

# JOURNAL of the AUSTRALIAN MATHEMATICAL SOCIETY

**Series A — Pure Mathematics and Statistics**  
**Volume 68 Part 2**  
**APRIL 2000**

QUN CHEN	<i>Stability and constant boundary-value problems of harmonic maps with potential</i> .....	145
TAO QIAN and TONGDE ZHONG	<i>Transformation formula of higher order integrals</i>	155
TODOR STOYANOV	<i>About the zeros of some entire functions and their derivatives</i> .....	165
S. CHENG, L. PENG and Y. QI	<i>Ergodic behaviour of extreme values</i> .....	170
FRANK RÄBIGER and MANFRED P. H. WOLFF	<i>Spectral and asymptotic properties of resolvent-dominated operators</i> .....	181
WALTER R. BLOOM and ZENGFU XU	<i>Pseudo differential operators on local Hardy spaces on Chébli-Trimèche hypergroups</i> .....	202
VOLKER RUNDE	<i>Automatic continuity and second order cohomology</i>	231
GUANG YUAN ZHANG and QING ZHONG LI	<i>Sharkovskii's order and the stability of periodic points of maps of the interval</i> .....	244
EUGENE SPIEGEL	<i>Essential ideals of incidence algebras</i> .....	252
ANATOLIJ DVUREČENSKIĪ	<i>Loomis-Sikorski theorem for <math>\sigma</math>-complete MV-algebras and <math>\ell</math>-groups</i> .....	261
JAEMAN KIM	<i>8-dimensional Einstein-Thorpe manifolds</i> .....	278

## THE JOURNAL

The Journal of the Australian Mathematical Society began publication in 1959, and from 1975 has appeared in two series, Series A (Pure Mathematics and Statistics) and Series B (Applied Mathematics). Information about Series B may be found on the inside back cover.

### Series A, Pure Mathematics and Statistics

Submission of research papers in pure mathematics and mathematical statistics is invited. Authors intending to submit papers for publication should prepare the manuscript following the instructions below, and should send two complete copies to the Editor, or to an appropriate Associate Editor (see back cover of this issue).

Two volumes of three parts each are planned for 2000. These are Volume 68 and Volume 69. The annual subscription price to non-members is A\$355.00 (US\$280.00) for 2000.

### PREPARATION OF MANUSCRIPTS

1. The article should be typed, printed or photocopied on high quality bond paper of either A4, quarto or US letter size, on one side only, with double spacing, and with a generous margin (at least 3cm) all around.

2. The author should keep a complete copy of the submitted article as well as any electronic source; the Society will not accept responsibility for any loss.

3. Authors are encouraged to prepare their papers in  $\text{\LaTeX}$ ; further information on preparation of manuscripts is available on the Journal's web page at <http://www.maths.mu.oz.au/~jams>. Other forms of electronic source will usually also be useful.

4. Each manuscript should include (i) an abstract of not more than 150 words, preferably containing no formulae, and certainly containing no complicated formulae and no references, (ii) a 1991 Mathematics subject classification (Amer. Math. Soc.), (iii) if the title is long, a shortened form of it, no more than forty characters in length, including spaces.

5. Two alternative styles for references and quotations are described below. Authors are requested to use one and only one style consistently throughout their manuscript.

STYLE 1. A typical reference in the list of references would be

[3] T. M. Cherry, 'Infinite linear systems with homogeneous kernel of degree  $-1$ ', *J. Austral. Math. Soc.* **5** (1965), 129–168.

A corresponding reference in the text would be: Cherry [3]; or ([3,4,9]); or Cherry [3, Theorem 1].

STYLE 2. A typical reference in the list of references would be

[GBP] G. B. Preston, 'Monogenic inverse semigroups', *J. Austral. Math. Soc.* **40** (1986), 321–342.

A corresponding reference in the text would be: Preston [GBP]; or ([GBP, KG, GHL]); or Preston [GBP, Proposition 1].

In either style, the list of references should be in alphabetical order of surnames of first authors. Abbreviations for journal names should follow the practice of Mathematical Reviews.

6. Explain clearly what symbols are to be set in special typefaces (such as cursive, fraktur, script, bold) where this is not clear from the manuscript or electronic source.

7. Avoid abbreviations, such as Thm., Prop., Ex., iff, i.e., e.g.,  $\forall$ ,  $\exists$ ,  $\Rightarrow$ , and  $\Leftrightarrow$ .

8. Authors should provide diagrams drawn to professional standards. Diagrams in the form of encapsulated Postscript files, or similar, may be acceptable; the quality, however, should be similar to that obtained by a professional artist.

*Journal of the Australian Mathematical Society, Series A — Pure Mathematics and Statistics*, is published bimonthly by the Australian Mathematical Society, c/- Mathematics Department, Australian National University, Canberra, ACT 0200, Australia. Send address change notices to Dr A. Howe, Australian Mathematical Society, c/- Mathematics Department, Australian National University, Canberra, ACT 0200, Australia.
