

## EDUCATIONAL CHOICE AND LABOR MARKETS IN JAPAN

Mary Jean Bowman

With the collaboration of Hideo Ikeda and Yasumasa Tomoda  
Bowman blends sociological and economic data to introduce new factors into the theory of the economics of education. While taking into account special features of the Japanese economic system, Bowman also stresses the need to identify commonalities among societies and individuals.

## Communism in Southeast Asia

**Justus M. van der Kroef**

The first comprehensive book-length study of Communism in Southeast Asia to appear in more than twenty years, this volume deals with the developments in each country of the critically important area. van der Kroef provides rich historical descriptions of the Southeast Asian Communist parties, their organizational techniques, and the programs and appeals they used in acquiring and retaining recruits. \$32.50

## Police and Community in Japan

**Walter L. Ames**

Japan is the only major industrialized nation with a crime rate that has either dropped or remained horizontal. Japanese police enjoy extensive community cooperation in their efforts to fight crime. Ames explores the premise that Japanese society essentially polices itself, and the police therefore consciously and skillfully make use of citizen cooperation in crime control. "An insightful study." —*Library Journal* \$22.50

## Japan before Perry

A Short History

**Conrad Totman**

Totman examines the origins of Japanese civilization and explores in detail the classical, medieval, and early-modern epochs. It is not his intention to portray the Japanese historical experience as a prologue to the present, but those interested in analyzing how the past may have been parent to the present will find in this book antecedents of concerns that are of central importance to modern Japan. \$20.00, illustrated

## The Self-Made Man in Meiji Japanese Thought

From Samurai to Salary Man

**Earl H. Kinmouth**

Kinmouth describes the changes that occurred as the ideal of self-advancement through education and white-collar employment spread from its samurai origins to the general populace. This volume brings a new perspective to the dynamics of modern Japanese history and society. \$22.50, illustrated

## Mandarin Ducks and Butterflies

Popular Fiction in Early Twentieth-Century Chinese Cities

**Perry Link**

"Perry does not simply place popular fiction in the context of literary history, but attempts to elucidate the ideas and attitudes of its readership. This approach of treating such escapist reading as love stories, martial arts tales, and scandal fiction as information about the popular mind at the time when China was going through a period of intense cultural transformation makes for a fascinating book."

## The Revolutionary Origins of Modern Japan

*Thomas M. Huber.* Challenging the popular view of the Meiji Restoration as a “revolution from above,” this book argues that its main cause was neither the growing threat of the West nor traditional loyalty to Emperor and nation, but rather lay in class conflict and long-term institutional change. The author sees the Restoration as a revolution against feudal privilege carried out from below by a service intelligentsia of minor administrators, priests, scholars, and village officials. The book focuses on the politically most effective body of activists, those in the domain of Chōshū, and on their most important leaders of the 1850’s and 1860’s: Yoshida Shoin, Kusaka Genzui, and Takasugi Shinsaku. A final chapter explains various heretofore puzzling aspects of the Meiji period (1868–1912) in terms of its revolutionary origins, and concludes by showing that the Restoration, far from being uniquely Japanese, had many of the characteristics we associate with the great revolutions of England, France, and Russia. \$19.50

## The Anthropology of Taiwanese Society

*Edited by Emily Martin Ahern & Hill Gates.* This volume sums up over twenty years of fieldwork and publication, and contains the fullest and best integrated set of anthropological data we have for any region of China, for any period of history. It deals directly with the difficult question that faces China anthropologists—in what sense is Taiwan a part of China? Should Taiwan be primarily described as a natural end product of a long cultural tradition (a Chinese province), or as a product of external factors (a small, rapidly developing society with the world’s densest population, uniquely situated in the world economy)? For other anthropologists, it contains data and analysis that pertain to a variety of current problems: the relationship between ethnicity and social class, the role of historical factors in anthropological explanation, and the interplay between national and local political and economic systems. \$30.00

## THE LINGUISTIC SHAPING OF THOUGHT

A Study in the Impact of Language  
on Thinking in China and the West

by ALFRED H. BLOOM, *Swarthmore College*

New experimental evidence challenges the assumption that languages have little impact on cognitive life—and emphasizes how thinking patterns based on cultural differences raise cognitive barriers to cross-linguistic communication.

The author's analysis is based on a five-year experimental investigation into distinctive impacts of the English and Chinese languages on the cognitive lives of those who speak them. This study has important implications for anyone who must communicate across a language barrier, as well as for psychologists, sociologists, anthropologists, students and practitioners in linguistics and philosophy.

## INTELLECTUALS AND THE STATE IN MODERN CHINA

A Narrative History

JEROME B. GRIEDER, *Brown University*

The first panoramic survey of intellectuals as they helped shape—and were shaped by—Chinese culture and society from the mid-nineteenth century to the People's Republic. With fresh translations of their writings, they come vividly alive, as do the strands of reformist and radical thought they forcefully articulated.

## THE ENDLESS WAR

Fifty Years of Struggle in Vietnam

JAMES PINCKNEY HARRISON

*Hunter College*

Based largely on first-hand accounts of Vietnamese partisans, this is a comprehensive account of the fight for national independence, from 1925 to the fall of Saigon. Examining in detail the development of ideology, organization, and military strategy, this book includes new material on the Communist leaders of peasants, intellectuals, and "united front" groups.

## THE MODERNIZATION OF CHINA

Edited by GILBERT ROZMAN

*Princeton University*

An interdisciplinary team of scholars join forces in a systematic, comparative analysis of the transformation of Chinese society. Tracing the impact of the pre-modern heritage, the authors examine the changing role of the state in local politics; the military; changes in population and settlement; and international relations.

## SUHARTO'S INDONESIA

*by Hamish McDonald*

The most timely and up-to-date book on Indonesia since the fall of Sukarno. Against the background of Javanese culture, the author describes the rise of Suharto, the nature of his power base, and his final accession to power in 1967. He examines the restructuring of the Indonesian economy under Suharto, the rule of the army in politics, the effects of patronage and corruption, and the rise and fall of Pertamina—the state oil corporation. The book also includes a penetrating analysis and description of the Indonesian takeover of East Timor, as well as a look at the fate of Indonesia's political prisoners—including first-hand interviews by the author.

## THE GENETIC RELATIONSHIP OF THE AINU LANGUAGE

*by James Patrie*

The author suggests that Ainu and the Altaic languages share a common genetic origin. The evidence for the relationship of Ainu, Japanese, and Korean is particularly strong, and he concludes that these languages are descended from a Proto-Korean-Japanese-Ainu.
