RECENT DEATHS

William W. Wasley

Dr. William W. Wasley, 50, known for his archaeological research in Arizona and Mexico, died April 2, 1970 in Magdalena, Sonora. He was born in Mexico and educated in the United States. Dr. Wasley earned the B.A., M.A., and Ph.D. degrees at the University of Arizona in the 1950's. Since 1955 he held the position of state archaeologist on the staff of the Arizona State Museum at the University of Arizona.

Dr. Wasley was the author of 28 scholarly publications and was working on two significant projects at the time of his death. One involved an archeological survey of the state of Sonora, Mexico. The field work was originally supported by a National Science Grant in 1966–67. The second project concerned his work as one of the discoverers of the grave of Father Eusebio Francisco Kino, famous Jesuit missionary, who died in Sonora in 1711. Dr. Wasley spent, over the past decade, a considerable amount of time pursuing his interest in the sites of the Spanish Colonial period in northwest Mexico and Arizona.

The loss of Dr. Wasley to the field of archaeology will be strongly felt by friends and colleagues on both sides of the international border.
