- 6) Page 49 photo of President Clinton addressing the U.N. General Assembly, September 27, 1993/THE WHITE HOUSE.

The FOREIGN POLICY BULLETIN is an educational reference periodical published bimonthly by Mediacom, Inc., a private, public service corporation. Its purpose is to make available a timely and systematic record of U.S. foreign policy and of important, relevant documents from international sources as well. Each issue is indexed and there is an annual index at the end of each volume. While using the same format as the discontinued "Department of State Bulletin" and maintaining continuity with that publication, the BULLETIN's coverage is broader and more thorough than any State Department publication could be. In addition to major addresses, statements, and other public reports and remarks of the President, the Secretary of State, and Administration officials in all executive departments, the BULLETIN includes selected statements by Members of Congress and expert testimony before congressional committees; reports and other materials from international organizations; speeches and other statements by foreign and international officials; summaries of treaties and other agreements to which the United States is or may become a party; and other information of particular interest to the conduct and study of U.S. foreign relations. The BULLETIN is not affiliated with the government and thus has complete editorial autonomy.

Most of the contents of this publication are official documents. The compilation of these materials is copyrighted and permission must be obtained to reproduce or reprint numerous pages or entire sections of an issue. Individual documents are in the public domain and may be reprinted; citation of the FOREIGN POLICY BULLETIN is appreciated. Permission to reproduce copyrighted materials from other sources (including photographs) must be obtained from the original source.

INDEXING: Included in the PAIS (Public Affairs Information Service) indexes: the PAIS Bulletin, PAIS on CD-ROM, and online through Dialog, BRS, and Data-Star.
