Contents

Preface	xiii
Acknowledgements	xv
List of Participants	xvii
Large Scale Structure	
D.P. COX	
Characteristics of the diffuse interstellar medium	3
J. BALLY, W.D. LANGER, R.W. WILSON, A.A. STARK and M.W. POUND	
On the structure and kinematics of molecular clouds from large scale mapping of mm-lines	11
T.G. SITNIK	
Observational manifestations of sequential star formation in giant star- gas complexes of the Galaxy	21
L. BRONFMAN, J. MAY, L.A. NYMAN and P. THADDEUS	
A CS survey of massive stars embedded in molecular clouds	25
R. STARK	
Diffuse molecular clouds at high galactic latitude	29
G. JONCAS	
The atomic hydrogen/molecular cloud association: an unavoidable rela- tionship	37
Velocity Field and Magnetic Field	
C. HEILES, A.A. GOODMAN, C.F. McKEE and E.G. ZWEIBEL	
Magnetic fields in dense regions	43
R.M. CRUTCHER	
Structure in the gas and magnetic field in S106	61
A.L. LAZARIAN	
The investigation of the hierarchical structure of the interstellar magnetic fields	65
T. NAKANO	
Loss of magnetic flux and angular momentum from molecular clouds . . .	67
J.L. PUGET	
Magnetic fields and the dynamics of molecular clouds	75
R.N. HENRIKSEN	
Turbulence and magnetic fields in molecular clouds	83

S.S. PRASAD	
Dynamical conditions of dense clumps in dark clouds: a strategy for elucidation	93
A. POUQUET, T. PASSOT and J. LEORAT	
Numerical simulations of turbulent compressible flows	101
E. FALGARONE and T.G. PHILLIPS	
Signatures of turbulence in the dense interstellar medium	119
Chemistry	
J.H. BLACK and E.F. VAN DISHOECK	
Chemistry and small-scale structure of diffuse and translucent clouds . .	139
F. BOULANGER	
Variations in the abundance of small particles	151
M. WALMSLEY	
Physical and chemical parameters in dense cores	161
P.F. GOLDSMITH	
Abundance variations of tracers and their effects on our determination of molecular cloud structure	177
Shocks and Instabilities	
B.T. DRAINE	
Magneto-Hydrodynamic shock waves in molecular clouds	185
J.P. CHIEZE and C. DE BOISANGER	
Thermal processes in molecular gas	197
B.G. ELMEGREEN	
On the origin of broad line wings in molecular cloud spectra	205
V.V. BURDYUZHA	
The development of modes of thermal instability in a non-stationary medium	211
M. FUJIMOTO and Y. TATEMATSU	
Large-scale fragmentation of gas cloud rotating at the Galactic center .	215
Small Scale Structure	
P.C. MYERS	
Clouds, cores and stars in the nearest molecular complexes	221
A. WOOTTEN	
Dense core structure and fragmentation in the Rho Ophiuchi molecular cloud	229
J. STUTZKI, R. GENZEL, U. GRAF, A.I. HARRIS, A. STERNBERG and R. GÜSTEN	
UV penetrated clumpy molecular cloud cores	235

P.G. MEZGER, A. SIEVERS and R. ZYLKA Dust emission from star forming clouds: a progress report	245
---	-----

Star Formation

R.B. LARSON Some processes influencing the stellar initial mass function	261
Y. FUKUI and A. MIZUNO A comparative study of star formation efficiencies in nearby molecular cloud complexes	275
K-W. HODAPP, J. RAYNER and H. CHEN Luminosity function, star density and star formation efficiency in regions of star formation	289
N.J. EVANS II and E.A. LADA Star formation in three nearby molecular cloud complexes	293
R.E. PUDRITZ and A.I. GOMEZ DE CASTRO Wave dynamics and star formation in Taurus	317

Early Stages of Stellar Evolution

F. PALLA Theoretical and observational aspects of young stars of intermediate mass	331
S. TEREBEY, C.A. BEICHMAN, T.N. GAUTIER, J.J. HESTER, P.C. MYERS and S.N. VOGEL A survey of circumstellar structure around young low mass stars	345
N. OHASHI, R. KAWABE, M. HAYASHI and M. ISHIGURO Aperture synthesis CS and 98 GHz continuum observations of protostel- lar IRAS sources in Taurus	353
Y. MURATA, R. KAWABE, M. ISHIGURO, T. HASEGAWA and M. HAYASHI Aperture synthesis observations of Orion-KL in CS lines and 3 mm con- tinuum	357
J. KEENE and C.R. MASSON A 45 AU radius source around L1551-IRS5: a possible accretion disk . . .	361
M.D. SMITH, P.W.J.L. BRAND and A. MOORHOUSE Strong magnetic fields in bipolar outflows	373

Symposium summary (by A.E. GLASSGOLD)	379
--	------------

Poster Sessions

R. BACHILLER, J. CERNICHARO, J. MARTIN-PINTADO, M. TAFALLA and B. LAZAREFF	
High-velocity molecular bullets in bipolar outflows: L1448 and HH7-11	389
F. BERTOLDI, C.F. McKEE and R.I. KLEIN	
The effects of ionizing radiation on star formation in molecular clouds .	391
P. BOISSE	
Transfer of continuum UV radiation inside fragmented clouds	394
P. CHANTRY, R. GRAPPIN and J. LEORAT	
Do random velocity fields inhibit or induce gravitational collapse and fragmentation ?	396
F.O. CLARK, T. PRUSTI and R.J. LAUREIJS	
Fragmentation in molecular clouds	398
B.M. DEISS, A. JUST and W.H. KEGEL	
Velocity correlations in turbulent molecular clouds	400
A.E. DUDOROV	
MHD instabilities and fragmentation of molecular clouds	402
A. DUTREY, A. CASTETS, G. DUVERT, J. BALLY, W.D. LANGER and R.W. WILSON	
A multi-transition and multi-isotope study of CO in the giant molecular cloud Orion-A	405
R.C. FLECK, Jr.	
Processes controlling the initial mass function: interstellar turbulence and magnetic fields	407
A. FUENTE, J. MARTIN-PINTADO, J. CERNICHARO, N. BROUILLET and G. DUVERT	
Effects of the UV radiation on the surrounding gas and dust	409
S.K. GHOSH, T.N. RENGARAJAN and R.P. VERMA	
High resolution infrared maps of IRAS galaxies	411
K.M. GIERENS	
Interpretation of low J ¹² CO and ¹³ CO observations of Orion A by means of an onion-shell radiative transfer model	413
A.I. GOMEZ DE CASTRO and R.E. PUDRITZ	
Global properties of star formation in Taurus	415
A.A. GOODMAN, P.C. MYERS and P. BASTIEN	
Polarization of background starlight and the structure of the interstellar magnetic field	417
U.U. GRAF, R. GENZEL, A.I. HARRIS, R.E. HILLS, A.P.G. RUSSELL and J. STUTZKI	

First detection of 661 GHz ^{13}CO J=6-5: large amounts of warm molecular gas	424
J.C. GREGORIO HETEM, J.R.D. LEPINE and R. ORTIZ	
The mass distribution of the young stellar population in Chamaeleon I and in Rho Ophiuchus	427
R. GÜSTEN, A. SCHULZ and E. SERABYN	
Dense cloud cores	430
A. HABE and K. OHTA	
Gravitational instability induced by collisions between non-identical clouds	432
L.K. HAIKALA and H. WEIKARD	
CO multitransition observations of L 1228: A molecular outflow destructing its parent cloud ?	434
J. HARJU, M. WALMSLEY and J.G.A. WOUTERLOOT	
Ammonia clumps in the Orion and Cepheus clouds	436
E. KETO	
Observational constraints on angular momentum transfer during gravitational collapse	438
V.K. KHERSONSKII and N.V. VOSHCHINNIKOV	
Megamasers as probes of galaxy mass spectrum evolution	440
M. KIGUCHI, S. NARITA, T. TERASAWA and C. HAYASHI	
Magnetic fields in the Solar Nebula and the angular momentum transfer	441
C. KOEMPE, G. JONCAS, J.G.A. WOUTERLOOT	
and H. MEYERDIERKS	
Physical conditions of star forming sites in the S247/252 molecular complex	443
I.G. KOLESNIK and Y.YU. OHUL'CHANSKY	
Hierarchical fragmented structure of molecular clouds produced by supersonic turbulence	445
W. KUNDT	
The bipolar flow phenomenon	447
J. LATTANZIO, E. KETO and J. MONAGHAN	
A hydrodynamical model for the fragmentation of the W49A star-forming region	449
J.R.D. LEPINE	
CO line broadening by saturation effect in molecular clouds	451
T. LILJESTRÖM	
The high latitude cloud Lynds 1642 is not breaking up	454
J. MARTIN-PINTADO, A. RODRIGUEZ-FRANCO	
and R. BACHILLER	
Large scale interaction of the outflow and quiescent gas in Orion	456

R. MAUERSBERGER, C. HENKEL and L.J. SAGE Physical parameters in extragalactic star forming regions	458
R. MAUERSBERGER, A. SCHULZ, J.W.M. BAARS and H. STEPPE An 8" resolution CO (J=3-2) map of IC 342	460
A. MIZUNO, S. NOZAWA, T. IWATA and Y. FUKUI A large scale survey of dense cores and molecular outflows in Ophiuchus	462
J. MONAGHAN and J. LATTANZIO A hydrodynamical study of fragmenting gas clouds	464
S.M. MOY, G.H. MACDONALD and R.J. HABING New Sample of Young Stellar Objects	466
C.R. O'DELL Comparison of turbulence in HII regions and molecular clouds	476
N.D. PARKER and G.J. WHITE Fragmentary structure in the L1551 molecular outflow	480
M.I. PASHCHENKO, E.E. LEKHT, I.I. BERULIS and R.L. SOROCHENKO Observations of variability of H ₂ O Maser sources associated with star formation regions	482
S. PINNOCK and T.S. MONTEIRO A model of the distribution of ionised carbon in M17SW	485
G.M. RUDNITSKIJ Estimates of magnetic fields in interstellar gas clouds from 18-cm OH satellite lines	487
P. SCHILKE and M. WALMSLEY ¹⁵ NH ₃ millimasers toward NGC 7538-IRS1	489
J. SCHMID-BURGK, R. GÜSTEN, R. MAUERSBERGER, A. SCHULZ and T.L. WILSON A very straight and collimated outflow in the core of OMC-1	491
E. SERABYN and R. GÜSTEN Density and kinematics of the W49A cloud core	494
L.G. STENHOLM Synthetic linemaps for hierarchical clouds	496
K. SUGITANI, Y. FUKUI and K. OGURA Bright-rimmed clouds with IRAS point sources: candidates for star for- mation by radiation-driven implosion	498
K. SUNADA, T. HASEGAWA, M. HAYASHI, Y. FUKUI and K. SUGITANI Density structure of dense cores in the Cepheus molecular cloud	500
K. SUNADA, Y. KITAMURA, T. HASEGAWA and M. HAYASHI Turbulence in TMC1-C and Rho Oph core	502
J.A. TAUBER and P.F. GOLDSMITH	

Radiative transfer of CO through clumpy molecular clouds with external UV heating	504
S. VEERARAGHAVAN and G.A. FULLER	
Characterisation of spatial structure in molecular clouds	505
M.G.R. VOGELAAR, B.P. WAKKER and U.J. SCHWARZ	
Measuring the fractal structure of interstellar clouds	508
D. WARD-THOMPSON and E.I. ROBSON	
The W75–Cygnus-X IRAS loop: OB “Bubble” or SNR?	511
H. WEIKARD, K. SUGITANI, G. DUVERT and M. MILLER	
An extensive study of interstellar matter in the IC 1396 region using several molecular lines and transitions of CO and far-infrared maps from IRAS	513
A. WHITWORTH	
Gravitational virialization of molecular cloud fragments	515
A. WHITWORTH	
Turbulent amplification of interstellar magnetic fields	519
A. WHITWORTH and H. PONGRACIC	
Cloud-Cloud collisions and fragmentation	523
H. ZINNECKER	
A binary star formation mechanism through the fragmentation of prolate dense cores rotating end over end	526
COLOR-PLATES	529
INDICES	533
