### In the Pipeline for July 2024

Equally spaced squares and some impossible identities	<i>G.J.O. Jameson</i>
Möbius' barycentric calculus and solution to three conjectures for the location of the Mittenpunkt	<i>Martin Lukarevski</i>
Pythagorean triples using the relativistic velocity addition formula	<i>Howard Sporn</i>
A provocative tale of unwinding	<i>Subhranil De</i>
Large deviations and fairness for a betting game with a constant ratio of capital	<i>Toshio Nakata</i>
Viva "Vis-viva"	<i>John D. Mahony</i>
Dependence of events, revisited	<i>Peter Braza</i>
Narayana's integer sequence revisited	<i>Tony Crilly</i>
An extension of a curious binomial identity of Simons	<i>Necdet Batir and Sevda Atpinar</i>
Sudoku Strategies using graph theory	<i>Jeff Brown</i>
An assymetric propellor with squares, and some extensions	<i>Quang Hung Tran</i>
More variations on Nagel and Gergonne analogues of the Steiner-Lehmus theorem	<i>Sadi Abu-Saymeh, Mowaffaq Hajja</i>
