

NEW IN ECONOMICS FROM OXFORD UNIVERSITY PRESS

THE EUROPEAN ECONOMY BETWEEN THE WARS

CHARLES FEINSTEIN, PETER TEMIN,
AND GIANNI TONIOLO

"Soon to be the definitive introduction to the history of the European economy between the wars. The book incorporates the most recent research and strikes just the right balance between incisiveness and detail. No student will want to be without it."

—Barry Eichengreen,
University of California, Berkeley

THE PEOPLE AND THE BRITISH ECONOMY: 1830-1914

Land of Hope and Glory

RODERICK FLOUD

This book looks back to a Britain that was the major trading nation on the globe, the carrier of most of the world's goods, by far the largest investor overseas, and the center of the international financial system. Floud describes the overall wealth of Victorian and Edwardian times—how and why income grew as it did, and how such surplus was distributed between different people within the population.

BEYOND THE BOUNDARIES Life and Landscape at the Lake Superior Copper Mines, 1840-1875

LARRY D. LANKTON

Lankton focuses on the reluctant yet resourceful pioneers of Upper Michigan's Keweenaw Peninsula, detailing the mine activity and the hostile environment that informed their daily lives. This first-rate social history will appeal to historians of the frontier and of Michigan and the Great Lakes region, as well as students of technology, labor, and everyday life.

JOHN LAW Economic Theorist and Policy-Maker

ANTOIN E. MURPHY

John Law (1671-1729) is most widely known outside economics as a rake, duelist, and gambler. This intellectual biography of the Scottish-born maverick details his role as a significant thinker during the earliest phases of economic conceptualization. It also reveals the reasons for his ultimate failure.

EXTERNAL SHOCKS AND DOMESTIC ADJUSTMENTS Pakistan's Case, 1970-1990

SYED NAWAB HAIDER NAQVI
AND KHWAJA SARMAJ

Exploring the connection between external economic shocks and domestic adjustments in Pakistan during two financially turbulent decades, this book traces the origin of recurring external payment problems due to a lack of adequate domestic adjustments. Such problems are primarily caused, according to the authors, by abrupt changes in the behavior of international goods and capital markets.

WELFARE AS WE KNEW IT A Political History of the American Welfare State

CHARLES NOBLE

This book explains why the US welfare state does less than other Western welfare states to help people in need. Drawing on recent research on how political institutions, class politics, and racial divisions shape public policy, and also employing a close analysis of four periods of welfare state expansion and contraction, Noble shows how deeply-rooted structural, institutional, and organizational factors limit the possibilities for change, and then suggests what social reformers might do about it.

Studies in American Political Development

**CAMBRIDGE
UNIVERSITY PRESS**

Editors

Karen Orren, University of California, Los Angeles
Stephen Skowronek, Yale University

Studies in American Political Development publishes high quality scholarship covering American political change and institutional development from a historical perspective. Articles focus on government institutions and their social, economic and cultural environment. The journal features in-depth original articles, which allow scholars to elaborate on the complex patterns of state-society relations. These longer articles also encourage an interdisciplinary approach-- tying in relevant issues and related themes. In addition, *SAPD* recognizes the importance of comparative politics to the study of American institutions.

THE PROMISE OF PRIVATE PENSIONS

The First Hundred Years

STEVEN A. SASS

In this new institutional history, Steven Sass explores the rise and growth of the financial support system that today commands trillions of dollars of investment capital and supports hundreds of thousands of older Americans. As he shows, creating the pension system proved far more complicated than anyone had anticipated. Over the last hundred years it has evolved into a complex institution driven by congressional mandates, judicial/administrative decisions, union campaigns, political debates, and the ministrations of lawyers, economists, human resource specialists, actuaries, and insurance experts. Sass traces the U.S. pension system through to the present day, exploring how our modern corporate economy is confronting the challenges of an aging population.

Revolution at the Checkout Counter

The Explosion of the Bar Code

STEPHEN A. BROWN

The Universal Product Code (U.P.C.)—a small rectangle of black and white bars—adorns virtually every retail item we purchase. Yet twenty-five years ago, the U.P.C. was a mere kernel of an idea shared by a small cadre of manufacturing and chain store executives. Here Stephen Brown, the legal counsel of those pioneering executives, traces its origin and evolution.

The development of the U.P.C. illustrates the process of setting industry standards without government intervention and shows how systems of complementary technologies evolve. The economic consequences of the U.P.C. are investigated in an introduction by Professor John T. Dunlop and Jan Rivkin.

European Review of Economic History

Editors:

TIMOTHY J. HATTON, University of Essex

KARL GUNNAR PERSSON, University of Copenhagen

VERA ZAMAGNI, University of Bologna

Cambridge University Press is pleased to announce the launch of a new journal for European economic history, published in association with the Institute of Economics, University of Copenhagen, for the European Historical Economics Society.

European Review of Economic History provides an important new source of insight into European economic history, which is accessible to readers from a variety of different backgrounds. The objective is to further research, scholarship and understanding of economic structure, change and economic development in Europe since early modern times. Contributions shed new light on existing debates, raise new or neglected topics and provide new perspectives from comparative research. The *Review* includes full-length articles, shorter articles, notes and comments, debates, survey articles and review articles. It also publishes notes and announcements from the European Historical Economics Society.

*Tri-annual (ISSN 1361-4916) • Subscription to Volume 1 (1997):
Institutions \$89.00 • Individuals \$54.00*

New in Economics

In Pursuit of Leviathan

Technology, Institutions, Productivity, and Profits in American Whaling, 1816-1906

**LANCE E. DAVIS, ROBERT E. GALLMAN,
AND KARIN GLEITER**

In Pursuit of Leviathan traces the American whaling industry from its rise in the 1840s to its precipitous fall at the end of the nineteenth century. Providing a wealth of historical information, it is a classic industry study that will provide intriguing reading for anyone interested in the history of whaling.

National Bureau of Economic Research Series on Long-Term Factors in Economic Development

The Post-Cold War Trading System

Who's on First?

SYLVIA OSTRY

"The worst cliché today is that the end of the Cold War changes everything. Sylvia Ostry uses it brilliantly, however, to tell us where the world trading system is headed and why. I know of few other analyses that have her firm grasp and bold insights. A tour de force!"—Jagdish Bhagwati, Columbia University and Economic Policy Advisor to Director General,

A History of Corporate Finance

Jonathan Baskin and Paul J. Miranti, Jr.

"Business corporations, once rare, have become the dominant organization of the modern economy. The corporation as we know it owes its existence to a long history of financial innovations—in institutions, markets, and instruments (securities). This is the first in-depth history to tell us how it all happened, from the merchants and bankers of medieval and Renaissance Italy to today's corporate managers and wizards of Wall Street. Students of business, economics, finance, law, and history will learn much from it."

— Richard Sylla, New York University

MACROECONOMIC DYNAMICS

Editor

WILLIAM A. BARNETT, Washington University, St. Louis

This inaugural special edition includes such important contributors as:

He Huang, Selahattin Imrohorglu, Thomas J. Sargent, Kenneth L. Judd, Jess Gaspar, John Heaton, Deborah Lucas, Andrew W. Lo, A. Craig MacKinlay, A. Ronald Gallant, George Tauchen, Jennifer Huang, Jiang Wang, Wilbur John Coleman II, Harold H. Zhang, Michael A. Trick, Stanley E. Zin, Lars Peter Hansen, Timothy G. Conley, Wenfang Liu, John H. Cochrane, Yacine Ait-Sahalia, Jesus Saa-Roquejo, Lawrence J. Christiano, Jonas D.M. Fisher, Ravi Bansal, Bruce Lehmann, Wouter den Haan, Anthony Smith, Per Krusell, Pamela Labadie, Kent Daniel, David Marshall, William Barnett, Yi Liu, Haiyang Xu, Mark Jensen, and Clifford R. Wymer

Macroeconomic Dynamics will publish theoretical, empirical or quantitative research of the highest standard. Papers are welcomed from all areas of macroeconomics and from all parts of the world. Major advances in macroeconomics without immediate policy applications will also be accepted, if they show potential for application in the future. Occasional book reviews, announcements, conference proceedings and interviews will also be published. An electronic version of the journal will be published simultaneously with the paper version enabling immediate access to the best current research in macroeconomics.
