

The AERONAUTICAL Journal

L. Bernstein and S. Hamid

On the effect of a strake-like junction fillet on the lift and drag of a wing 39

F. Motallebi

Reynolds number effects on the prediction of mean flow data for adiabatic 2-D compressible boundary layers 53

J. Wolf

A method for determining the wing lift-to-drag ratio of a propelled hang-glider 60

C. Coulliette and A. Plotkin

Aerofoil ground effect revisited 65

W.C. Hassenpflug

An analytical formula for the Lagrange time in two-dimensional potential flow 75

EXCEPT JUNE AND AUGUST**

Aims and scope

The aims and scope of *The Aeronautical Journal* are intended to reflect the objectives of the Society as expressed in its Charter of Incorporation. Briefly these are to encourage and foster the advancement of all aspects of aeronautical and space science. Thus the topics of the *Journal* include all those which are covered by the various Sections and Groups of the Society such as fluid mechanics and aerodynamics, propulsion, structures and materials, rotorcraft, astronautics and guided flight, dynamics and control, aeromarine technology, aviation medicine, air transport, airworthiness and maintenance, test flying, flight simulation, air law, management studies, history of aviation and manpowered aircraft. Thus papers are solicited on all aspects of research, design and development, construction and operation of aircraft and space vehicles. Papers are also welcomed which review, comprehensively, the results of recent research developments in any of the above topics. For further information on the submission of papers, see Guidelines for Authors, p 79.

Editorial Advisory Board

Chairman: Dr E.W.E. Rogers

Aerodynamics

Professor P.W. Bearman, *Department of Aeronautics, Imperial College*

Aerospace medicine

Air Vice Marshal P. Howard, *formerly RAF Institute of Aviation Medicine*

Air traffic control and simulation

G.C. Howell, *former Civil Aviation Authority chief scientist*

Airworthiness

R. Ashford, *formerly Civil Aviation Authority and the European Joint Aviation Authorities*

Avionics and systems

Professor D. McLean, *Department of Aeronautics & Astronautics, University of Southampton*

P.A. Hearne, *formerly GEC-Marconi Avionics*

Computational fluid mechanics and propulsion

Professor P. Stow, *Rolls-Royce*

Flight testing, flight operations and air transport

Captain W.D. Lowe, *British Airways*

Maintenance and airworthiness

G.B. Ratcliffe, *RAeS Airworthiness and Maintenance Committee*

Noise, aeroelasticity and fluid mechanics

Professor E.G. Broadbent, *Department of Mathematics, Imperial College*

Rotorcraft and structural dynamics

Professor D.E.H. Balmford, *formerly of Westland Helicopters*

Space technology

R. Gibson, *Inmarsat*

Structures and materials

T. Sharples, *Military Aircraft Division, BAe Defence*
