

THE CLIMATE OF THE CONTINENT OF AFRICA

BY ALEXANDER KNOX, B.A. (CANTAB.), F.R.G.S.

Royal 8vo. With 13 maps and a diagram

Price 21s. net

"Such a work as this has not only become highly necessary, but should be in great demand amongst Governments, mining and commercial companies trading in Africa, missionary societies, and all individuals who intend to visit Africa for any length of time, or to settle in any part of that continent for purposes of health, science, education, or commercial gain.... The maps contributed to this book by Mr J. G. Bartholomew under the direction of the author are admirable, and great praise must be awarded to the author for his general research, the clearness with which he sets forth his details and his conclusions, and the way in which he has invested what might seem to be a somewhat uninteresting subject with an interest and an importance sufficient to attract the general reader as well as the specialist. The book...should prove a standard work."—Sir H. H. JOHNSTON in *Nature*

"Mr Knox has done great service in compiling from a great number of sources the data for his book on the climate of Africa....The book is written concisely, but with admirable clearness, and adequate statistics are given. Thanks to the immense industry of Mr Knox those who are interested in the social or economic development of Africa or intending settlers or travellers are now in a position to understand the climatic conditions of any part of the continent.... A word of praise is due for the beautifully-executed maps which illustrate the mean annual rainfall and the mean rainfall for each month."—Dr A. C. HADDON in the *Morning Post*

OBSERVATIONS UPON THE NATURAL HISTORY OF EPIDEMIC DIARRHOEA

By O. H. PETERS, M.D., D.P.H.

Royal 8vo. Price 7s. net

This treatise, here reprinted from the *Journal of Hygiene* (Vol. X), embodies both the practical observations made at Mansfield, and also the results of previous theoretical inquiry into the phenomena of the epidemic curve, representing three years of close research.

“Dr Peters has done his work in a thoroughly scientific manner....It is a valuable addition to the literature of a subject which yearly demands a toll of many thousand lives.”—*Athenaeum*

“Dr Peters gives an exhaustive account of the conditions relating to the disease, and examines the various theories as to its causation and spread....This monograph is a thoughtful and valuable contribution to the literature of a devastating disease, and deserves careful consideration by all who are concerned in its study.”—*Lancet*

“Deserves and will receive close study from all interested in this important problem of public health.”—*British Medical Journal*

“The book bears obvious evidence of the thoroughness and intensity of effort with which the statistics were collected, and the minute records as well as the very elaborate analyses which accompany them deserve careful consideration and study, and are a valuable contribution to our knowledge of the aetiology of epidemic diarrhoea.”—*Medical Officer*

PARASITOLOGY

Edited by GEORGE H. F. NUTTALL, F.R.S., Quick Professor of Biology in the University of Cambridge, and A. E. SHIPLEY, F.R.S., Reader in Zoology, Cambridge, assisted by EDWARD HINDLE, PH.D.

PARASITOLOGY is published about four times a year. The numbers are afterwards issued in volumes each containing four numbers and amounting to between 400 and 500 pages, with plates and figures.

Volumes I, II, III and IV (1908–11) are now ready. In four parts, paper covers, 21s. net per volume. Bound in buckram, 25s. net per volume.

In view of the desirability of keeping the standard of the articles and illustrations published in *Parasitology* at its present level, the publishers have decided that it is necessary to raise the subscription price from £1. 1s. 0d. to £1. 10s. 0d. per volume, post free, from the first number of Volume V. The price of the single parts will, in future, be 10s. each.

Subscribers to the *Journal of Hygiene* may obtain single numbers of *Parasitology* at the reduced price of 7s. 6d. net, or may become subscribers at the reduced rate of £1. 1s. 0d. per volume.

The publishers believe that they will retain the support of all present subscribers to the *Journal* in their endeavours to maintain it under similar conditions as to its contents to those which have prevailed in the case of Volumes I–IV.

Subscriptions may be sent to any Bookseller, or to Mr C. F. CLAY, MANAGER, Cambridge University Press, Fetter Lane, E.C. A Prospectus will be sent on application.

CONTENTS

(All rights reserved)

	PAGE
CORNWALL, J. W. On the Mean Lytic Point of Red Blood Corpuscles and the Apparent Tonicity of Sheep Serum. (With 5 Charts)	245
DEAN, H. R. On the Mechanism of Complement Fixation	259
COX, G. LISSANT, LEWIS, FREDERICK C. and GLYNN, ERNEST E. The Number and Varieties of Bacteria Carried by the Common House-fly in Sanitary and Insanitary City Areas. (With Plate V and 2 Charts)	290
LEDINGHAM, J. C. G. The Mechanism of Phagocytosis from the Adsorption Point of View. (With 22 Charts)	320
HORT, E. C. and PENFOLD, W. J. Microorganisms and their Relation to Fever. (Preliminary Communication.) (With 27 Charts)	361

The Journal of Hygiene is issued as material accumulates. A volume containing about 500 pages, with plates and figures, is issued annually.

Volumes I, II, and III (1901-3) complete. In Four Parts, paper covers, 15s. net per volume. Bound in buckram, 18s. 6d. net per volume.

Volumes IV, V, VI, VII, VIII, IX, X and XI (1904-11) complete. In Parts, paper covers, 21s. net per volume. Bound in buckram, 25s. net per volume.

Papers for publication may be sent to Prof. GEO. H. F. NUTTALL, F.R.S., 3 Cranmer Road, Cambridge, or to the associate Editors. Other communications should be addressed to the University Press, Cambridge.

Papers forwarded to the Editors for publication are understood to be offered to the *Journal of Hygiene* alone, unless the contrary is stated.

Contributors receive seventy-five copies of their papers free. Additional copies may be had at cost price: these should be ordered when the final proof is returned.

The subscription price is £1. 1s. per volume (post-free), payable in advance; single numbers 7s. net. Subscriptions may be sent to any Bookseller, or to MR C. F. CLAY, MANAGER, Cambridge University Press, Fetter Lane, London, E.C.

Plague Numbers, Vol. VI. no. 4 (not sold separately), Vol. VII. nos. 3 and 6, and Vol. VIII. no. 2, Vol. X. no. 3, Price 6s. net each. Bound volumes containing all five numbers, with Index, are also issued, price 20s. net.

A new series of Plague Supplements is now being issued; the first of these, which is now ready, contains the Sixth Report on Plague Investigations in India. They will be, in pagination, completely independent of the Journal although subscribers to the latter will receive copies without extra cost. Price to non-subscribers 7s. net.
