Wooley**, *University of Bristol, UK*.

Aims and Scope. The aim of *Compositio Mathematica* is to publish first-class mathematical research papers. By tradition the journal focuses on papers in the mainstream of pure mathematics. This includes the fields of algebra, number theory, topology, algebraic and analytic geometry and (geometric) analysis. Papers on other topics are welcome if they are of interest not only to specialists. All contributions are required to meet high standards of quality and originality and are carefully screened by experts in the field.

Compositio Mathematica (ISSN 0010-437X) is published bi-monthly in January, March, May, July, September and November as one annual volume of six parts by the London Mathematical Society and distributed by Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK / Cambridge University Press, 32 Avenue of the Americas, New York, NY 10013-2473, USA. Periodicals postage paid at New York, NY and additional mailing offices. POSTMASTER: send address changes in the USA and Canada to *Compositio Mathematica*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, NY 10994-2133.

Subscriptions. The annual subscription rate for 2010 is €1224/£847 (USA, Canada and Mexico US\$1561). These prices include delivery by air and access to an online version. Single issues cost €204/£142 (USA, Canada and Mexico US\$261) plus postage.

Orders, which must be accompanied by payment, may be sent to any bookseller or subscription agent, or direct to Cambridge University Press at the UK address above, or in the USA, Canada or Mexico to Journals Fulfillment Department, 100 Brook Hill Drive, West Nyack, NY 10994-2133, USA. EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT-registered subscribers should provide their VAT registration number. Japanese prices for institutions are available from Kinokuniya Company Ltd, PO Box 55, Chitose, Tokyo 156, Japan.

All rights reserved; no part of this publication may be reproduced, stored in a retrieval system, or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without the prior written permission of the Publishers or a licence permitting restricted copying in the UK by the Copyright Licensing Agency Ltd, 90 Tottenham Court Road, London W1P 9HE, or in the USA by the Copyright Clearance Center Inc., 222 Rosewood Drive, Danvers, MA 01923. Organisations in the USA that are also registered with the C.C.C. may copy material (beyond the limits permitted by sections 107 and 108 of U.S. copyright law) subject to payment to C.C.C. of the per-copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0010-437X/08 \$16.00.

Individual readers of this publication, and non-profit libraries acting for them, are permitted to make fair use of the material, such as to make a single copy of one article for use in teaching or research. Permission is also granted to quote brief passages from this publication in reviews, provided that the customary acknowledgement of the source is given.

COMPOSITIO MATHEMATICA

VOLUME 146 NUMBER 3 MAY 2010

Shu Sasaki Analytic continuation of overconvergent Hilbert eigenforms in the totally split case	541–560
Nicolas Stalder The semisimplicity conjecture for A -motives	561–598
Hershy Kisilevsky and Jack Sonn On the minimal ramification problem for ℓ -groups	599–606
Thomas Barnet-Lamb On the potential automorphy of certain odd-dimensional Galois representations	607–620
Florian Pop On the birational p -adic section conjecture	621–637
Tomoyuki Abe Comparison between Swan conductors and characteristic cycles	638–682
Walter Gubler Non-archimedean canonical measures on abelian varieties	683–730
Francis Brown , Sarah Carr and Leila Schneps The algebra of cell-zeta values	731–771
Freydoon Shahidi and Steven Spallone Residues of intertwining operators for SO_6^* as character identities	772–794
Tatiana K. Howard Lifting of characters on p -adic orthogonal and metaplectic groups	795–810
