Erratum

Hayes, B. J., Visscher, P. M. & Goddard, M. E. (2009). Increased accuracy of artificial selection by using the realized relationship matrix. *Genetics Research* **91**, 47–60.

Abstract, last sentence, should read:

If the heritability of the trait is 0·3, and $N_e = 100$, approximately 12 474 individuals with genotypes and phenotypes are required in order to predict GEBVs of un-phenotyped individuals in the same population with an accuracy of 0·7.

Second last sentence of the Discussion should read:

For example, if the heritability of the trait is 0·3, and $N_e = 100$, approximately 12 474 individuals with genotypes and phenotypes are required in order to predict GEBVs of un-phenotyped individuals in the same population with an accuracy of 0·7.

The published version of Figure 3 should be replaced with the Figure below.
Caption Figure 3, the $N_e = 1000$ should be replaced with $N_e = 100$.
