-production stages should be indicated clearly on the covering letter. Their full name, full postal address, telephone and fax numbers should be included with their e-mail address.

PREPARATION OF PAPERS

General

Initial submissions must comprise a PDF, MS Word or LaTeX file including figures. These must be sent to the Editor either by email or posted disc. E-mail and postal addresses for submissions can be found at the bottom of this sheet. The accompanying letter must include a request for publication and state that the paper has not been published previously or submitted for publication elsewhere. The author is invited to suggest three appropriate referees and a suitable Associate Editor to handle the submitted manuscript.

The receipt of papers will be acknowledged by return, with a copy of these conditions and a reference number which should be used in all correspondence.

The RAeS awards *The Young Persons' Written Paper Prize* for the best paper produced by author(s) aged under 30, if you wish to be considered for this prize then please indicate this when you submit your paper.

Prior to submission, manuscripts should be read critically by a third party who is familiar with the subject area and has a good grasp of the English language, if the paper originates from non-English speaking author(s). Authors must also obtain permission where necessary to use any material in a paper which is copyright or the property of any other persons or entity, including their employers. Any fees incurred are the sole responsibility of the author(s). The paper will also be published on the Internet. *The Aeronautical Journal* is marketed and sold internationally.

There exists the option of having papers published in colour in the paper version. This can be carried out for a fee agreed and invoiced before publication. All papers appear in colour on the RAeS website.

Figures

All figures must be provided by the author(s) and must be included with the initial manuscript. Hand drawings should be avoided. Drawings considered unsuitable for publication will be returned with a request for them to be resupplied electronically. All figures should be numbered and given captions. References to figures in the text should be referred to as; Fig. 1, Figs 2 and 3 or Figure 1 if at the start of a sentence.

Photographs should be provided electronically and be scanned at 300dpi. Graphs, tables, charts etc. should be at least 150dpi. Figures and photos are accepted in the following formats: JPEG, TIFF and EPS.

STYLE GUIDELINES

Papers must be in English and should comply with the structural guidelines below and should preferably not exceed 10,000 words. The following is the recommended generic format:

Title: The title should be kept short and concise.

Authors' names and affiliations: Names should be presented in the order they should appear on the published paper. Each author's organisation to which they are associated should be included with accompanying address, please note this will be published along with authors' email addresses.

Abstract: An abstract of around 150 words which summarises the paper and contains no references.

Nomenclature: A list of all symbols and abbreviations used in the text and figures, whether familiar or not, should be given in alphabetical order with, for example, c before C and all English letters listed before Greek symbols. Subscripts and superscripts should be listed separately where possible. SI units should be used throughout.

Introduction: Discuss the *raison d'être* of the work, including previous work by others and how the work presented aims to advance or complement this.

Equations: Equations must be numbered in brackets (...1). Each equation should be produced electronically in *WORD* preferably using Equation

Manager or Mathtype. Variables should be in italics. Constants should be in plain text. Vectors and matrices should be in plain text but bold. Cos, Sin, Tan should begin in capitals and be in plain text.

Conclusions: This section should be very concise and bullet points are recommended for clarity. The degree to which the aims have been achieved should be portrayed clearly to the reader. Suggestions for future work or comments on work in progress are encouraged.

References: References should be numbered sequentially in the text as they occur and placed at the end of the manuscript. For example, most commonly for papers⁽¹⁾ and reports⁽²⁾. They should be presented as follows:

1. Miller, P and Wilson, M. Wall jets created by single and twin high pressure jet impingement, *Aeronaut J*, March 1993, **97**, (963), pp 87-100.
2. Green, J.E., Weeks, D.J. and Brooman, J.W.F. Prediction of turbulent boundary layers and wakes in compressible flow, ARC R&M No 3791, 1979. and for books⁽³⁾
3. King-Hele, D. *Satellite Orbits in an Atmosphere*, Blackie, Glasgow, 1987.

Appendices: If no suitable reference is available appendices may be used to clarify certain points, such as a step in the theoretical analysis.

Tables: Tables should have a number and a caption. Each table should be cited in numerical order in the text.

TECHNICAL NOTES

These can be up to 2,000 words in length and have no set form. They can be abstracts, comments upon unpublished papers, notes on interim results or a call for further research. They do not have to contain figures or nomenclature and may be in the form of a letter. Manuscripts submitted in this category tend to be reviewed and published more quickly than a full paper.

THE REFEREEING PROCESS

A minimum of two referees are used for a paper and it is requested that authors suggest the names and addresses of three possible independent referees to review their paper although the Editor reserves the right not to use them. One copy of the manuscript is sent to each referee with a request for a thorough review.

Once both referees have replied, their comments are sent to the authors and if changes are recommended they are invited to revise the paper as suggested. It is helpful if a list of those changes included by the author is provided with the revised version.

Unless a paper has been accepted 'as is' by both referees, a revised manuscript will be sent once more to the referees. If the Editor feels, having considered the second reviews, that the authors have not responded adequately to the original reviews of the referees, then the paper will be rejected. Thus it is imperative that all comments are addressed properly by authors. A third referee may be approached if the Editor thinks this is appropriate. The Editor ultimately reserves the right to reject a paper on grounds of quality or lack of co-operation from authors.

Acceptance

Once a paper is accepted, the authors will be invited to send the approved version of the text on CD-ROM or by e-mail. The preferred text format is Microsoft Word with separate individual electronic graphic files (JPEG, EPS or TIFF files at 300dpi minimum) for any figures used. Latex files are also accepted. The positions of each equation should be indicated in the text.

Following acceptance

Approximately one month before publication, authors are sent page proofs for checking and should keep this in mind if likely to be away during this time. Authors should expect just a single set of proofs to be sent to them for checking. The Editor of *The Aeronautical Journal* reserves the right to publish a paper after just one set of corrections.

CONDITIONS OF PUBLICATION

Unless specifically attributed, no material in *The Aeronautical Journal* shall be taken to represent the opinion of the RAeS and its Council. Copyright lies with the publisher on publication.

Papers should be sent to:

The Editor-in-Chief, Royal Aeronautical Society, 4 Hamilton Place, London W1J 7BQ, UK or wayne.davis@aerosociety.com

The Aeronautical Journal does not charge authors for publication of papers
