

# THE EDINBURGH MATHEMATICAL SOCIETY

The Edinburgh Mathematical Society was instituted in 1883 for "the promotion and extension of Mathematical Science, Pure and Applied".

Members may subscribe to the *Proceedings* at a reduced rate. Further information about membership can be obtained from the Secretary.

The Society's address is

The Edinburgh Mathematical Society  
James Clerk Maxwell Building  
The King's Buildings  
Edinburgh EH9 3JZ

## Submission of papers

Papers to be considered for publication should be sent to the Secretary or to an Editor. Manuscripts (2 copies) should be typewritten on A4 paper with double spacing and generous margins. The style and arrangement should conform to current practice in the *Proceedings*. Each manuscript should contain a short abstract of not more than 200 words and also a primary classification number from the American Mathematical Society's 1990 Mathematics Subject Classification Scheme. References, including titles of papers, should be given in the form adopted by *Mathematical Reviews*, footnotes being avoided if possible. Figures should be separated from the text and lettered, ready for photographic reduction; their intended location should be clearly indicated. Manuscripts which are not suitable for submission to the printer will not be accepted. Authors are advised to retain a copy of any material submitted as the Society cannot accept responsibility for any loss.

A proof is supplied once. Authors are particularly requested to correct and return the proof promptly. Excessive corrections may be charged to authors. Fifty free offprints, and additional copies at cost, will be supplied if ordered on a form returned with the proof.

## Addresses of editors

C. M. Campbell  
Mathematical Institute  
University of St Andrews  
North Haugh  
St Andrews KY16 9SS

A. M. Etheridge  
School of Mathematical Sciences  
Queen Mary & Westfield College  
Mile End Road  
London E1 4NS

A. A. Lacey  
Department of Mathematics  
Heriot-Watt University  
Riccarton  
Edinburgh EH14 4AS

C. Maclachlan  
Department of Mathematical Sciences  
University of Aberdeen  
Edward Wright Building  
Dunbar Street  
Aberdeen AB24 3QY

L. O'Carroll  
Department of Mathematics and Statistics  
The University of Edinburgh  
James Clerk Maxwell Building  
The King's Buildings  
Edinburgh EH9 3JZ

S. C. Power  
Department of Mathematics  
University of Lancaster  
Lancaster LA1 4YF

# Proceedings of the Edinburgh Mathematical Society

VOLUME 40 (SERIES II), PART 2

JUNE 1997

<b>Centralizers of abelian subgroups in locally finite simple groups</b> <i>M. Kuzucuoğlu</i>	217
<b>Factorization of triangular operators and ideals through the diagonal</b> <i>John Lindsay Orr and David R. Pitts</i>	227
<b>A remark on the <math>c</math>-normality of maximal subgroups of finite groups</b> <i>Yanming Wang</i>	243
<b>Completely bounded Banach–Mazur distance</b> <i>Chun Zhang</i>	247
<b>Spectral mapping theorem for representations of measure algebras</b> <i>H. Seferoğlu</i>	261
<b>An approach to Boyle’s conjecture</b> <i>Dinh van Huynh and S. Tariq Rizvi</i>	267
<b>A reaction infiltration problem: classical solutions</b> <i>John Chadam, Xinfu Chen, Roberto Gianni and Riccardo Ricci</i>	275
<b>A comparison theorem on magnetic Jacobi fields</b> <i>Toshiaki Adachi</i>	293
<b>A new proof of N. J. Young’s theorem on the orbits of the action of the symplectic group</b> <i>Dan Timotin</i>	309
<b>Embeddings into efficient groups</b> <i>Jens Harlander</i>	317
<b>Biorthogonality in the real sequence spaces <math>\ell^p</math></b> <i>Anthony J. Felton and H. P. Rogosinski</i>	325
<b>Box dimension for graphs of fractal functions</b> <i>Gavin Brown and Qinghe Yin</i>	331
<b>Reducing the classical multipliers <math>\ell^\infty</math>, <math>c_0</math> and <math>bv_0</math></b> <i>Stephen A. Saxon and William H. Ruckle</i>	345
<b>The different and differentials of local fields with imperfect residue fields</b> <i>Bart de Smit</i>	353
<b>Positive definite kernels and Hilbert <math>C^*</math>-modules</b> <i>Gerard J. Murphy</i>	367
<b>A remark on the tensor product of two maximal operator spaces</b> <i>Christian Le Merdy</i>	375
<b>Families of <math>SU(2)</math> representations for mapping cylinders of periodic monodromy</b> <i>G. Daskalopoulos, S. Dostoglou and R. Wentworth</i>	383
<b>Some integer-valued trigonometric sums</b> <i>Graeme J. Byrne and Simon J. Smith</i>	393
<b>Book Reviews</b>	403
