

Style A full set of notes for contributors is available from the editors. If possible, this should be obtained before the submission of a manuscript.

The following important points should be noted:

(a) Typescripts of articles should be submitted in three copies. Contributors are also encouraged to submit either a MS-DOS text file on an IBM-readable $5\frac{1}{4}$ inch double density diskette, or an 8 inch single density diskette for IBM Visitext system.

(b) The typescript of an article should be accompanied on a separate sheet of paper by an abstract of about 100 words summarising the conceptual content of the article.

(c) No part of a title or section heading should be underlined.

(d) All copy (text, notes, references and abstract) must be double-spaced throughout, and margins of at least $1\frac{1}{2}$ inches should be left on all four sides of each A4 sheet (US $11" \times 8\frac{3}{4}"$).

(e) All illustrative material must be numbered consecutively. Tables, figures and diagrams (though not simple rules or examples) must appear on a separate sheet, in camera-ready form. They should be no more than $1\frac{1}{2}$ times the intended final size.

(f) Phonetic transcriptions should, wherever possible, make use of the symbols and conventions of the International Phonetic Alphabet, and should be no narrower than is absolutely necessary for the purpose.

(g) Notes should as far as possible be avoided. They will appear as endnotes rather than as footnotes.

(h) Bibliographical references at the end of each article should conform to the following models:

Allen, W. S. (1966). Prosody and prosodies in Greek. *Transactions of the Philological Society*. 107–148.

Harms, Robert (1973). Some non-rules in English. Indiana University Linguistics Club.

Thráinsson, H. (1978). On the phonology of Icelandic preaspiration. *Nordic Journal of Linguistics* 1. 3–54.

Proofs First proofs only will be sent to the (first named) author, who will be expected to correct them and return them to the editors within three days of receipt.

Offprints 25 offprints and a copy of the volume will be supplied to each author.

PHONOLOGY YEARBOOK

An annual journal

Edited by Colin J. Ewen and John M. Anderson

Contents

The validation of phonological theories

(Guest editor : John J. Ohala)

- Consumer's guide to evidence in phonology** 3
John J. Ohala
- Today the world, tomorrow phonology** 27
James D. McCawley
- On the phoneme as the unit of the 'second articulation'** 45
Bruce L. Derwing, Terrance M. Nearey and Maureen L. Dow
- On the acquisition of abstract representations for English vowels** 71
Jeri J. Jaeger
- More on English vowel shift: the back vowel question** 99
H. Samuel Wang and Bruce L. Derwing
- The representation of phonological information during speech production planning: evidence from vowel errors in spontaneous speech** 117
Stefanie Shattuck-Hufnagel
- Reduplication in Ewe: morphological accommodation to phonological errors** 151
Joseph Paul Stemberger and Marshall Lewis
- Phonological structure in speech recognition** 161
Anne Cutler
- Cross-linguistic trends in the frequency of CV sequences** 179
Tore Janson
- Perceptual constraints and phonological change: a study of nasal vowel height** 187
Patrice Speeter Beddor, Rena Arens Krakow and Louis M. Goldstein
- Towards an articulatory phonology** 219
Catherine P. Browman and Louis M. Goldstein
- Phonology above the foot***
(Guest editor : D. Robert Ladd)
- Intonational structure in Japanese and English** 255
Mary E. Beckman and Janet B. Pierrehumbert
- Intonational phrasing: the case for recursive prosodic structure** 311
D. Robert Ladd
- Secondary stress and metrical rhythm** 341
Iggy Roca
- On derived domains in sentence phonology** 371
Elisabeth Selkirk
