JOURNALS

Glasgow Mathematical Journal

Published for The Glasgow Mathematical Journal Trust

Editor-in-Chief

I. A. B. Strachan, *University of Glasgow, UK*

Glasgow Mathematical Journal publishes original research papers in any branch of pure and applied mathematics. An international journal, its policy is to feature a wide variety of research areas, which in recent issues have included ring theory, group theory, functional analysis, combinatorics, differential equations, differential geometry, number theory, algebraic topology, and the application of such methods in applied mathematics.

JOURNALS

The European Physical Journal - Applied Physics

Marketed and distributed on behalf of ÉDP Sciences

Editor-in-Chief

B. Drévillon, LPCIM, France

EPJ-AP is an international journal devoted to the promotion of the recent progresses in all fields of applied physics. The articles published in *EPJ-AP* span the whole spectrum of applied physics research including semiconductors, organic materials, thin films, nanotechnology, photonics, spintronics, magnetism, plasma, energy generation transfer, metrology, fluids and microfluidics, biophysics and biosensors, surfaces and interfaces.

European Journal of Applied Mathematics

Co-Editors-in-Chief

S. D. Howison, *University of Oxford, UK*

A. A. Lacey, *DPMMS, Heriot-Watt University, UK*

M. J. Ward, *University of British Columbia, Canada*

Since 2008 *EJAM* surveys have been expanded to cover Applied and Industrial Mathematics. Coverage of the journal has been strengthened in probabilistic applications, while still focusing on those areas of applied mathematics inspired by real-world applications, and at the same time fostering the development of theoretical methods with a broad range of applicability. Survey papers contain reviews of emerging areas of mathematics, either in core areas or with relevance to users in industry and other disciplines. Research papers may be in any area of applied mathematics, with special emphasis on new mathematical ideas, relevant to modelling and analysis in modern science and technology, and the development of interesting mathematical methods of wide applicability.

CAMBRIDGE
UNIVERSITY PRESS

Journal of Mechanics

Published on behalf of The Society of Theoretical and Applied Mechanics, R.O.C.

Editor-in-Chief

K. C. Wu, National Taiwan University, Taiwan

The objective of the *Journal of Mechanics* is to provide an international forum to foster exchange of ideas among mechanics communities in different parts of world.

The Journal publishes original research in all fields of theoretical and applied mechanics.

The *Journal of Mechanics* especially welcomes papers that are related to recent technological advances, such as micro/nanomechanics, medical and biological systems, and microscale heat transfer. The contributions, which may be analytical, experimental or numerical, should be of significance to the progress of mechanics. Papers which are merely illustrations of established principles and procedures will generally not be accepted. Reports that are of technical interest are published as Short articles. Review articles are published only by invitation.
