#### **Editor**

Dieter H. H. Hoffmann, GSI Darmstadt, Germany

*Laser and Particle Beams* is an international journal which deals with basic and applied physics issues of intense laser and particle beams, and the interaction of these beams with matter. Research on pulse power technology associated with beam generation is also of strong interest.

***Managing Editor***

Simon Mitton, University of Cambridge, UK

Astrobiology combines the sciences of biology, chemistry, palaeontology, geology, atmospheric physics, planetary science, astrophysics and cosmology in the study of the origin, evolution and distribution of life in the universe. The *International Journal of Astrobiology* acts as an important forum for practitioners in this rapidly expanding field.

Fantastic New and Forthcoming Titles  
from Cambridge!

**The Plasma Universe**

Curt Suplee

\$20.99; Pb: 978-0-521-51927-4; 88 pp.

*Prices subject to change.*

*New in Paperback!*

**Fundamentals of  
Plasma Physics**

Paul M. Bellan

\$75.00; Pb: 978-0-521-52800-9; 630 pp.

**Plasma Physics and  
Fusion Energy**

Jeffrey P. Freidberg

\$72.00; Pb: 978-0-521-73317-5; 692 pp.

## Instructions for Authors

**Editorial policy** The journal welcomes submissions in any of the areas of plasma physics. Its scope includes experimental and theoretical work on basic plasma physics, the plasma physics of magnetic and inertial fusion, laser–plasma interactions, industrial plasmas, plasma devices and plasmas in space and astrophysics. This list is, of course, merely illustrative of the wide range of topics on which papers are invited, and is not intended to exclude any aspect of plasma physics that is not explicitly mentioned.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers. Manuscripts must be written in English. *Journal of Plasma Physics* employs a rigorous peer-review process whereby all submitted manuscripts are sent to recognized experts in their subjects for evaluation. The Editors' decision on the suitability of a manuscript for publication is final.

**Submission of manuscripts** Papers may be submitted to the Editor or any of the Associate Editors, preferably by email in pdf format. When a paper is accepted, the authors will be asked to supply source files in LaTeX or Word. Instructions for the preparation of these files and LaTeX style files are given in the Instructions for Contributors link at [journals.cambridge.org/pla](http://journals.cambridge.org/pla).

**Incremental publishing and DOIs** In order to make articles which have been accepted for publication in *Journal of Plasma Physics* available as quickly as possible, they are now published incrementally online (at Cambridge Journals Online; [journals.cambridge.org](http://journals.cambridge.org)) The online version is available as soon as author corrections have been completed and before the article appears in a printed issue. A reference is added to the first page of the article in the journal catchline. This is the DOI – Digital Object Identifier. This is a global publishers' standard. A unique DOI number is created for each published item. It can be used for citation purposes instead of volume, issue and page numbers. It therefore suits the early citation of articles which are published on the web before they have appeared in a printed issue. See [journals.cambridge.org/pla](http://journals.cambridge.org/pla).

**Proof reading** Only typographical or factual errors may be changed at proof stage. The publisher reserves the right to charge authors for correction of non-typographical errors.

**Offprints** 50 offprints of each article will be supplied free to each first-named author. Extra offprints may be purchased from the publisher if ordered at proof stage. No page charge is made.

**Copying** This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per copy fee of \$16.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022–3778/2009 \$16.00.

*ISI Tear Sheet Service*, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

*For all other use*, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

# JOURNAL OF PLASMA PHYSICS

Volume 75 Part 4 August 2009

## CONTENTS

### Letter to the Editor

- Excitation of electrostatic ion-cyclotron-like modes by the electron density ripple in dusty magnetoplasmas  
P. K. SHUKLA 433

### Articles

- A length-scale formula for confined quasi-two-dimensional plasmas  
TIMOTHY D. ANDERSEN and CHJAN C. LIM 437
- Dust acoustic solitary waves in non-thermal plasmas consisting of negatively charged dust grains and isothermal electrons  
ANIMESH DAS and ANUP BANDYOPADHYAY 455
- Multi-dimensional instability of dust-ion-acoustic solitary waves in a multi-ion dusty plasma  
M. G. M. ANOWAR and A. A. MAMUN 475
- Instability of higher harmonic electrostatic ion cyclotron waves in a negative ion plasma  
M. ROSENBERG and R. L. MERLINO 495
- Study of plasma parameters in a staged pinch device using current-stepping technique  
FARAH DEEBA, KAMALUDDIN AHMED, MAHNAZ QADAR HASEEB and ARSHAD M. MIRZA 509
- Effect of steady flow and Newton's cooling on the propagation and damping of small-amplitude prominence plasma oscillations  
K. A. P. SINGH and B. N. DWIVEDI 517
- A comparative study of the filamentation and Weibel instabilities and their cumulative effect. II. Weakly relativistic beams  
A. STOCKEM, M. LAZAR, P. K. SHUKLA and A. SMOLYAKOV 529
- Focusing of a ring ripple on a Gaussian electromagnetic beam in a magnetoplasma  
SHIKHA MISRA and S. K. MISHRA 545
- Filamentation instability in a collisional magnetoplasma with thermal conduction  
MAHENDRA SINGH SODHA and MOHAMMAD FAISAL 563
