

Excavations on the Franciscan Frontier: Archaeology at the Fig Springs Mission

Brent Richards Weisman

"Offers new perspectives on a little-known aspect of seventeenth-century La Florida, the western Timucuan-Franciscan mission frontier. Weisman's book illuminates both mission organization and the material culture of American Indians and Spaniards of interior northern Florida during this period."—Kathleen A. Deagan, Florida Museum of Natural History
272 pp. Cloth \$29.95

Missions to the Calusa

Edited and translated by John H. Hann
Introduction by William H. Marquardt

"Finally, a comprehensive set of translations now exists for the enigmatic Calusa. Hann and Marquardt have assembled an exhaustive set of documents which locates the Calusa in their rightful place of importance in North American ethnography."

Homol'ovi II: Archaeology of an Ancestral Hopi Village, Arizona

E. Charles Adams & Kelley Ann Hays, eds. / The Anthropological Papers, No. 55

This report summarizes the findings of the excavations by the Arizona State Museum at Homol'ovi II, a fourteenth-century Hopi pueblo with over 700 rooms. The excavated deposits date between A.D. 1340 and 1400, and nearly all the decorated ceramics were imported from villages on the Hopi Mesas. Also revealed are that cotton was a principal crop in regional exchange, that chipped stone was a totally expedient technology, and that the katsina cult was present or developing. 139 pp., \$15.95 paper.

Reading the Isotopic Clocks.

Your research in age determination and stable isotopes requires reliable data and custom service. Teledyne Isotopes has the expertise and experience to meet these requirements.

We have been pioneers in the industry since 1955 and are the only commercial laboratory that offers all major age determination techniques.

We can assure you of reliable data because of well-staffed and well-equipped labs, intercalibration with major universities and government facilities, and through use of N.B.S. and international standards.

For the most reliable reading of the isotopic clocks, come to the experts.

Archaeological Typology and Practical Reality

A Dialectical Approach to Artifact Classification and Sorting

William Y. Adams and Ernest W. Adams

Classifications are central to archaeology. Yet the theoretical literature on the subject, both in archaeology and the philosophy of science, bears very little relationship to what actually occurs in practice. This problem has long interested William Adams, a field archaeologist, and Ernest Adams, a philosopher of science, who describe their book as an ethnography of archaeological classification. It is a study of the various ways in which field archaeologists set about making and using classifications to meet a variety of practical needs.

Pitt Rivers

The Life and Archaeological Work of Lieutenant-General Augustus Henry Lane Fox Pitt Rivers, DCL, FRS, FSA

Mark Bowden

General Pitt Rivers (1827–1900), a flamboyant polymath, was known as the father of scientific archaeology. He was influential in four fields during his lifetime: military training, anthropology, archaeology, and public education. Yet very little is known about his character and career. This entertaining and thoroughly researched study describes the General's stormy family relationships, his career in the army, his activities in public education, his contributions to anthropology, and his impact on the development of British archaeology.

Domestic Ceramic Production and Spatial Organization

A Mexican Case Study in Ethnoarchaeology

Philip J. Arnold III

This ethnoarchaeological study looks at contemporary household-scale ceramic production in several Mexican communities. Many archaeologists have investigated ceramic production in the archaeological record, but their identifying criteria are often vague and impressionistic. Philip Arnold pinpoints some of the weaknesses of their interpretations and uses ethnographic research to suggest how archaeologists might consistently recognize ceramic manufacturing.

Chiefdoms: Power, Economy and Ideology

Timothy Earle, Editor

This study of chiefdoms has moved from a pre-occupation with their formal characteristics to a concern with their dynamics as political institutions. The ten case studies look at particular chiefdoms, originating in specific historical conditions. Despite obvious differences between the chiefdoms, certain common underlying processes are revealed.

Rethinking the Neolithic

Julian Thomas

This highly original book provides a stimulating, and at times provocative, view of the Neolithic in southern England. Using what is sometimes described as "post-processual" archaeology, the author questions old interpretations of the period, and his is a radical departure from previous works about the Neolithic.

WILLIAM HENRY HOLMES AND THE ORIGINS OF AMERICAN ARCHAEOLOGY

Edited by David J. Meltzer and Robert C. Dunnell

This book restores to print four of William Henry Holmes' (1846–1933) most influential works, each concerned with artifacts and their role in addressing broad questions of archaeology. Holmes pioneered methods, for stone tool study and ceramic analysis in particular, that formed the foundations of a new, more scientifically based archaeology.

Recent Archaeological Research

A Marxist Archaeology

Randall H. McGuire

This book is an introduction to marxist theory as it applies to archaeology. It explores long-term historical change and cultural evolution, and advocates a dialectical and historical approach to the study of the past.

CONTENTS: Introduction. A Brief History of Marxism. Archaeology and Marxism. The Dialectic: Marxism as a Theory of Internal Relations. The Making of History. History and Evolution. Death and Society in a Hohokam Community. Critical Archaeology: Archaeology and the Vanishing American. The Praxis of Archaeology. List of Tables. List of Figures. Index.

Deciphering a Shell Midden

edited by
Julie E. Stein

This book presents the latest research on shell middens: sites that contain shell and are located near coastal and fluvial settings around the world. The shell imparts certain characteristics to such sites: complex discontinuous strata, low densities of artifacts, large volumes of deposits, alkaline chemistry, and proximity to fluctuating sea level. The shell midden is often a product of both cultural and non-cultural events. These non-cultural events affect cultural interpretations. The book provides a detailed history of shell midden research and a description of procedures and analyses using an example of a Northwest Coast shell midden, including:

- Excavation strategy
- Use of microartifacts
- Classification of fire-cracked rock
- Detection of burned bone
- Use of grain-size analysis on shell
- Stratigraphic and sedimentological analysis

Prehistoric Hunters of the High Plains

SECONDEDITION

edited by

George C. Frison

with Contributions by

Bruce A. Bradley, Julie E. Francis,
George W. Gill, and James C. Miller

A Volume in the NEW WORLD
ARCHAEOLOGICAL RECORD Series

From the Reviews of the First Edition:

"Frison has gathered together in this volume a well-organized, clearly written, and beautifully illustrated set of insights into the subsistence systems of the aboriginal inhabitants.... Any Plains archaeologist must have this book, and any professional person interested in the history of man the hunter will find it fascinating reading."

—SCIENCE

Key Features

- Examines the prehistoric cultural chronology and the sources of data for the Northwestern High Plains
- Presents prehistoric hunting and gathering subsistence strategies for the Northwestern High Plains
- Takes an interdisciplinary approach to the study of archaeology using data from geology, soils, faunal analysis, pollen, and phytolith studies
- Provides a methodology for data recovery

November 1991, 532 pp., \$59.95
ISBN: 0-12-268561-X

Moundbuilders of the Amazon

Geophysical Archaeology on Marajo Island, Brazil
Anna Curtenius Roosevelt

"This book will change our perception of Amazonian prehistory: it subjects previous scholarship to a clear and unflattering scrutiny, describes how a multidisciplinary approach yields a strikingly different set of data and interpretations, and offers a prescription for future research in the region."

—JOURNAL OF ARCHAEOLOGICAL SCIENCE

1991, 495 pp., \$89.95

Prehistory of the Oregon Coast

The Effects of Excavation Strategies and Assemblage Size on Archaeological Inquiry

R. Lee Lyman

with Contributions by

Ann C. Bennett, Virginia M. Betz,
and Linda A. Clark

This book analyzes the artifacts and mammalian faunal remains of three representative sites on the southern northwest coast (north of California). A model of the evolution of cultural adaptational strategies is presented and tested. The overriding effects of sample size are considered in detail.

Indians of the Southeastern United States in the Late 20th Century

Edited by J. Anthony Paredes

Paredes and his colleagues survey American Indian communities still surviving in the southeastern United States some 450 years after first contact with Europeans. Despite concerted government efforts in the 19th and 20th centuries to remove them, dozens of communities that can be described as "American Indians" survive. 288pp. 1992 \$21.95, paper

Life and Death in the Ancient City of Teotihuacan

A Modern Paleodemographic Synthesis

Rebecca Storey

Cities arose independently in both the Old World and in the pre-Columbian New World. Storey's research shows clearly that although Teotihuacan was a very different environment and culture from 17th-century London, these two great cities are comparable in terms of health problems and similar death rates.

368pp. 1992 \$29.95, paper

Osceola's Legacy

Patricia R. Wickman

The well-known Seminole chief, Osceola—who was, in reality neither a Seminole nor a chief—is one of the best known and least understood figures in the history of the Southeast. Wickman explodes the myth of Osceola and introduces the man. 288pp. 1991 \$19.95, paper

What Mean These Bones?

Studies in Southeastern Bioarchaeology

*Edited by Mary Lucas Powell, Patricia S. Bridges,
and Ann Marie Wagner Mires*

This volume addresses questions of human adaptation in a variety of cultural contexts, with a breadth not found in studies utilizing solely biological or artifactual data. 248pp. 1991 \$19.95, paper

Lamar Archaeology

Mississippian Chiefdoms in the Deep South

Edited by Mark Williams and Gary Shapiro

Lamar Archaeology provides a comprehensive and detailed review of our knowledge of the late prehistoric Indian societies in the Southern Appalachian area and its peripheries. 272pp. 1990 \$20.95, paper

58th ANNUAL MEETING
SOCIETY FOR AMERICAN ARCHAEOLOGY

Adam's Mark Hotel
St. Louis, Missouri
Wednesday, April 14–Sunday, April 18, 1993

Program Committee Chair: Jay F. Custer
Department of Anthropology
University of Delaware
Newark, DE 19716

GUIDELINES FOR CONTRIBUTIONS

The privilege of participating in the annual meeting as a presenter, organizer, chair, or discussant is restricted to paid-up members. However, representatives of other disciplines who are not North American residents may request a waiver of the membership requirement. Please note that all requests for space for allied meetings should be made in writing and sent to the SAA office by no later than *October 1, 1992*.

Society policy states that a person may not be the first author of more than one paper, although that person may, at the same meeting, chair a session, serve as junior author of a paper presented by someone else, or serve as a discussant. However, no paper may have more than three authors listed, and no individual may have more than three roles (author, organizer, chair, or discussant) in the meeting.

Complete symposia proposals (with abstracts of papers), abstracts of contributed papers, abstracts of research reports, and abstracts for poster sessions must reach the SAA Office no later than *September 28, 1992*. All proposals and abstracts must be submitted on appropriate SAA forms, which are mailed to all SAA members with the ballot. Please submit all materials in English.

In the case of coauthorship of papers, *only the senior author* should submit a Participant Information Form, containing the information on all of the associated authors. The Participant Information Form is in two parts: Page one (Submission Information) and page two (Short Abstract Information). Copies of the Participant Information Form must be submitted by all participants, including symposia organizers, chairs, and discussants, as well as all senior authors of symposia papers, contributed papers, research reports, and posters.

Because it is no longer possible to accommodate all individuals wishing to make oral presentations at the annual meeting, the program committee will evaluate each submission for professionalism, timeliness of receipt, substance of contribution, and redundancy with other submissions. Poster sessions are especially encouraged and are particularly effective for presentations involving mapping, remote sensing, and various quantitative methods. The program committee may request that individual papers or entire symposia be converted to poster format. Symposia organizers and first authors of presentations not in symposia will be notified of the program committee's decision to accept or decline the submission by January 15, 1993. Abstracts of all papers, research reports, and posters accepted for presentation will be published in a separate *Abstracts* volume.

SYMPOSIA—A symposium consists of a group of papers on a common theme. Symposia are limited to four (4) hours or less. The symposium topic and the individual papers within it will be reviewed. Changes, such as consolidation of two symposia or changes in the individual papers, may be recommended. Symposia organizers should contact the *program chair* no later than *September 1, 1992*, in order that the Guidelines for Symposium Organizers and a special symposium form can be sent to them. Complete symposia proposals must be submitted *as a package to the SAA Office* by the symposium organizer(s) and must be received by *September 28, 1992*.

The package must include three (3) copies of the Symposium Proposal Form and one (1) copy of the Participant Information Form for each senior author, discussant, chair, and organizer (whether or not the organizer is chairing the symposium). The package also must include the registration form and fee.

CONTRIBUTED PAPERS (20 minutes)—Contributed papers are distinguished from Research Reports in that they generalize, synthesize, or compare and are addressed to problems of theory, method, culture history, or culture process. Contributed papers must follow the same format as the symposia papers, and each proposed presentation must include one (1) copy of the Submission Information Form and three (3) copies of the Short Abstract Form. Registration form and fee must be included.

RESEARCH REPORTS (10 minutes)—A research report is a presentation that describes the results of a recent field or laboratory research project. Each proposed presentation must include one (1) copy of the Submission Information Form and three (3) copies of the Short Abstract Form. Registration form and fee must be included.

POSTER SESSIONS—The poster session is particularly appropriate for research results that can be described graphically. Poster sessions will be listed in the program and will be displayed in prominent locations. Each proposed presentation must include one (1) copy of the Submission Information Form and three (3) copies of the Short Abstract Form. Registration form and fee must be included.

REGISTRATION FEES—All presenters, chairs, and discussants are required to pay the established registration fee for the annual meeting; registration form and fee must accompany all proposals. Meeting-registration fees will be refunded upon written request for any paper that is declined.

ABSTRACTS will be published as a separate volume and will not be included in the registration fee. Participants who wish to receive a copy of the *Abstracts* when they pick up their badge at the meeting should order and prepay for it on their registration form.
