

INTERNATIONAL JOURNAL OF

MICROWAVE AND WIRELESS TECHNOLOGIES

Special Issue: EuMCE 2019 Special Issue (Part II)

CONTENTS

A highly efficient GHz switching GaN-based synchronous buck converter module Andreas Wentzel, Oliver Hilt, Joachim Würfl and Wolfgang Heinrich	945	FILTERS	
Scattering matrix solution for an ideal star-junction multiplexer based on ladder-type filters Patricia Silveira, Jordi Verdú and Pedro de Paco	954	Dual-/tri-band bandpass filters with fully independent and controllable passband based on multipath-embedded resonators Yang Xiong, Wei Zhang, Yue-Peng Zhong and Li-Tian Wang	1012
Increasing the Q-factor of thin planar dielectric resonator with whispering gallery modes A. E. Kogut, M. T. Islam, E. A. Kogut, Z. E. Eremenko and R. S. Dolia	960	ANTENNA DESIGN, MODELLING AND MEASUREMENTS	
The plane H-polarized electromagnetic wave scattering by pre-fractal grating of impedance strips George I. Koshovy	969	A compact wideband circularly polarized quadrifilar antenna with PIFA elements for UHF RFID readers Chawanat Lerkbangplad, Alongkorn Namahoot, Prayoot Akkaraekthalin and Suramate Chalermwisutkul	1020
High-frequency diffraction contribution by planar metallic-DNG metamaterial junctions G. Gennarelli and G. Riccio	976	Complementary Sierpinski Knopp fractal antenna for emergency management system Paulkani Iyampalam and Indumathi Ganesan	1029
Dielectric sensitivity of different antennas types for microwave-based head imaging: numerical study and experimental verification Jan Tesarik, Tomas Pokorny and Jan Vrba Jr	982	A rectangular slot antenna with perfectly conducting superstrate and reflector sheets for superior radiation in the 6–9 GHz band Ritish Kumar and A. V. Praveen Kumar	1039
On different load configurations for mixed-mode load-pull measurements, hybrid imperfections, and tuning ranges David Veit, Michael Gadringer and Erich Leitgeb	996		
A multi-function resonator based on an asymmetric tri-post rectangular waveguide section Lyudmila P. Mospan and Sergiy O. Steshenko	1005
