

*Continued from back cover*

A model for the assembly of bovine casein micelles from F2 and F3 subunits T. ONO and T. OBATA	453–461
The structure of casein micelles between pH 5.5 and 6.7 as determined by light-scattering, electron microscopy and voluminosity experiments H. J. VREEMAN, B. W. VAN MARKWIJK and P. BOTH	463–470
Surface and emulsifying properties of caseins E. DICKINSON	471–478
Influence of glycosylation on the hydration properties of caseinates M. LE MESTE, B. COLAS, G. BLOND and D. SIMATOS	479–486
Surface active properties at the air–water interface of $\beta$ -casein and its fragments derived by plasmin proteolysis M. WILSON, D. M. MULVIHILL, W. J. DONNELLY and B. P. GILL	487–494
Surface properties of the bovine casein components: relationships between structure and foaming properties D. LORIENT, B. CLOSS and J. L. COURTHAUDON	495–502
Heat-induced changes in sodium caseinate M. GUO, P. F. FOX, A. FLYNN and K. S. MAHAMMAD	503–512
Experiments on the heat-induced salt balance changes in cow's milk Y. POULIOT, M. BOULET and P. PAQUIN	513–519
Milk stability in ethanolic solutions A. PIERRE	521–527
Rheological properties of casein gels T. VAN VLIET, S. P. F. M. ROEFS, P. ZOON and P. WALSTRA	529–534
Application of fractal concepts to the study of caseinate aggregation phenomena D. S. HORNE	535–541
Poster Presentations	543–556
List of participants	557–559

# JOURNAL OF DAIRY RESEARCH

Volume 56 Number 3 1989

## CONTENTS

	<i>Pages</i>
Preface	ii
Action of plasmin on bovine $\beta$ -casein in a membrane reactor S. VISSER, H. J. NOORMAN, C. J. SLANGEN and H. S. ROLLEMA	323-333
Tryptic phosphopeptides from whole casein. II. Physicochemical properties related to the solubilization of calcium R. BERROCAL, S. CHANTON, M. A. JUILLERAT, B. PAVILLARD, J-C. SCHERZ and R. JOST	335-341
Chemical characterization of bioactive peptides from <i>in vivo</i> digests of casein H. MEISEL and H. FRISTER	343-349
Biologically active peptides of casein and lactotransferrin implicated in platelet function A-M. FIAT, S. LEVY-TOLEDANO, J. P. CAEN and P. JOLLÈS	351-355
Biologically active casein peptides implicated in immunomodulation D. MIGLIORE-SAMOUR, F. FLOCH and P. JOLLÈS	357-362
Opioid antagonist peptides derived from $\kappa$ -casein H. CHIBA, F. TANI and M. YOSHIKAWA	363-366
Isolation and partial purification of astringent compounds from ultra-high temperature sterilized milk V. R. HARWALKAR, B. BOUTIN-MUMA, H. CHOLETTE, R. C. MCKELLAR, D. B. EMMONS and G. KLASSEN	367-373
The level of bitterness and solubility of hydrolysates produced by controlled proteolysis of caseins G. E. VEGARUD and T. LANGSRUD	375-379
Enzymic dephosphorylation of bovine casein to improve acid clotting properties and digestibility for infant formula E. LI-CHAN and S. NAKAI	381-390
Rapid separation of bovine caseins by mass ion exchange chromatography K. F. NG-KWAI-HANG and J. P. PÉLISSIER	391-397
Phosphorylation of casein components by Tyrosine-specific protein kinases M. YOSHIKAWA, M. SHIMADA, T. MIYAMURA, T. TAKEYA and H. CHIBA	399-402
Study of calcium binding to phosphoserine residues of $\beta$ -casein and its phosphopeptide (1-25) by $^{31}\text{P}$ NMR J.-J. BAUMY, P. GUENOT, S. SINBANDHIT and G. BRULÉ	403-409
Composition and structure of micellar calcium phosphate C. HOLT, M. J. J. M. VAN KEMENADE, L. S. NELSON JR., L. SAWYER, J. E. HARRIES, R. T. BAILEY and D. W. L. HUKINS	411-416
A $^1\text{H}$ -NMR study of bovine casein micelles; influence of pH, temperature and calcium ions on micellar structure H. S. ROLLEMA and J. A. BRINKHUIS	417-425
Hydrophobic interactions in human casein micelle formation: $\beta$ -casein aggregation C. W. SLATTERY, S. M. SOOD and P. CHANG	427-433
Dissociation and reassociation of enzyme-treated caseins under high pressure K. OHMIYA, T. KAJINO, S. SHIMIZU and K. GEKKO	435-442
Small-angle X-ray scattering investigation of the micellar and submicellar forms of bovine casein H. PESSEN, T. F. KUMOSINSKI and H. M. FARRELL JR	443-457
