Protochips NEW 8/2 HOLE PATTERN...

# CD-FLAT™

The premier holey carbon sample support for automated S/TEM imaging and metrology

## Designed for Metrology

CD-Flat is designed for CD-TEM metrology of large specimens, like 3D NAND FIB lamella.

## Dedicated Service

Our best-in-class service team is ready to assist you with dedicated support and fast response times.

## Fast Delivery

Available now! New orders ship within 4 weeks, and regular customers can place standing orders to ship on a monthly schedule.

## Specifications

EMS CATALOG NUMBER: **CDFT823-50**

Copper Grid, 300 Mesh, 3.05 mm OD

Holey Carbon, 40 nm thick

8/2 Hole Pattern (8  $\mu$ m diameter,

2  $\mu$ m spacing between holes)

Ships in packages of 50

## The C-flat™ advantage in a new pattern

CD-flat™ — the premier ultra-flat holey carbon grid is ready to use with no additional cleaning or handling steps, and is now available, featuring a **NEW** 8/2 hole pattern.

This journal is part of the **Cambridge** Core service. Access to online tables of contents and article abstracts is available to all researchers at no cost. Access to full-text articles online is provided to those with online subscription. Online subscriptions must be activated. Once your subscription is activated, free access to past, present, and forthcoming articles is available at:

***Microscopy and Microanalysis* website: [cambridge.org/MAM](http://cambridge.org/MAM).**

Instructions for authors submitting manuscripts may be found at [cambridge.org/MAM](http://cambridge.org/MAM). Select "Further Information" then select "Instructions for Contributors."

*Microscopy and Microanalysis* publishes original research papers dealing with a broad range of topics in microscopy and microanalysis. These include articles describing new techniques or instrumentation and their applications, as well as papers in which established methods of microscopy or microanalysis are applied to important problems in the fields of biology or materials science. Microscopy and microanalysis are defined here in a broad sense, and include all current and developing approaches to the imaging and analysis of microstructure. The criteria for acceptance of manuscripts are the originality and significance of the research, the quality of the microscopy or microanalysis involved, and the interest for our readership.

Four types of communications are published in the Journal. **Regular Articles** are of substantial length and describe the findings of an original research project that satisfies the aims and scope of the Journal, described above. **Review Articles** summarize the current status of an important area within the aims and scope of the Journal. **Letters to the Editor** usually contain comments on recent articles that have appeared in the Journal. **Book Reviews** are also published, but these are solicited only through the Book Review Editor.

### Instructions for Contributors

Instructions for authors contributing manuscripts may be found at <http://mc.manuscriptcentral.com/mam> under "Resources: Instructions and Forms." Authors may also visit [cambridge.org/mam](http://cambridge.org/mam), select "Information," and then select "Instructions for Contributors."

### Copyright Information

Submission of a manuscript implies: that the work described has not been published before (except in the form of an abstract or as part of a published lecture, review, or thesis); that it is not under consideration for publication elsewhere; that its publication has been approved by all coauthors, if any, as well as by the responsible authorities at the institute where the work has been carried out; that, if and when the manuscript is accepted for publication, the authors agree to automatic transfer of the copyright to the Microscopy Society of America; that the manuscript will not be published elsewhere in any language without the consent of the copyright holders; and that written permission of the copyright holder is obtained by the authors for material used from other copyrighted sources.

All articles published in this journal are protected by copyright, which covers the exclusive rights to reproduce and distribute the article (e.g., as offprints), as well as all translation rights. No material published in this journal may be reproduced photographically or stored on microfilm, in electronic data bases, video disks, etc., without first obtaining written permission from the publisher.

The use of general descriptive names, trade names, trademarks, etc., in this publication, even if not specifically identified, does not imply that these names lack protection by the relevant laws and regulation.

Authorization to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by Cambridge University Press, provided that the appropriate fee is paid directly to Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA [Tel: (508) 750-8400], stating the ISSN (1431-9276), the volume, and the first and last page numbers of each article copied. The copyright owner's consent does not include copying for general distribution, promotion, new works, or resale. In these cases, specific written permission must first be obtained from the publisher.

# Nano-Positioning for Microscopy & Imaging

Piezo stages & positioners are essential tools for high-resolution microscopy, such as Super Resolution Microscopy or AFM. Their sub-atomic resolution and extremely fast response allow researchers to create higher-quality images faster. PI provides a large variety of fast positioning stages and piezo objective nano-positioners for 3D imaging (Z-stack acquisition), fast-focusing applications, and light sheet microscopy.

PIFOC® nano-focusing drive

6-axis closed loop piezo stage for AFM:  
highly linear, < .1nm resolution

Affordable XY & XYZ Piezo Stages  
for SR Microscopy: P-545 Plnano®

Based on 40+ years of experience with electromagnetic and piezo-ceramic motors, PI can quickly provide a solution for your precision positioning and automation projects. Design centers are located in the USA, Europe, and Asia with global support of 1300+ employees in 13 countries.
