INDEX OF SUBJECTS

Action variable 210
Angular momentum 259, 260, 263, 268, 277, 278, 279, 367, 372, 373
Angular resolving power 102
Asymptotic curves 213
Axisymmetric evolution 352
Axisymmetric modes 305

Background level 117
Bars 301
Bar mode 298, 305
Binary stars 4, 6, 24, 73
  central 112, 120, 122, 133
  close 58
  hard 73, 79, 88, 89, 90, 94
  initial 87
  soft 74, 76, 87, 93
  tight 95, 97
  dissolution of binary systems 40
  initial population 58
  multiple formation 58
Black holes 318, 383, 387
Bremsstrahlung 282

Campbell-Hénon method of concentric spherical shells 433
Capture 58
Cascades 79, 80
Central bulge 303, 304
Central density 120, 122
Central collapse 122
Central singularity 133
Clusters 423
Clusters of galaxies 103, 115, 173
  ages 113, 125
  central density 111
  Coma cluster 115, 161, 174
  dynamical evolution 125
  dynamical stability of relativistic clusters 433
  dynamical of protostars 288
  effect of a central black hole 433, 438
  evolution 73, 74, 78, 85
  expanding 62
  isolated 120, 137
  masses of 111
  non-isolated 124
  relativistic spherically symmetric star clusters 433
  spatial structure 120
  γ-law models 428
Coalescence 24, 385, 386, 389
Collapse 247, 271, 277, 447
Collapse rates 18
Collective instabilities 357
Collisional effects 350
Collisional systems 119
Collisionless stellar systems 195, 274, 276
Collisions in galactic nuclei 288
  interpenetrating 174
  inelastic 287, 288
Compact supermassive objects 379, 384
Compressive shock 21
Core 78, 81–85, 87, 90, 92, 93, 94
  collapsed 123
  evolution 58
  expansion 59
  radius 103
Core-halo formation 133
Correlation 36, 77, 78
Corotation radius 302, 316
Corotation resonance 310, 312
Cosmology 272, 284
Cosmological infall 271, 272, 274
Cross-section 90, 94
Crossing of two shells 437
Crowding 102
Cubic systems 62
Cyanogen gradients 282

Degrees of freedom 450
Density wave 50, 319
Density wave theory 301
Detailed balance conditions 76
De Vaucouleurs law 284
Diffusion coefficients 133
Disc 263, 264, 265, 367
  axisymmetric 356
  exponential 266
  formation and dynamics 288
  formation of the solar system disc and the disc of planetary satellites 288
  of the galaxy 321
  rotating 399, 400, 401
  stationary 359
  z-structure 371
Dispersion relation 48, 304, 310
Disruption 24
Dissipation 255, 256, 282

https://doi.org/10.1017/S0074180900015783 Published online by Cambridge University Press

Dissipationless collapse 271, 283
Dissolution 137
Dissolution of invariant curves 213, 243
Distribution
  age 125
  density 11, 12, 125, 252
  equilibrium 76, 77, 78, 87
  function 140, 424
  Holtsmark 33
  mass distribution 145
  mass-angular momentum distribution 367
  lowered Maxwellian 9, 10
  Maxwellian 4, 8, 9, 10, 76, 78, 141
  momentum 355
  Poisson 92
  surface brightness 257
  velocity distribution 10, 17, 103, 136
  isotropic velocity distribution 104, 136
  anisotropic velocity distribution 104, 106, 111
Dominant term 141
Dynamics of colliding cloudlets 288
Dynamical evolution 119
Dynamical friction 164, 254, 279
Dynamics of a gravitating system of colliding particles 288
Dynamics of Saturn's ring 288

Eccentricity 75, 94
Ejection 405
Electrography 101, 102, 110
Encounters 133
  close 70, 79, 85, 88
  distant 80, 88, 94
  superlastic 59
  two-body 7, 78, 139
  three-body 73, 77
Energy
  binding 426
  core 28
  escape 83
  flow 134
  sink 58
  source 134
  total 137
Envelope 276, 277, 279, 283, 284
Epicyclic approximation 237, 238
Epicyclic resonance 310
Epicyclic variables 238
Equal-mass models 81
Equation
  Boltzmann equation 245, 275, 276, 448
  Collisionless Boltzmann equation 47, 195, 196, 198, 279, 425
  Fokker-Planck equation 4, 15, 73, 120, 149, 448, 449
  kinetic equation 76
  Kolmogorov-Feller equation 448
  Kortewert-de Vries equation 220
  Liouville equation 104
  Navier-Stokes equation 261
  Poisson's equation 205
  tensor virial equation 305
  equation of state of a shell of collisionless particles 435
Equipartition 77, 94
Ergodic system 218
Escape of stars 4, 5, 6, 8, 13, 20, 93, 123
Escape rate 57, 85, 86, 88, 89, 92, 123, 124, 125, 126
Escape mechanisms 57, 123
Escape velocity 4
Evolution 133, 387, 424
Exchange 58, 85

Fluid-dynamical model 120, 149
Fluid MacLaurin spheroïd 199
Force correlation 34
Formation of supermassive objects 384
Fourier transforms 349
Fragmentation 389
Fully ionized plasma 143

Galactic discs 263
Galactic mass models 227
Galactic nuclei 249, 282, 379
Galaxies 247
  barred 195
  bulge 367
  cD galaxy 116
  double 167
  early type 373
  ellipticity 252, 253, 262, 281
  flattening 281, 282, 283
  formation 247
  interacting 358
  irregular-type 331
  penetrating 175
  rotating 272, 279, 283
  satellite 358
  Schmidt model 361
  Seyfert galaxies 401
  spiral galaxy 263, 332
  21 cm data 335
  CG 1124+54 382
  IC 342 342
  Markarian 205 380
  M 31 282, 342
  M 32 282
  M 33 342
  M 81 342
  M 87 381, 401
  NGC 1275 381, 382, 387
  NGC 3115 451
  NGC 3379 282

https://doi.org/10.1017/S0074180900015783 Published online by Cambridge University Press

NGC 4319 380
NGC 4697 274, 279, 281, 283, 284
NGC 5253 451
NGC 6946 342
Elliptical galaxies 102, 113, 195, 207, 234, 247, 252, 262, 271, 272, 274, 277, 279, 281, 283, 332
dwarf 108
isophotes 263
masses 115
rotations 115

Gas cloud 93
Gas dynamical models 253, 257
Gas loss 258, 259
Globular clusters 91, 92, 102, 103, 120, 123, 134, 271, 282
cores 447
shape of orbits 107
M3 111
M5 110
M 15 112
Gravitational clustering 250
Gravitational radiation reaction 298
Gravitational redshift 433
Gravitational shocks 126
Gravitational slingshot 390
Gravitational systems 61
Gravitational torques 266, 268
Gravothermal catastrophe 5, 6, 424, 430, 449
Guiding center rod plasma 179

Halo 85, 87, 90, 93, 129, 265, 299, 302, 303, 312, 315, 317, 318, 361, 368
Halo buildup 20
Halo growth 12, 13
Hamiltonian 209
Heteroclinic points 214
Hierarchical triple system 58
Homoclinic points 214
Homological model 138
Horizontal branch 110
Hubble's law 271, 272, 276, 277, 282, 283, 284

Impact parameters 75, 91
Infall 250, 253, 258, 265, 267, 281, 282, 283
Infall models 253
Initial condition 77, 82
Instability 266, 427
axisymmetric 352
bar 303, 352
dynamic 298, 306
gravothermal 16, 17, 18, 20, 23, 249
local 310
secular 298
Integrated UBV colors 372
Interaction of resonances 213, 214
Integrable system 210, 212
Interstellar clouds 126
Invariant curve 210
Invariant points 212
Islands 212
Isolating integral 239, 240, 243, 426
Isolated systems 8
Iosphote shapes 114
Isothermal core 12, 16, 20
Isothermal models 426
Isothermal spheres 5, 9, 17, 161

Jacobi's integral 238, 240
Jets 381

Kinetic theory of surface layers 435

Lacertids 381
Lagrange-Jacobi identities 65
Landau damping 50, 302, 307
Laplace transform 198, 200, 202, 203
Legendre polynomials 205
Lens 369
Limiting radius 103, 107
Lindblad resonances 237, 310, 312, 316
Local density wave 316
Low mass stars 156
Luminosity functions 110, 125, 129, 152, 325

MacLaurin spheroïds 202, 298, 301, 305, 317
Magellanic Clouds 451
Marginal adiabatic mode 190
Marginal adiabatic mode theory 186
Masses 151
dependence 84
equal 133
function 151, 156
locally missing 321
loss 88, 126
missing 325
segregation 58, 84, 90, 107, 110, 120, 125, 164
spectrum 74, 84
stratification 5, 18, 22, 23, 24
total 129
unequal 133
Mass to light ratio 24, 151, 208, 338, 341
Massive objects 399
Median radius 126, 129
Metal abundances 248, 258, 264
Metal enrichment 372
Method of harmonic balance 238
Method of moments 321
Microcanonical ensemble 97
Monte Carlo computations 7, 8, 14, 19, 24, 94
Monte Carlo method 81, 90, 448
Monte Carlo models 120, 136
Motion of a spherical shell in general relativity 434

https://doi.org/10.1017/S0074180900015783 Published online by Cambridge University Press

Multi-pulsar systems 380
Muons 95
M-dwarfs 318, 321–323, 325, 372

N-body calculations 57, 66, 133, 175, 301, 303, 349
N-body models 95, 120, 123, 126, 129
N-body problem 120
Night sky 102
Non-dominant terms 133
Non-resonant orbits 239
Non-spherical perturbations 429
Normal form of Hamiltonian 210
Numerical experiments 61, 119, 205
Numerical study 287

Occultation photometry 92
Observational domain 100
Observational techniques 139
Old stellar populations 227
Open clusters 91, 92, 101, 112, 119, 126
  lifetimes 126, 129
  Hyades 112, 125, 129, 159
  M67 129
  NGC 188 129

Panoramic detector 101
Perigalactic distance 117
Periodic orbits 239
Phase space 140
Photoelectric observations 101
Photography 101
Plummer's model 67, 78, 80, 117, 120, 136
Polytrope 306, 307, 426
Population type II 6
Proper motions 102, 159
Protocloud 368
Protogalaxies 250, 260, 271, 277, 278, 279, 281
Pulsars 383

Quasi-integrals 54
Quasi-periodic orbit 211
Quasi stellar objects 380, 401, 433

Radial color variations 372
Radial potential function 7
Radio sources
  extended 382
  spinars 380, 383, 387
  structures 397
  variable 401
  Cen A 391
  Cygnus A 383
  DA240 383, 391
  P1205-008 381
  Perseus A 381
  3C236 382, 391
  3C 273 380
  3C 390-3 383
Random force 33
Randomizing action of the tidal field 54
Rankine vortex 191
Rate function 74, 76, 77, 79, 90
Rate of evolution 145
Reaction rates 74
Relaxation 73, 77, 85, 87, 88, 89, 90, 91, 126, 251, 254, 277, 449
Relativistic stellar systems 423
Reprocessing 282
Resonance 85, 214
Resonant orbits 230, 237
Riemann ellipsoïds 195, 196
Rotation curve 254, 262
Rotating models 259
Rotating system 277
Rotation 260, 272, 278
Rotation curves 331, 373
Rotation number 211
RR Lyrae 110, 372
Runaway centers 111

Self energy of a shell 135
Self gravitating system 135
Shock heating 22
Solar neighbourhood 92
Spectroscopy 92
Spherical perturbations 427
Spherical systems 47, 61, 133
Spheroidal component 318
Spiral modes 316
Spiral patterns 301, 302, 316, 357
Spitzer-Schwarzschild mechanism 328
Stability 51, 53, 427, 429
  axisymmetric 304
  local axisymmetric 367
  local criterion 300
  secular 305, 429
Stable periodic orbits 240
Star formation 87, 251, 255, 256, 257, 265, 266, 268, 271, 284
Statistical mechanic 3
Stellar collapse models 251, 257
Stellar content 369
Stellar dynamics 119
Stellar encounters 104
Stellar evolution 93
Stellar MacLaurin spheroïds 198, 199
Stellar orbits 227
Stress energy tensor 425
Strip counts 101
Strong field effect 47
Surface of section 239, 240
Supernovae 24, 256, 258, 282

https://doi.org/10.1017/S0074180900015783 Published online by Cambridge University Press

Temperature 82
Test star 140
Theorem
  antispiral theorem 317
  virial theorem 4, 66, 115, 283
Theory of relaxation 139
Thermal runaway 424, 430
Third integral 216, 227, 245
Threshold energy 217
Tidal capture 167
Tidal disruption 173
Tidal effects 53, 137
Tidal fields 53, 103, 126
Tidal forces 88
Tidal interaction 271, 277, 279, 281, 283
Tidal limit 22, 99
Tidal torques 260, 278
Time
  autocorrelation 33
  time scale 77, 80, 84, 87
  of dissolution 44
  correlation 69, 70
  critical 133
  crossing 71, 75
  dynamical 75, 85
  equipartition 18, 19
  evaporation 15, 126
  relaxation 8, 22, 75, 83, 87, 88, 91, 137, 350
  shock 127
Toomre stability criterion 297, 302, 321, 323, 328
Triple system 395, 397
Tube orbits 212, 239
Turbulence 255, 268, 269
Turbulent viscosity 261, 268
Two-dimensional Navier-Stokes fluid 179
Two-dimensional systems 209
Two-stream instability 349

Unstable periodic orbits 240

Velocity dispersion 111, 151, 285, 355
Vibration modes 48
Violent relaxation 58, 107, 114, 115, 252, 271, 275, 283, 284, 371
Virial equilibrium 272
Virial tensor 70
Viscosity 261, 262, 298

W-Ursae Majoris binaries 112
Water-Bag 179, 184, 193
