THE NATIONAL INSTITUTE OF ECONOMIC AND SOCIAL RESEARCH

This Review is intended to be of service to those, in business and elsewhere, who need to take a view of the general economic situation and prospects. The workings of the economy are not fully understood; and even if they were economic prediction would remain hazardous because of the impact of political events and technological developments. Nevertheless the Institute believes that a group of economists, presenting a comprehensive account of current economic developments and a coherent view of likely trends, can perform a useful service.

Acknowledgements

The Institute gratefully acknowledges a grant from the Economic and Social Research Council for research in applied macroeconomics and modelbuilding and also the contributions from British companies and banks for support of the Institute's research. Subscriptions to the Review cover the costs of production and distribution only.

The Institute is also grateful to many people in industry for giving the authors the benefit of their knowledge and experience, and to officials in government departments who have assisted with advice in the interpretation of official statistics.

Authorship

The opening chapters of the Review are prepared by members of the research staff. The Editorial Board takes responsibility for the content of these chapters and for the views expressed in the Appraisal.

The views expressed in signed special articles are those of the authors.
