

ADDENDA AND ERRATA FOR
A KRONECKER-TYPE THEOREM FOR COMPLEX
POLYNOMIALS IN SEVERAL VARIABLES,
VOL. 24 (4) 1981, 447–452

by
C. J. SMYTH

On p 448 l13, p 450 l7, l10, p 451 l17 add “of measure one” after “extended unit monic polynomials”.

On p 449 l14–15 replace “a hyperplane H containing C ” by “a supporting hyperplane H of C with $H \cap C = C$ ”.

On p 449 l4, p 450 l1, p 451 l10 replace $(2\pi)n$ by $(2\pi)^n$. On p 449 l21 the expression $(\sum_{i=1}^n j_i v_i)$ should be in the exponent. On p 450 l7 delete “by Jensen’s Theorem”.

At the end of paper add: I would like to thank Prof. A. Schinzel and Dr. A. Bazylewicz for pointing out some errors in a preprint of this paper. Since submitting the paper I have found out that Lawton (*J. Sci. Fac. Chaing Mai Univ. Thailand* **4**, 15–23 (1977)) outlined a proof of Cor. 1 using methods similar to those used here.
