CNS SPECTRUMS

CONTENTS

EDITORIAL

**Metabolites: novel therapeutics or “me-too” drugs?
Using desvenlafaxine as an example**

Thomas L. Schwartz 103

OPINION

**Opportunities for reversible inhibitors of monoamine
oxidase-A (RIMAs) in the treatment of depression**

Christopher T. Lum and Stephen M. Stahl 107

ORIGINAL RESEARCH

**High-dose desvenlafaxine in outpatients with major
depressive disorder**

James M. Ferguson, Karen A. Tourian
and Gregory R. Rosas 121

**An indirect comparison of the efficacy and safety of
desvenlafaxine and venlafaxine using placebo as
the common comparator**

Kristina A. Coleman, Vanessa Y. Xavier, Trish L. Palmer,
James V. Meaney, Libby M. Radalj and Louise M. Canny 131

**Age and risk for depression among the elderly:
a meta-analysis of published literature**

Ke-Xiang Zhao, Chang-Quan Huang, Qian Xiao,
Yuan Gao, Qing-Xiu Liu, Zheng-Rong Wang,
Yong-Hong Li and Yi-Zhou Xie 142

**Serum levels of brain-derived neurotrophic factor
(BDNF), BDNF gene Val66Met polymorphism,
or plasma catecholamine metabolites, and response
to mirtazapine in Japanese patients with major
depressive disorder (MDD)**

Asuka Katsuki, Reiji Yoshimura, Taro Kishi, Hikaru Hori,
Wakako Umene-Nakano, Atsuko Ikenouchi-Sugita,
Kenji Hayashi, Kiyokazu Atake, Nakao Iwata
and Jun Nakamura 155

Editor-in-Chief

Stephen M. Stahl, Adjunct Professor of Psychiatry at the University of California San Diego, USA;
Honorary Visiting Senior Fellow at the University of Cambridge, UK.

Field Editors

Terence Arthur Ketter, Stanford University, USA
Gerard Sanacora, Yale University School of Medicine, USA
Carlos A. Zarate, National Institute of Mental Health, USA

Deputy Editor

Thomas L. Schwartz, SUNY Upstate Medical University in Syracuse, USA

Editorial Board

Dennis S. Charney, Mount Sinai School of Medicine, USA
Maria Conceição do Rosario, University of São Paulo Medical School, Brazil
Jeffrey L. Cummings, Cleveland Clinic, USA
Thilo Deckersbach, Harvard Medical School, USA

Aims and Scope

CNS Spectrums aims to be the premiere journal covering all aspects of clinical neurosciences, neurotherapeutics and neuropsychopharmacology. From 2012 the journal will primarily focus on the publication of authoritative, cross-disciplinary review and opinion material publishing advances and controversial issues with pertinence to the clinician. In particular we aim to publish reviews and articles in translational neuroscience, biological psychiatry and neuropsychopharmacology that explain clinically relevant neuroscience discoveries in a way that makes these findings accessible and understandable to

Cover Image: The image on the cover shows a hypothetical model whereby glutamate is released from an intracortical pyramidal neuron and binds to an NMDA receptor on a GABA-ergic interneuron. GABA is then released and binds to receptors on the axon of another glutamate pyramidal neuron. This inhibits the neuron, thus reducing the release of cortical glutamate. The GABA interneuron and its NMDA synapse from the first neuron to the second is the hypothetical site of glutamate dysfunction in schizophrenia.

clinicians and clinical investigators. We will emphasize new therapeutics of all types in clinical neurosciences, mental health, psychiatry, and neurology, especially first in man studies and proof of concept studies. Our focus will be not just drugs, but novel psychotherapies and neurostimulation therapeutics as well. *CNS Spectrums* will in addition, continue to publish original research and commentaries that focus on emergent areas of research. Subject coverage shall span the full spectrum of neuropsychiatry focusing on translational issues and those crossing traditional boundaries between neurology and psychiatry.

Submitting Manuscripts to CNS Spectrums

All submissions to *CNS Spectrums*, should be prepared in accordance with the instructions for authors and in the style of the Journal. Manuscripts should be submitted through the dedicated *CNS Spectrums* ScholarOne Manuscripts website: <http://mc.manuscriptcentral.com/cnsspectr>

CNS Spectrums will consider and encourage the following types of articles for publication: **Review Article**—Comprehensive article summarizing and synthesizing the literature on various topics presented in a scholarly and clinically relevant fashion; **Original Research**—Reports the results of a clinical study and contains original research; **Opinion**—Address a current topic of high interest, which has substantial evidence but has not yet been established; **Commentary**—An article that is written in reaction to previously published articles; usually encouraging a level of debate; the journal will also include **Brainstorms** and **Editorials** that shall be commissioned or written by the Editor in Chief.

Instructions for Contributors

The Instructions for Contributors are available on the Cambridge Journals Online web site at: <http://journals.cambridge.org/CNSifc>

Indexing

CNS Spectrums is indexed by *Index Medicus/ MEDLINE* and *Web of Science* (Thomson Reuters) as well as appearing in the annual *Journal Citation Report*. Introduced in 1996, the journal was acquired in whole by Cambridge University Press in November of 2011.

Subscriptions

Institutional print and electronic: £426/\$660; Institutional electronic only: £355/\$550.
