

At This Moment, Hospitals Everywhere Are Putting an End to Bag-Sourced UTI

The TRAVENOL H₂O₂ Technique. It Works For Them. It Can Work For You.

What these hospitals have discovered is the revolutionary TRAVENOL Hydrogen Peroxide Technique. This new drainage bag system employs a patented technique that eliminates and controls bag-sourced UTI, the primary cause of catheter-associated UTI.

The technique is simplicity in itself . . . instilling low concentrations of H₂O₂ via a convenient-to-use prefilled syringe into a CYSTOFLO® drainage bag with closed additive site. The system's wide acceptance is due to the fact that it works by killing and controlling a broad spectrum of urinary tract pathogens before they can reach and infect your patients.

Join the score of other hospitals who are successfully eliminating and controlling bag-sourced UTI with the new TRAVENOL Hydrogen Peroxide Technique. Contact your Travenol Medical Products Representative today, or write for details.

The TRAVENOL Hydrogen Peroxide Technique. IT WORKS.

SPECIAL PROBLEMS DEMAND SPECIAL PRODUCTS.

New HYPO-STRUC® eliminates the problems you may have faced with present disposal systems for sharps and syringes and helps protect your health-care staff against accidental punctures and infectious contamination.

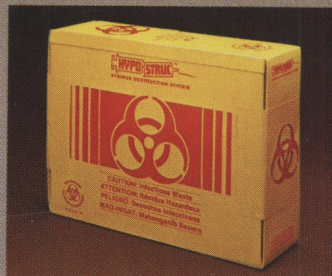

ENGINEERED FOR VERSATILITY

Strong cutting blades and sturdy construction result in total and immediate destruction of even the heaviest gauge needles and sharps. They're destroyed and automatically stored in just one simple step. Medication cart, counter-top and free-standing floor models satisfy your location needs.

BIO-WASTE CONTAINERS™ FOR SAFE STORAGE

Gusseted and virtually seamless poly-board containers are plastic-coated inside and out to provide a unique moisture and penetration barrier. The Uni-Pak Dispenser™ stores the easy-to-assemble containers neatly until they're needed.

INTERNATIONALLY-RECOGNIZED LABELING

Bright yellow and red colors with the biohazard symbol alert your staff. Cautions appear in four languages.

GUARANTEED FOR TWO YEARS

For more information about high-quality HYPO-STRUC® products, call (707) 745-6933, or write to Bio-Hazard Controls Corporation, 518 Stone Road, Benica, CA 94510.
