CATAclySMIC VARIABLES AND RELATED OBJECTS

*Proceedings of the 72nd Colloquium of the International Astronomical
Union held in Haifa, Israel, August 9–13, 1982*

edited by

MARIO LIVIO and GIORA SHAVIV

Faculty of Physics, Technion Israel Institute of Technology, Haifa, Israel

Stemming from the first Colloquium devoted explicitly to the study of Cataclysmic Variables, the proceedings reported here deal with both new observational material covering the whole spectrum from X-ray to Radio, as well as the latest theoretical developments in such areas as: structure and time dependence of accretion disks; evolution of close binaries; magnetic White Dwarfs; processes associated with X-ray bursters; and Novae. The volume contains important review papers by B. Warner (Intermediate Polars), E. Robinson (Periods of Cataclysmic Variables), G. Bath (Time Dependent Accretion Disks), R. Williams (Optical CNO Emission Lines in CV's), D. Q. Lamb (X-ray Emission from Cataclysmic Variables), J. MacDonald (Nova Outbursts), P. P. Eggleton (Evolution of Cataclysmic Variables), and M. Livio (Coherent Oscillations in Variable X-ray Sources).
