

Recent Entomology Books from CAB International

Insect Pest Management

David Dent, University of Wales College of Cardiff

This major new textbook is aimed at advanced undergraduate and graduate students taking courses in applied entomology or crop protection. It covers all methods of assessment and control, with examples from both temperate and tropical regions.

October 1991 600 pages

ISBN 0 85198 666 8 Hardback / 0 85198 667 6 Paperback

Price: £50.00 (US\$95.00 Americas only) Hardback
£24.50 (US\$46.50 Americas only) Paperback

The Behaviour and Physiology of Bees

Edited by L. J. Goodman, Queen Mary and Westfield College, and R. C. Fisher, University College, London, for the Royal Entomological Society of London and the International Bee Research Association

Written by leading authorities from Europe and the USA, this book covers four themes: the environment within the hive; communication and foraging; vision and olfaction; and learning.

October 1991 326 pages Hardback

ISBN 0 85198 721 4

Price: £49.50 (US\$94.00 Americas only)

Handbook for the Identification of Leafhoppers and Planthoppers of Rice

M. R. Wilson, International Institute of Entomology, and M. F. Claridge, University of Wales College of Cardiff

Provides descriptions and keys to over 70 leafhopper and planthopper species recorded in the major rice growing regions. Includes four pages of colour plates.

June 1991 142 pages Paperback

ISBN 0 85198 692 7

Price: £30.00 (US\$57.00 Americas only)

Published by C.A.B International and available from any of the following addresses:

Pest Management: A Directory of Information Sources Volume 1: Crop Protection

C. J. Hamilton, CAB International Library Services

The first of a series of three guides covering both bibliographic and non-bibliographic sources of information on pest management.

September 1991 331 pages Hardback

ISBN 0 85198 657 7

Price: £29.50 (US\$56.00 Americas only)

IIE Guides to Insects of Importance to Man 3: Coleoptera

R. G. Booth, M. L. Cox and R. B. Madge, International Institute of Entomology

A comprehensive textbook providing descriptions of the major families of the Coleoptera, particularly those of importance as pests or beneficial insects. Includes over 1000 drawings and an identification key.

December 1990 384 pages Spiral bound

ISBN 0 85198 678 1

Price: £25.00 (US\$47.50 Americas only)

Leafhoppers (Cicadellidae): A Bibliography, Generic Check-list and Index to the World Literature, 1956-1985

P. W. Oman, Oregon State University, W. J. Knight, The Natural History Museum (London), and M. W. Nielson, Brigham Young University

August 1990 384 pages Hardback (A4 format)

ISBN 0 85198 690 0

Price: £49.50 (US\$94.00 Americas only)

NOTES FOR AUTHORS

The *Bulletin of Entomological Research* publishes original research papers concerning insects, mites, ticks or other arthropods of economic importance in agriculture, forestry, stored products, biological control, medicine, animal health and natural resource management. The geographical scope of the *Bulletin* is worldwide but with emphasis on the tropics. Taxonomic papers are accepted if relevant. Short review papers, although normally by invitation, will also be considered for publication.

Page Format. The *Bulletin* is printed in a two-column format (column width of 80 mm) with a text area of 170×225 mm.

Text. Papers should be typed, on one side of the paper only, with double line spacing and ample margins (at least 1.5 cm) on each side and with no underlining or bold in text except for scientific names. Draft quality print from a word-processor is not acceptable. Standard abbreviations (e.g. fig. and figs) and metric units must be used. Guidelines for taxonomic papers are available.

When the paper has been accepted word-processed text stored on floppy disk is encouraged, providing the software is IBM/DOS compatible, but floppy discs must be accompanied by a hard copy. This will enable papers to be handled rapidly, and with fewer type-setting errors.

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words. A short title should be provided as a running head.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the article and must fit conveniently into single column, full width or landscape (if absolutely necessary) format. Table captions should be typed on a separate sheet.

Illustrations. Copies only of artwork should be submitted. The original illustrations should accompany the paper after acceptance and revision. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they are a real contribution to the text. Figure and captions should be typed on a separate sheet in

the following format:

Figs 23–26. Figs 23–24, *Urophora* eggs: 23, *U. hispanica*; 24, *U. stigma*. Figs 25–26, spermathecae: 25, *U. maura*; 26, *U. stigma*; scale lines = 0.05 mm.

Voucher specimens. The deposition of voucher specimens should be considered where appropriate.

References. References must be based on the name and year system, give full journal titles and conform to the following styles:

Powell, W. (1986) Enhancing parasitoid activity in crops. pp. 319–340 in Waage, J. & Greathead, D. (Eds) *Insect parasitoids*. London, Academic Press (Symposium, Royal Entomological Society of London No. 13).

Southwood, T.R.E. (1978) *Ecological methods with particular reference to the study of insect populations*. 2nd edn. 524 pp. London, Chapman & Hall.

Zhou, X., Carter, N. & Mumford, J. (1989) A simulation model describing the population dynamics and damage potential of the rose grain aphid, *Metopolophium dirhodum* (Walker) (Hemiptera: Aphididae), in the UK. *Bulletin of Entomological Research* 79, 373–380.

Citation of authors in the text should appear in the form: Polaszek (1990) or (Polaszek, 1990). More than one author should be cited in chronological order as: (Holloway *et al.*, 1987; Walker & Huddleston, 1988).

Offprints. 50 copies of each paper are provided free to the author (or major author) of each paper. Further copies may be obtained on payment, and the number required should be specified and ordered at proof stage.

Manuscripts. Three copies of the manuscript and artwork should be submitted to:

Bulletin of Entomological Research

Guest Editorial: Lane, R.P. The 'new taxonomy' – does it require new taxonomists or a new understanding?	437
Berger, A. Larval movements of <i>Chilo partellus</i> (Lepidoptera: Pyralidae) within and between plants: timing, density responses and survival	441
Chamberlain, D.J., Critchley, B.R., Campion, D.G., Attique, M.R., Rafique, M. & Arif, M.I. Use of a multi-component pheromone formulation for control of cotton bollworms (Lepidoptera: Gelechiidae and Noctuidae) in Pakistan	449
Devonshire, A.L., Devine, G.J. & Moores, G.D. Comparison of microplate esterase assays and immunoassay for identifying insecticide resistant variants of <i>Myzus persicae</i> (Homoptera: Aphididae)	459
Dwumfour, E.F. Volatile substances evoking orientation in the predatory flowerbug <i>Anthocoris nemorum</i> (Heteroptera: Anthocoridae)	465
Freeman, Z.A. & Pinniger, D.B. The behavioural responses of three different strains of <i>Musca domestica</i> (Diptera: Muscidae) to Alfacron bait in the laboratory	471
Haardt, H. & Höller, C. Differences in life history traits between isofemale lines of the aphid parasitoid <i>Aphelinus abdominalis</i> (Hymenoptera: Aphelinidae)	479
Khao, K.C. & Ho, C.T. The influence of <i>Dolichoderus thoracicus</i> (Hymenoptera: Formicidae) on losses due to <i>Helopeltis theivora</i> (Heteroptera: Miridae), black pod disease, and mammalian pests in cocoa in Malaysia	485
Leprince, D.J., Hribar, L.J. & Foil, L.D. Evaluation of the toxicity and sublethal effects of lambda-cyhalothrin against horse flies (Diptera: Tabanidae) via bioassays and exposure to treated hosts	493
Oghiakhe, S., Jackai, L.E.N., Makanjuola, W.A. & Hodgson, C.J. Morphology, distribution, and the role of trichomes in cowpea (<i>Vigna unguiculata</i>) resistance to the legume pod borer, <i>Maruca testulalis</i> (Lepidoptera: Pyralidae)	499
Oghiakhe, S. Jackai, L. E. N. & Makanjuola, W. A. A rapid visual field screening technique for resistance of cowpea (<i>Vigna unguiculata</i>) to the legume pod borer <i>Maruca testulalis</i> (Lepidoptera: Pyralidae)	507
Paynter, Q. & Brady, J. Flight behaviour of tsetse flies in thick bush (<i>Glossina pallidipes</i> (Diptera: Glossinidae))	513
Reus, J. A. W. A. & Symmons, P. M. A model to predict the incubation and nymphal development periods of the desert locust, <i>Schistocerca gregaria</i> (Orthoptera: Acrididae)	517
Saiful Islam, M. & Port, G. R. Two methods of estimating competitiveness of chemosterilized males of <i>Musca domestica</i> (Diptera: Muscidae)	521
Torr, S. J., Holloway, M. T. P. & Vale, G. A. Improved persistence of insecticide deposits on targets for controlling <i>Glossina pallidipes</i> (Diptera: Glossinidae)	525
Vasuki, V. The effects of sublethal doses of hexaflumuron on the feeding behaviour of mosquitoes (Diptera: Culicidae)	535
Vogt, W. G. Calibration of trap catches and net catches for estimating population densities of the bush fly <i>Musca vetustissima</i> (Diptera: Muscidae)	539
Žďárek, J. & Denlinger, D. L. Disruption of <i>Glossina morsitans morsitans</i> (Diptera: Glossinidae) eclosion behaviour: a novel method for evaluating the action of neurotoxic agents	547
Book Reviews	553
Index of Authors (Volume 82)	559
