

OUT NOW

Surveys the fascinating history of the study of language, from its beginnings in ancient Mesopotamia and Egypt to the diversification of the language sciences in the past half-century.

“ The wide chronological and geographical scope, the broad view of the language sciences in their relation to psychology, sociology and anthropology, the accuracy of historiographical analysis, avoiding unnecessary technical jargon, and the comprehensive coverage up to the most recent developments, make the CHL a major reference work for teachers and students of linguistics, and readers interested in the fascinating history of language study.”

Pierre Swiggers, University of Leuven and Université de Liège

“ [A]n impressive one-volume accomplishment which is remarkable by its depth - it spans more than twenty centuries of learned thinking about language - by its breadth - across centuries and across continents - and by the diversity of its themes - a fresco across centuries with a large section devoted to present-day linguistics and interdisciplinary work on language”

Georges Daniel Veronique, Professor emeritus, Aix-Marseille Université

STUDIES IN SECOND LANGUAGE ACQUISITION

Information for Contributors

For guidelines and requirements regarding manuscript submission, please consult the *SSLA* website at <http://journals.cambridge.org/sla>. Click on the Journal Information tab which will lead you to Information for Contributors. Potential authors are advised that all manuscripts are internally reviewed for both content and formatting/style in order to determine their suitability for external evaluation.

Research Article. These manuscripts may be essays or empirical studies, either of which must be motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 11,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 10,000 word limit).

Research Report. These manuscripts are shorter empirical studies motivated by current theoretical issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design. Very often, these are narrowly focused studies or they present part of the results of a larger project in progress. The background and motivation sections are generally shorter than research articles. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Replication Study. These manuscripts are empirical studies that replicate the research design and methods of a previously published study, with or without changes. The study selected for replication should have impacted empirical and/or theoretical work relevant to SLA. Replications can be direct (exact, close, approximate) or conceptual, and should identify and motivate the study selected for replication as well as any changes made. The maximum length is 10,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication).

State-of-the-Scholarship Article. These manuscripts are essays that review the extant research on a particular theme or theoretical issue, offering a summary of findings and making critical observations on the research to date. Manuscripts in this category typically fall within the 10,000-word limit; however, longer manuscripts may be considered on a case-by-case basis.

Critical Commentary. These manuscripts are shorter essays (i.e., non-empirical) motivated by current theory and issues in second and subsequent language acquisition or heritage language acquisition, including methodological issues in research design and issues related to the context of learning. Maximum length is 6,000 words all-inclusive (i.e., abstract, text, tables, figures, references, notes, and appendices intended for publication must all fall within the 6,000 word limit).

Methods Forum. Recognizing the need to discuss and advance SLA research methods, these manuscripts seek to advance methodological understanding, training, and practices in the field. Submissions can be conceptual or empirical; we also encourage articles introducing novel techniques. All research paradigms, epistemologies, ontologies, and theoretical frameworks relevant to SLA are welcome. The target length is up to 10,000 words, although longer manuscripts will be considered with justification.

All manuscripts in all categories are peer reviewed and subject to the same high standards for publication in *SSLA*.

Studies in Second Language Acquisition

Volume 45 Number 4 September 2023

RESEARCH ARTICLES

- Comparing the longitudinal development of phraseological complexity across oral and written tasks*
Nathan Vandeweerd, Alex Housen, and Magali Paquot 787–811
- The effects of interleaved and blocked corpus-based practice on L2 pragmatic development*
Ying Zhang 812–837
- Learning words with unfamiliar orthography: The role of cognitive abilities*
Marie-Josée Bisson 838–852
- Individual differences modulate sensitivity to implicit causality bias in both native and nonnative processing*
Tingting Wang and Alison Gabriele 853–881
- Examining the effectiveness of bilingual subtitles for comprehension: An eye-tracking study*
Andi Wang and Ana Pellicer-Sánchez 882–905
- Quantifying proper nouns' influence on L2 English learners' reading fluency*
Christopher Nicklin, Allie Patterson, and Stuart McLean 906–929
- Development of automaticity in processing L2 collocations: The roles of L1 collocational knowledge and practice condition*
Hyojin Jeong and Robert DeKeyser 930–954
- Individual differences in self-regulated learning profiles of Chinese EFL readers: A sequential explanatory mixed-methods study*
Jiangping Chen, Chin-Hsi Lin, Gaowei Chen, and Huafang Fu 955–978
- Spanish heritage language learners' motivational profile in the postsecondary classroom: Insights from psychological network modeling*
Janire Zalbidea, Diego Pascual y Cabo, Sergio Loza, and Alicia Luque 979–1003
- Variability as a functional marker of second language development in older adult learners*
Simone E. Pfenninger and Maria Kliesch 1004–1030
- Effects of speaking task and proficiency on the midclause pausing characteristics of L1 and L2 speech from the same speakers*
Amanda Huensch 1031–1055

RESEARCH REPORT

- Perceptual integrality of foreign segmental and tonal information: Dimensional transfer hypothesis*
William Choi and Rachel Ka-Ying Tsui 1056–1073

REPLICATION STUDIES

- Language proficiency modulates listeners' selective attention to a talker's mouth: A conceptual replication of Birulés et al. (2020)*
Theres Grüter, Jieun Kim, Hitoshi Nishizawa, Jue Wang, Raed Alzahrani, Yu-Tzu Chang, Hoan Nguyen, Michaela Nuesser, Akari Ohba, Sachiko Roos, and Mayuko Yusa 1074–1089
- Predicting L2-Spanish fluency from L1-English fluency and L2 proficiency: A conceptual replication*
Susana Pérez Castillejo and Katherine Urzua-Parra 1090–1103

METHODS FORUM

- Free classification as a method for investigating the perception of nonnative sounds*
Danielle Daidone, Ryan Lidster, and Franziska Kruger 1104–1130
