

Parasitology

Edited by

D. W. T. CROMPTON

Lecturer in Parasitology, University of Cambridge

B. A. NEWTON

*Director of the Medical Research Council Unit for Biochemical Parasitology and
Head of the Department of Parasitology, University of Cambridge*

Parasitology publishes original results from pure and applied studies of parasites and host-parasite relationships.

In addition to papers describing the taxonomy, life cycles and ecology of parasites, the journal includes reports of experimental work on biochemical, immunological and physiological aspects of parasitism and on the chemotherapy of parasitic diseases. Brief book notices are also published.

With effect from Volume 80, Parasitology regularly publishes articles in which Trends and Perspectives in parasitology are discussed. These titles are intended

- 1 To focus attention on developing and growing topics in parasitology.
- 2 To identify new and old problems in need of research.
- 3 To explain how results from one area of biology might have some bearing on current studies in parasitology.
- 4 To present teachers and students with concise summaries of recent discoveries and new theories.

Current Issues

Volume 82: February, April and June 1981

Volume 83: August, October and December 1981

**Subscription: Volume 82 £43.00, Volume 83 £32.00 and £75.00 per year
Single parts: £12.00 (postage extra)**

Orders may be sent to any bookseller, subscription agent or direct,
with payment, to

CAMBRIDGE UNIVERSITY PRESS
