JOY IN WORK, GERMAN WORK

The National Debate, 1800–1945

Joan Campbell

This book analyzes in vivid detail the German debate about the importance and meaning of work as it changed under the impact of industrialization, with special emphasis on the period between the two world wars. A social history of ideas, it covers the writings of such thinkers as Hegel, Marx, and Weber, but also examines contributions made by industrial psychologists, engineers, educators, and others who actively promoted reforms. A final section deals with the National Socialists, who promised to reinvigorate the German work ethic, restore joy in work, and reintegrate the German worker into the Volk community.

“Professor Campbell has written an incredibly rich and exhaustive account of German concepts of work since the late nineteenth century. She is able to demonstrate that the intensive debate on the nature and politics of work represents a central clue to modernization and its political and cultural ramifications. Her conclusion that the period of a national concept of work has drawn to an end in the last twenty years is sure to spark lively debate.”

Wilhelm II

Prince and Emperor, 1859–1900
