## Greenfield, P. M. Language, tools and brain: The ontogeny and phylogeny of hierarchically organized sequential behavior 531

### Open Peer Commentary

Anderson, J. R. Making the best use of primate tool use?	551	Hauser, M. D. If you've got it, why not flaunt it? Monkeys with Broca's area but no syntactical structure to their vocal utterances	564
Bickerton, D. Syntax is not as simple as it seems	552	Jacobs, B. Neurobiology and language acquisition: Continuity and identity	565
Bloom, P. What does language acquisition tell us about language evolution?	553	Karmiloff-Smith, A. & Johnson, M. H. Constructivism without tears	566
Connolly, K. J. & Manoel, E. de J. Hierarchies and tool-using strategies	554	Lieberman, P. Speech and brain evolution	566
Deacon, T. W. Anatomy of hierarchical information processing	555	MacNeilage, P. F. Linguistic and manual evolution in chimpanzees	568
Fragaszy, D. M. A comparative view of object combination and tool use: Moving ahead	557	Noble, W. & Davidson, I. Evolving remembrance of times past and future	570
Fuster, J. M. Up and down the frontal hierarchies; whither Broca's area?	558	Powers, D. M. W. Goal directed behavior in the sensorimotor and language hierarchies	572
Gardner, R. A. & Gardner, B. T. Absence of evidence and evidence of absence	558	Rolfe, L. Hierarchical organization in grammar	574
Gibson, K. R. Continuity versus discontinuity theories of the evolution of human and animal minds	560	Thatcher, R. W. Are rhythms of human cerebral development "traveling waves"?	575
Golinkoff, R. M., Hirsh-Pasek, K. & Reeves, L. Have your module and eat it too!	561	Tomasello, M. Objects are analogous to words, not phonemes or grammatical categories	575
Gómez, J. C. & Sarriá, E. Gestures, persons and communication: Sociocognitive factors in the development and evolution of linguistic abilities	562	Wynn, T. The comparative simplicity of tool-use and its implications for human evolution	576
Grafman, J. & Hendler, J. Planning and the brain	563	<b>Author's Response</b>	
		Greenfield, P. M. From hand to mouth	577

## Crain, S. Language acquisition in the absence of experience 597

### Open Peer Commentary

Berman, R. A. In defense of development	612	Lowenthal, F. Logic and language acquisition	626
Brothers, L. & Raleigh, M. J. Simians, space, and syntax: Parallels between human language and primate social cognition	613	McCawley, J. D. "Negative evidence" and the gratuitous leap from principles to parameters	627
Cairns, H. S. Not in the absence of experience	614	Pierce, A. E. Acquisition errors in the absence of experience	628
Culicover, P. W. Innate knowledge and linguistic principles	615	Powers, D. M. W. Language acquisition in the absence of proof of absence of experience	629
de Villiers, J. Syntactic parameter hunting: Little scavengers might get lost	616	Roeper, T. We need a team of gene-mappers, not principle-provers	630
Dodd, D. & Fogel, A. Noninnatist alternatives to the negative evidence hypothesis	617	Samet, J. & Tager-Flusberg, H. Maturation, emergence and performance	631
Freidin, R. Linguistic theory and language acquisition: A note on structure-dependence	618	Schlesinger, I. M. Innate universals do not solve the negative feedback problem	633
Goldin-Meadow, S. Is "innate" another name for "developmentally resilient"?	619	Slobin, D. I. Can Crain constrain the constraints?	633
Goodluck, H. Language development: Relatives to the rescue!	620	Sokolov, J. L. & Snow, C. E. A premature retreat to nativism	635
Grant, J. & Karmiloff-Smith, A. Diagnostics for domain-specific constraints	621	Wasow, T. Debatable constraints	636
Harris, C. L. Alternatives to linguistic arbitrariness	622	Weinberg, A. Parameter setting and early emergence	637
Hyams, N. Early emergence of linguistic knowledge: How early?	623	Wilkins, W. Autonomy and the nature of the input	638
Lasnik, H. Language acquisition and two types of constraints	624	<b>Author's Response</b>	
Leonard, L. B. Early emergence as a diagnostic for innateness	625	Crain, S. Charting the course of language development	639

**Open Peer Commentary**

<b>Baars, B. J.</b> A curious coincidence? Consciousness as an object of scientific scrutiny fits our personal experience remarkably well	669	<b>Lloyd, D.</b> Consciousness: Only introspective hindsight?	686
<b>Block, N.</b> Evidence against epiphenomenalism	670	<b>MacKay, W. A.</b> Consciousness is king of the neuronal processors	687
<b>Bowers, K. S.</b> (Un)conscious influences in everyday life and cognitive research	672	<b>Mandler, G.</b> The processing of information is not conscious, but its products often are	688
<b>Carlson, R. A.</b> Consciousness and content in learning: Missing or misconceived?	673	<b>Mangan, B.</b> Epi-arguments for epiphenomenalism	689
<b>Corteen, R. S.</b> Consciousness and making choices	674	<b>Navon, D.</b> The function of consciousness or of information?	690
<b>Dagenbach, D.</b> On the premature demise of causal functions for consciousness in human information processing	675	<b>Rey, G.</b> Reasons for doubting the existence of even epiphenomenal consciousness	691
<b>Dixon, N. F.</b> Hydrocephalus and “misapplied competence”: Awkward evidence for or against?	675	<b>Reznick, J. S. &amp; Zelazo, P. D.</b> A limitation of the reflex-arc approach to consciousness	692
<b>Dretske, F.</b> Conscious acts and their objects	676	<b>Schaeken, W. &amp; d’Ydewalle, G.</b> Isn’t the first-person perspective a bad third-person perspective?	692
<b>Economos, J.</b> Observing protocol	677	<b>Shevrin, H.</b> A lawful first-person psychology involving a causal consciousness: A psychoanalytic solution	693
<b>Foulkes, D.</b> Dream processing	678	<b>Sloman, A.</b> Developing concepts of consciousness	694
<b>Gardiner, J. M.</b> Memory with and without recollective experience	678	<b>Spiegel, D.</b> Dissociating consciousness from cognition	695
<b>Gray, J. A.</b> What is the relation between language and consciousness?	679	<b>Stanovich, K. E.</b> Damn! There goes that ghost again!	696
<b>Gregson, R. A. M.</b> Has consciousness a sharp edge?	679	<b>Underwood, G.</b> Attention is necessary for word integration	698
<b>Hardcastle, V. G.</b> Epiphenomenalism and the reduction of experience	680	<b>Van Gulick, R.</b> Consciousness may still have a processing role to play	699
<b>Inhoff, A. W.</b> Limits of preconscious processing	680	<b>Wagstaff, G. F.</b> No conscious or co-conscious?	700
<b>Keane, M. T.</b> Consciousness, analogy and creativity	682	<b>Wilson, T. D.</b> Consciousness: Limited but consequential	701
<b>Kinsbourne, M.</b> Velmans’s overfocused perspective on consciousness	682	<b>Editorial Commentary</b>	701
<b>Klein, R.</b> Is consciousness information processing?	683	<b>Author’s Response</b>	
<b>Koch, C. &amp; Crick, F.</b> Understanding awareness at the neuronal level	683	<b>Velmans, M.</b> Consciousness from a first-person perspective	702
<b>Libet, B.</b> Conscious functions and brain processes	685		

**Continuing Commentary**

<i>On Grünbaum, A. (1986) Multiple book review of The foundations of psychoanalysis: A philosophical critique. BBS 9:217–284.</i>	727
---	-----

<b>Rakover, S. S.</b> Tallying the “tally argument”: What next?	727	<b>Author’s Response</b>	
		<b>Grünbaum, A.</b> Etiology and therapy in psychoanalytic theory	729

<i>On Verleger, R. (1988) Event-related potentials and cognition: A critique of the context updating hypothesis and an alternative interpretation of P3. BBS 11:343–427.</i>	732
--	-----

<b>Johnson, M. &amp; Anderson, M.</b> What can evoked potentials tell us about cognition?	732	<b>Precommentary Authors’ Response</b>	
<b>Ullsperger, P. &amp; Baldeweg, T.</b> Interpreting P300 amplitude changes with adaptation level theory	733	<b>Donchin, E. &amp; Coles, M. G. H.</b> Behavior, cognition and event-related brain potentials	735

**Author’s Response**

<b>Verleger, R.</b> Event-related potentials and cognition: On unexpected events and on the utility of event-related potentials	734
---	-----

<i>On Thagard, P. (1989) Explanatory coherence. BBS 12:435–502.</i>	739
---	-----

<b>Callen, C. R.</b> Explanatory coherence and fact-finding	739	<b>Roberts, L. &amp; Gorman, M. E.</b> The emperor’s new epistemology	743
<b>Chater, N.</b> Network and direct methods of maximising harmony	740	<b>Author’s Response</b>	
<b>Downes, S. M.</b> Empirical investigation or rational reconstruction?	742	<b>Thagard, P.</b> Defending explanatory coherence	745

<i>On</i> Caporael, L. R., Dawes, R. M., Orbell, J. M. & van de Kragt, A. J. C. (1989) Selfishness examined: Cooperation in the absence of egoistic incentives. BBS 12:683–739.		748
Eisenberg, N. An explanatory mechanism that merits more attention	749	<b>Author's Response</b>
Schubert, G. Sociobiology's bully pulpit: Romancing the gene	749	Caporael, L. R. Obstacles to expanding human evolutionary theory
		750
<i>On</i> Dawkins, M. S. (1990) With Precommentary by Singer, P. From an animal's point of view: Motivation, fitness and animal welfare. BBS 13:1–61.		753
Bekoff, M. The animal's point of view, animal welfare and some other related matters	753	Rushen, J. Assessing animal welfare: Design versus performance criteria
Everill, B. Humans' use of animals: On the horns of a moral dilemma	756	
Gray, J. A. On strangerism and speciesism	756	<b>Precommentary Author's Response</b>
Hollands, C. Toward positive animal welfare	757	Singer, P. The pervasiveness of species bias
		759
<i>On</i> Näätänen, R. (1990) The role of attention in auditory information processing as revealed by event-related potentials and other brain measures of cognitive function. BBS 13:201–288.		761
Alain, C., Achim, A. & Richer, F. Matching cannot account for context effects on the attention-related negative potential	761	<b>Author's Response</b>
Kranda, K. Responding to attention	762	Näätänen, R. Mismatch and processing negativities in auditory stimulus processing and selection
Port, R. F. Can complex temporal patterns be automatized?	762	
		764
<i>On</i> Tsotsos, J. K. (1990) Analyzing vision at the complexity level. BBS 13:423–469.		768
Kube, P. R. Unbounded visual search is not <i>both</i> biologically plausible <i>and</i> NP-Complete	768	<b>Author's Response</b>
		Tsotsos, J. K. Is complexity theory appropriate for analyzing biological systems?
		770

## BBS Associates

Please send BBS your electronic mail ('email') address

BBS is relying more and more on electronic mail to communicate with Associates (especially for circulating abstracts of recently accepted target articles so prospective commentators can nominate themselves).

If you have an email address, please inform BBS right away at:

harnad@clarity.princeton.edu

or

harnad@pucc.bitnet

(If you do not yet have an email address, we urge you to get one!)
