

GASKELL

THE ROYAL COLLEGE OF PSYCHIATRISTS

**THE MISUSE
OF PSYCHOTROPIC DRUGS**

Edited by

***Robin Murray, Hamid Ghodse, Conrad Harris,
David Williams and Paul Williams***

Published March 1981.

Pp 73+index.

£5.00 *(including postage & packing)*

“... provides for the first time in short space a rounded picture of what is today known about the problems of psychotropic substance misuse... We are still unsure why the problem of psychotropic drug misuse has come upon us, and of the proper balance between too much and too little concern. The *framework* within which to see these matters is still unclear and our usual repertoire of ideas may appear rather wanting when we get close to real understanding of why the young mother in the tower block takes benzodiazepines.”

Professor Griffith Edwards,
(from the Foreword)

The book is divided into seven sections, including effects on daily life, use and misuse in general practice, self-poisoning, work of accident and emergency units, and the relation between ‘hard’ and ‘soft’ drug abuse.
