

Proceedings of the

CAMBRIDGE PHILOSOPHICAL
SOCIETY

(MATHEMATICAL AND PHYSICAL SCIENCES)

VOLUME 63

PART 2

CAMBRIDGE UNIVERSITY PRESS

BENTLEY HOUSE, 200 EUSTON ROAD, LONDON, N.W.1

AMERICAN BRANCH: 32 EAST 57TH STREET, NEW YORK, N.Y. 10022

Price Fifty-five Shillings Net (U.S.A. \$9.50)

Subscription price per volume £10 net post free (\$34.50 in U.S.A.)

1967

CAMBRIDGE PHILOSOPHICAL SOCIETY

FOUNDED 1819; ROYAL CHARTER 1832

Session 1966-1967

President: SIR RUDOLPH PETERS

Vice Presidents: SIR MARTIN RYLE, E. N. WILLMER, O. R. FRISCH

Treasurer: R. C. EVANS

Secretaries: (Mathematical) G. R. ALLAN

(Physical) J. E. FIELD

(Biological) S. SMITH

The publications of the Society consist of the *Proceedings* and of the *Biological Reviews*. The publication of *Transactions* was suspended at the end of Volume XXIII.

Orders should be sent to: THE MANAGER, CAMBRIDGE UNIVERSITY PRESS, BENTLEY HOUSE, 200 EUSTON ROAD, LONDON, N.W. 1. Enquiries from the U.S.A. should be addressed to the Cambridge University Press, American Branch, 32 East 57th Street, New York, N.Y. 10022.

For the purchase of early parts of the *Transactions* and *Proceedings*, application should be made to the Secretaries, CAMBRIDGE PHILOSOPHICAL SOCIETY, BENE'T STREET, CAMBRIDGE, ENGLAND, and for early parts of *Biological Reviews* to the Cambridge University Press. All parts of the *Proceedings* (including the cumulative index to Vols. 1 to 50) and of *Biological Reviews* are available, and prices of sets or single parts will be quoted on application.

Fellows and Associates of the Society are particularly requested to inform the Secretaries of any change of postal address and to send their subscriptions to the Treasurer, at the Society's office.

All correspondence regarding library exchanges and Fellows' copies should be addressed to the Librarian at the Society's office.

PROCEEDINGS of the CAMBRIDGE PHILOSOPHICAL SOCIETY

edited by

G. R. ALLAN

in consultation with

J. W. S. CASSELS

E. R. LAPWOOD

J. M. C. SCOTT

H. T. CROFT

W. B. R. LICKORISH

A. M. WALKER

P. V. LANDSHOFF

1. Four parts of the *Proceedings* are issued each year, in January, April, July and October. Papers in all branches of mathematics (including applications of mathematics in the natural and biological sciences) are within its scope.

2. Contributions for the *Proceedings* should be sent to the Mathematical Secretary at the Society's office (see above). Papers should be communicated directly by the author.

3. Papers which (if printed) would occupy more than 20 pages can only rarely be accepted.

4. Papers in languages other than English should be accompanied by a brief summary in English.

5. It is extremely helpful if diagrams are drawn in indian ink on white card, faintly blue or green-lined graph paper, or tracing cloth or paper. *Symbols, legends and captions should be given on a transparent overlay.* The Society recognizes that many authors do not have the facilities for producing drawings of a sufficiently high standard to be reproduced directly and it is therefore willing to have such diagrams re-drawn, provided they are reasonably clear.

6. References should be listed at the end of each paper. Titles of journals should be abbreviated as in *Mathematical Reviews*. Any systematic method of ordering the list of references is acceptable.

7. Authors are particularly requested to prepare their manuscripts in a form suitable for printing, with adequate margins. The Secretary reserves the right to return scarcely legible manuscripts to the author. A pamphlet on the preparation of manuscripts may be obtained on application to the Librarian. If a large number of corrections are required in the proofs, the Council reserves the right to make a charge towards the cost.

8. Authors may receive on request 100 free offprints (for each set of authors in the case of a joint paper). Alternatively authors may have 50 free offprints in covers. Further copies may be obtained at reasonable cost. An order form is included with the galley proofs of each paper.

Electronics Letters — IEE PERIODICAL

AN INTERNATIONAL PUBLICATION

'REQUIRED READING FOR THOSE WISHING TO KEEP ABREAST OF RESEARCH AND DEVELOPMENT'

Since its establishment in March 1965, *ELECTRONICS LETTERS* has published 650 letters from 23 countries on advanced research and development projects.

ELECTRONICS LETTERS each month gives the fastest publication of short communications yet obtained in this field—the interval between receipt and publication of a contribution is never more than six weeks and frequently as little as two weeks.

ELECTRONICS LETTERS covers all aspects of electronics and control, including such fields as circuit theory, satellite communication, solid-state devices, electroacoustics, computer design, medical electronics, control theory, microwave techniques, the properties of plasmas, semiconductors and magnetic materials, communication theory, quantum electronics, etc.

The annual subscription is £4 by surface mail, £9 by airmail. The surface-mail rate for IEE members is 30s. per annum, and for members of societies with which the IEE has reciprocal arrangements for subscriptions to publications, £3 per annum (airmail rates £6. 10s. and £8, respectively).

PUBLICATIONS DEPARTMENT, IEE, SAVOY PLACE, LONDON WC2

THE JOURNAL OF THE SOCIETY FOR INDUSTRIAL AND APPLIED MATHEMATICS

VOLUME 15, NUMBER 1, NOVEMBER 1966

Stability of A Towed Object. W. P. REID.

Algebraic Complexes Which Characterize Chemical Networks. PETER SELLERS.

Some Integral Relations for Solutions of Laplace's Equation. K. B. RANGER.

Forced Oscillations of the Generalized Lienard Equation. PETER J. PONZO.

Axisymmetric Slipless Indentation of an Infinite, Elastic Cylinder. W. F. YAU.

Second-Order Statistics of Alternated Step-Wise Processes. OSCAR A. Z. LENEMAN.

An Axisymmetric Mixed Boundary Value Problem for a Thick Slab. R. S. DHALIWAL.

On the Solutions of Plates, Strips, Rods, and Cylinders Subjected to Arbitrary Dynamic Edge Load. CHIEN-HENG WU and ROBERT PLUNKETT.

Diffraction by a Halfplane in a Uniaxial Medium. BENJAMIN RULF.

Some New Stability Results in the Theory of Whirling. J. GENIN and J. S. MAYBEE.

On Flow Graph Solutions of Linear Algebraic Equations. WAI-KAI CHEN.

A 'Dishonest' Approach to Certain Stochastic Eigenvalue Problems. WILLIAM E. BOYCE.

Effect of Limited Wordlength on Satellite Prediction Accuracy. A. HOLICK.

Two Theorems on Pseudosymmetric Graphs. RAM PRAKASH GUPTA.

Chebyshev Polynomial Approximations for the L-Membrane Eigenvalue Problem. J. C. MASON.

Density Attenuation Within Interacting Crossed Beams of Particles. RONALD G. REHM.

An Iterative Method for the Solution of Sets of First-Order Hyperbolic Differential Equations. S. F. BUSH.

Revised Matrix Algorithms for Shortest Paths. T. C. HU.

Errata: The Distributional Laplace and Mellin Transformations. A. H. ZEMANIAN.

Errata: On Stochastic Linear Programming. A. C. WILLIAMS.

Addendum: Linear Codes of Constant Weight. EDWIN WEISS.

The Journal is published bi-monthly. Subscriptions are \$20.00 per volume

Orders should be placed with the

SOCIETY FOR INDUSTRIAL AND APPLIED MATHEMATICS

33 So. 17th St., Philadelphia, Pennsylvania, 19103 U.S.A.

ROYAL STATISTICAL SOCIETY

THE JOURNAL OF THE ROYAL STATISTICAL SOCIETY is published in three series: SERIES A (GENERAL), four issues a year, annual subscription post free £5. 4s. (U.S. \$15), price each part 30s.; SERIES B (METHODOLOGICAL), three issues a year, annual subscription post free £4. 2s. (U.S. \$12), price each part 35s.; APPLIED STATISTICS (SERIES C), three issues a year, annual subscription post free 30s. (U.S. \$5), price each part 15s.

Contents of Series B (Methodological), Vol. 29, Part 1, 1967

- Topics in the investigation of linear relations fitted by the method of least squares (with Discussion). F. J. ANSCOMBE.
- Hypothesis testing when the sample size is treated as a random variable (with Discussion). D. J. BARTHOLOMEW.
- The use of the concept of a future observation in goodness of fit problems. I. GUTTMAN.
- Linear approximation using the criterion of least total deviations. M. DAVIES.
- On sharpening Scheffé bounds. R. BOHRER.
- Optimum allocation in multivariate surveys: An analytical solution. A. R. KOKAN and S. KHAN.
- A generalization of Fieller's theorem to the ratio of complex parameters. M. HALPERIN.
- On fixed-width confidence bounds for regression parameters and mean vector. M. S. SRIVASTAVA.
- Asymptotic renewal results for a natural generalization of classical renewal theory. C. C. HEYDE.
- A modified model for rainfall occurrence. J. R. GREEN.
- Ex-post determination of significance in multivariate regression when the independent variables are orthogonal. R. C. GEARY.
- Asymptotic properties of Bayesian single sampling plans. A. HALD.
- The behaviour of the variance function of the difference between two estimated responses. A. HERZBERG.
- Estimating the covariance and spectral density functions from a clipped stationary time series. D. R. MCNEIL.
- Correction: A note on the asymptotic efficiency of an asymptotically normal estimator sequence. A. M. WALKER.
- Addendum: The chi-square test for heterogeneity of proportions after adjustment for stratification. P. J. ARMITAGE.
