# THE LIGHT ELEMENTS AND THEIR EVOLUTION

IAU SYMPOSIUM NO. 198

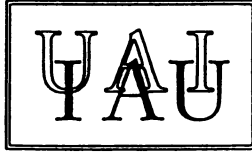

## COVER ILLUSTRATION:

A painting by Licius Bossolan showing the “Forte dos Reis Magos” (the Fort of the Three Magi), the main historical building of the city of Natal. It was constructed in the 16<sup>th</sup> century by the Portuguese to defend the town from the pirates and invaders. According to R. de la Reza and L. da Silva, the fort can represent a Li rich giant star, losing mass.

(The Editors thank the artist for permitting us to reproduce this painting).

## TABLE OF CONTENTS

<i>Preface</i> .....	<i>xi</i>
<i>List of Participants</i> .....	<i>xiii</i>
<i>Conference Photo</i> .....	<i>xvii</i>

### 1. INTRODUCTION

The light elements : what is known, what is controversial (*) .....	3
<i>F. Spite</i>	

### 2. PRODUCTION AND DESTRUCTION OF THE ELEMENTS

Primordial Nucleosynthesis For The New Millennium (*) .....	13
<i>G. Steigman</i>	
Alternative Solutions to Big Bang Nucleosynthesis (*) .....	25
<i>H. Kurki-Suonio</i>	
The Superbubble Model for LiBeB Production and Galactic Evolution .....	35
<i>E. Parizot and L. Drury</i>	
LiBeB Production and Associated Astrophysical Sites (*) .....	41
<i>E. Vangioni-Flam and M. Cassé</i>	
LiBeB Evolution: Three Models (*) .....	51
<i>R. Ramaty, R. E. Lingenfelter and B. Kozlovsky</i>	
Sinks of Light Elements in Stars – Part I (*) .....	61
<i>C. P. Deliyannis, M. H. Pinsonneault and C. Charbonnel</i>	
Sinks of Light Elements in Stars - Part II (*) .....	74
<i>M. H. Pinsonneault, C. Charbonnel and C.P. Deliyannis</i>	
Sinks of Light Elements in Stars – Part III (*) .....	87
<i>C. Charbonnel, C. P. Deliyannis and M. Pinsonneault</i>	
Creation and Destruction of ${}^7\text{Li}$ and ${}^3\text{He}$ in RGB and AGB Stars (*) .....	98
<i>I.-J. Sackmann and A. I. Boothroyd</i>	
Cosmological Gravitons Back Reaction and the Primordial Nucleosynthesis	108
<i>M. R. G. Maia, J. C. Carvalho, J. S. Alcaniz and J. M. F. Maia</i>	
Constraints from Big Bang Nucleosynthesis on a Time-Varying .....	111
Cosmological Constant	
<i>J. A. S. Lima, J. M. F. Maia and N. Pires</i>	
Photon Creation in the Universe and Primordial Nucleosynthesis .....	113
<i>J. A. S. Lima, J. S. Alcaniz, J. Santos and R. Silva Jr.</i>	
Change in Primordial Abundances Due to a Change in the Primordial .....	116
Plasma Energy Density	
<i>M. Opher and R. Opher</i>	
The Recombination in a FRW Universe with a Variable Cosmological .....	118
Term	
<i>N. Pires and J. A. S. Lima</i>	
Improved Use of Inputs to Primordial Nucleosynthesis.....	120
<i>K. M. Nollett and S. Burles</i>	

---

(\*) Invited Paper

### 3. ABUNDANCES OF D, $^3\text{He}$ AND $^4\text{He}$

Measurements of The Primordial D/H Abundance Towards Quasars (*) ...	125
<i>D. Tytler, J. M. O'Meara, N. Suzuki, D. Lubin, S. Burles and D. Kirkman</i>	
The Deuterium Abundance in QSO Absorption Systems:	
A Mesoturbulent Approach .....	135
<i>S. A. Levshakov</i>	
Deuterium Observations in our Galaxy - View A) (*) .....	141
<i>J. L. Linsky and B. E. Wood</i>	
Deuterium observation in our Galaxy - View B) (*) .....	151
<i>A. Vidal-Madjar</i>	
The D/H Ratio in Interstellar Gas toward the Hot, White Dwarf	
G191-B2B .....	161
<i>M. S. Sahu</i>	
The Deuterium Abundance In The Galactic Center 50 km/s Molecular	
Cloud: Evidence For A Cosmological Origin Of D .....	167
<i>D. A. Lubowich, J. M. Pasachoff, R. P. Galloway, T. J. Balonek, C. Tremonti, T. Millar and H. Roberts</i>	
Blue Compact Galaxies and the Primordial $^4\text{He}$ Abundance (*) .....	176
<i>T. X. Thuan and Y. I. Izotov</i>	
Inhomogeneous H II Regions and the Helium Abundance .....	188
<i>S. M. Viegas and R. Gruenwald</i>	
The Magellanic Clouds and the Primordial Helium Abundance (*) .....	194
<i>M. Peimbert and A. Peimbert</i>	
Some aspects of the chemical evolution of $^4\text{He}$ in the Galaxy:	
the He/H radial gradient and the $\Delta Y/\Delta Z$ enrichment ratio (*) .....	204
<i>W. J. Maciel</i>	
The Primordial 3-Helium Abundance At Last? (*) .....	214
<i>T. M. Bania, R. T. Rood and D. S. Balser</i>	
Deuterium and Helium-3 in the Protosolar Cloud (*) .....	224
<i>G. Gloeckler and J. Geiss</i>	
Helium and Oxygen Abundances in SMC Planetary Nebulae .....	234
<i>R. D. D. Costa, J. A. de Freitas Pacheco and T. P. Idiart</i>	
Interstellar D/H on the Sightline of Sirius .....	236
<i>G. Hébrard, A. Vidal-Madjar, R. Ferlet, C. Mallouris, D. York and M. Lemoine</i>	
Deuterium Balmer Emission from Nebulae .....	238
<i>G. Hébrard, D. Péquignot, A. Vidal-Madjar, J. R. Walsh and R. Ferlet</i>	
FUSE Spectra of Sk 80, an O7 Supergiant in the Small Magellanic Cloud .	240
<i>R. C. Iping, G. Sonneborn, D. Massa, A. W. Fullerton, J. B. Hutchings and the FUSE Science Team</i>	
Spatial Variations in the Atomic D/H Ratio in the ISM .....	242
<i>G. Sonneborn, E. B. Jenkins, T. Tripp, P. Wozniak, R. Ferlet, A. Vidal-Madjar and U. J. Sofia</i>	

---
