## CONTENTS

### PART 1 (JANUARY 1979)

<b>J. Riley and K. Ryder:</b> Forms for Recording Details and Results of Field Experiments	1
<b>G. Watts Padwick:</b> Growth Phases in Plants and Their Bearing on Agronomy	15
<b>E. R. Rhodes and D. Nangju:</b> Effects of Pelleting Cowpea and Soyabean Seed with Fertilizer Dusts	27
<b>E. F. I. Baker:</b> Mixed Cropping in Northern Nigeria. II. Cereals and Cotton	33
<b>E. F. I. Baker:</b> Mixed Cropping in Northern Nigeria. III. Mixtures of Cereals	41
<b>N. M. Fisher:</b> Studies in Mixed Cropping. III. Further Results with Maize-Bean Mixtures.	49
<b>M. O. H. El Karouri:</b> Effects of Soil Salinity on Broad Bean ( <i>Vicia faba</i> ) in the Sudan	59
<b>A. N. Asthana, S. D. Dube, P. N. Tiwari, P. N. Gambhir and T. S. Rajan:</b> Variability Studies and Breeding for Increased Oil Content in Rapeseed and Mustard	65
<b>R. C. Hawkins and P. J. M. Cooper:</b> Effects of Seed Size on Growth and Yield of Maize in the Kenya Highlands	73
<b>A. Ashri and D. Palevitch:</b> Seed Dormancy in Sesame ( <i>S. indicum</i> ) and the Effect of Gibberellic Acid	81
<b>G. O. I. Abalu and C. Harkness:</b> Traditional versus Improved Groundnut Practices: An Economic Analysis of Production in Northern Nigeria	85
<b>A. Narayanan and A. R. Sheldrake:</b> Pigeonpea ( <i>Cajanus cajan</i> ) as a Winter Crop in Peninsular India	91
<b>A. K. Bisaria, Ranjana Narang, G. R. Rastogi and V. K. Bhatnagar:</b> Effects of Morphactin (Chlorflurenol) on Sex Expression, Yield and Carbohydrates in Corn ( <i>Zea mays</i> )	97
<b>S. Kathju, K. A. Shankarnarayan, A. N. Lahiri and S. P. Vyas:</b> Effects of Fertilizer and Clipping on Protein in Leaves of Desert Grasses	103
<b>Hassan Suliman Ibrahim:</b> Effects of N Fertilizers on Sugarcane in the Sudan	107

### PART 2 (APRIL 1979)

<b>R. L. Villareal, S. K. Lin, L. S. Chang and S. H. Lai:</b> Use of Sweet Potato ( <i>Ipomoea batatas</i> ) Leaf Tips as Vegetables. I. Evaluation of Morphological Traits	113
<b>R. L. Villareal, S. C. S. Tsou, S. K. Lin and S. C. Chiu:</b> Use of Sweet Potato ( <i>Ipomoea batatas</i> ) Leaf Tips as Vegetables. II. Evaluation of Yield and Nutritive Quality	117

<b>R. L. Villareal, S. C. Tsou, S. C. Chiu and S. H. Lai:</b> Use of Sweet Potato ( <i>Ipomoea batatas</i> ) Leaf Tips as Vegetables. III. Organoleptic Evaluation	123
<b>S. S. Prihar, Ranjodh Singh, Nathu Singh and K. S. Sandhu:</b> Effects of Mulching Previous Crops or Fallow on Dryland Maize and Wheat	129
<b>R. H. Booth and M. N. Dhiauddin:</b> Storage of Fresh Cassava ( <i>Manihot esculenta</i> ). III. Preserving Chipped Roots Before and During Sun-drying	135
<b>Bruce L. Parker and Robert H. Booth:</b> Storage of Cassava Chips ( <i>Manihot esculenta</i> ). Insect Infestation and Damage	145
<b>J. B. Abington and T. W. Tanton:</b> Effects of Variety, Fertilizer and Environment on Fire-cured Tobacco in Malawi	153
<b>P. J. Gregory and G. R. Squire:</b> Irrigation Effects on Roots and Shoots of Pearl Millett ( <i>Pennisetum typhoides</i> )	161
<b>Gajendra Giri and Rajat De:</b> Effect of Preceding Grain Legumes on Dryland Pearl Millett in NW India	169
<b>T. J. Johnson:</b> Effects of Potassium on Buoyancy of Banana Fruit	173
<b>H. R. Feijen:</b> Economic Importance of Rice Stem-borer ( <i>Diopsis macrophthalma</i> ) in Malawi	177
<b>T. W. Tanton:</b> Some Factors Limiting Yields of Tea ( <i>Camellia sinensis</i> )	187
<b>H. L. Foster:</b> Yields and Responses to Lime and Potassium Fertilizer in Different Cropping Years in Uganda	193
<b>Book Reviews</b>	203

### PART 3 (JULY 1979)

<b>G. Lockwood:</b> Improving Precision of Cocoa Progeny Trials Using Calibrator Trees	209
<b>P. J. Gregory:</b> Uptake of N, P and K by Irrigated and Unirrigated Pearl Millett ( <i>Pennisetum typhoides</i> )	217
<b>K. J. Martin and G. Lockwood:</b> Edge Effects and Interactions with Environment in Cocoa	225
<b>L. Pinter and L. Kalman:</b> Effects of Defoliation on Lodging and Yield of Maize Hybrids	241
<b>I. Haque:</b> Timing the Application of N to Maize in Sierra Leone	247
<b>S. K. Hahn:</b> Effects of Viruses (SPVD) on Growth and Yield of Sweet Potato	253
<b>L. Singh and V. Balasubramanian:</b> Effects of Continuous Fertilizer Use on a Ferruginous Soil (Haplustalf) In Nigeria	257
<b>Y. Okon, M. Volfovitch, Y. Henis and M. J. Pinthus:</b> Inoculation of Soyabeans ( <i>Glycine max</i> ) in Israel with <i>Rhizobium japonicum</i>	267
<b>E. A. Kueneman and D. H. Wallace:</b> Simplified Growth Analysis of Non-climbing Dry Beans at Three Spacings in the Tropics	273

<b>B. O. Adelana and J. B. Oyedokun:</b> Variety X Environment Interactions in Western Nigeria Tomatoes	285
<b>D. Nangju, K. F. Nwanze and S. R. Singh:</b> Planting Date, Insect Damage and Yield of Cowpea in Western Nigeria	289
<b>O. I. Joarder, N. K. Paul and S. K. Ghose:</b> Effects of Irrigation and Fertilizer on Mustard ( <i>Brassica juncea</i> )	299
<b>Book Reviews</b>	303

PART 4 (OCTOBER 1979)

Note on Editorial Policy	305
<b>J. P. Hudson:</b> Preparing Papers for Scientific Journals	307
<b>C. S. Kamara and Godfrey-Sam-Aggrey:</b> Time of Planting, Rainfall and Soil Moisture Effects on Cowpea in Sierra Leone	315
<b>G. R. Squire:</b> Weather, Physiology and Seasonality of Tea ( <i>Camellia sinensis</i> ) Yields in Malawi	321
<b>W. H. Lim and P. H. Lowings:</b> Effects of Ethephon on Anthesis and 'Fruit Collapse' Disease in Pineapple	331
<b>F. Beavington and J. A. Varley:</b> Zinc in Flooded Rice on Clay Soils in Lake Chad Basin, Nigeria	335
<b>J. Y. Yayock:</b> Effects of Variety and Spacing on Growth, Development and Dry Matter Distribution in Groundnut ( <i>Arachis hypogaea</i> L.) at Two Locations in Nigeria	339
<b>T. W. Tanton and J. B. Abington:</b> Factors Affecting Yields of Dark Fire-cured Tobacco in Malawi	353
<b>E. O. Lucas, D. O. Ataga and G. O. Thomas:</b> Partitioning of Dry Matter and Nutrients in Oil Palm Seedlings Grown in Polybags	361
<b>W. L. Chang and S. C. Yang:</b> Response of Rice Varieties to Seasons in Taiwan	369
<b>M. V. K. Sivakumar and S. M. Virmani:</b> Measuring Leaf-water Potential in Chickpea with a Pressure Chamber	377
<b>D. Nangju:</b> Seed Characters and Germination in Soyabean	385
<b>H. J. Williams:</b> Estimation of Hydrogen Cyanide Released from Cassava by Organic Solvents	393
<b>C. K. Ong and A. Everard:</b> Short Day Induction of Flowering in Pearl Millet ( <i>Pennisetum typhoides</i> ) and its Effect on Plant Morphology	401
<b>P. N. Gambhir, A. Narain and P. N. Tiwari:</b> Effects of Maturity on Oil Yield of <i>Brassica juncea</i>	411
<b>Book Reviews</b>	415
<b>Index</b>	417

# AGRITROP

## **New journal in English**

Agricultural research  
Agricultural production

Crops. Animal husbandry. Forestry. Fish culture. Technology

## **FROM AGRICULTURAL LITERATURE IN FRENCH**

Generalities. Water. Air. Soil  
Agricultural engineering  
General botany  
General zoology  
Genetics. Breeding  
Ecology. Biology  
Biochemistry. Nutrition  
Cultural techniques  
Timber harvesting  
Animal husbandry

Grazing  
Plant pathology  
Animal pathology  
Insect pests  
Weeds  
Products storage  
Tropical timber  
Technology and Chemistry  
Commercial development of products  
Economics

**THE ROCKEFELLER FOUNDATION ANNOUNCES  
TWO INTERNATIONAL PROGRAMS  
at the  
BELLAGIO STUDY AND CONFERENCE CENTER  
Bellagio (Como), Italy**

**International Conferences**—small conferences or working groups focusing on topics or problems of international significance.

**Scholars in Residence**—an opportunity for scholars to work for approximately four weeks on individual projects.

The Foundation provides the facilities of the Center, located about 40 miles north of Milan, on a competitive basis to residents and conference organizers. It normally does not pay for related costs, such as transportation, of the participants in these two programs.

For more information, write:

# TROPICAL AGRICULTURE

THE JOURNAL OF THE FACULTY OF AGRICULTURE  
(IMPERIAL COLLEGE OF TROPICAL AGRICULTURE)  
UNIVERSITY OF THE WEST INDIES

Volume 56

Number 3

July 1979

Attempts to transmit lethal yellowing disease of coconuts in Jamaica by leafhoppers (Homoptera: Cicadelloidea)

*S. J. Eden-Green*

The potassium status of some representative soils from the Cook Islands

*R. Lee, L. C. Blakemore and J. P. Widdowson*

Effect of forms and levels of nitrogen on the growth and root starch reserves of young tea plants (*Camellia sinensis* L.) grown in sand culture

*S. Krishnapillai and U. Pethiyagoda*

Effect of fluorine content of irrigation water on the growth of four plant species in relation to soil salinity

*M. Maftoun and B. Sheibany*

Manganese and zinc deficiencies in sugar-cane grown in Entisols near Santa Cruz, Bolivia

*T. T. Cochrane*

Characterization of molybdenum deficiency in sugar-cane

*J. E. Bowen*

Seed dormancy in *Panicum maximum* Jacq.

*R. L. Smith*

A note on cowpea (*Vigna unguiculata*) nutrient composition and its relationship to yield

*E. R. Rhodes, B. Evenhuis and W. E. Taylor*

Influence of trypsin inhibitor level and processing on the nutritional value of groundnuts for finishing pigs

*T. F. Balogun and B. A. Koch*

Growth, economics and carcass characteristics of growing/finishing pigs fed cocoa husk diets

*S. A. Adeyanju and J. O. Ilori*

Effect of air movement and type of slotted floor on sprinkled pigs

*S. R. Morrison, H. Heitman, Jr. and R. L. Givens*

Note on early growth rates of lambs of some tropical breeds

*R. K. Rastogi, F. G. Youssef, M. J. Keens-Dumas and D. Davis*

Rapid field-multiplication of cassava

*D. W. Wholey and J. H. Cock*

Propagation of winged bean (*Psophocarpus tetragonolobus* (L.) D.C.) by stem cuttings

*C. W. Lawhead, J. P. Bennett and M. Yamaguchi*

Energy use for the production of rice, beans, maize and soya beans in São Paulo, Brazil

*M. A. Rao, W. L. Do Canto, A. A. Vitali and M. Okada*

Annual subscription: £30 (U.K. and overseas)

Published on behalf of the Faculty by

IPC Science and Technology Press Limited

PO Box 63, Westbury House, Bury Street, Guildford, Surrey GU2 5BH, England

**Title.** The development of automatic bibliographic methods, based on indexing the significant words in the title, make it essential that the title of each paper should contain the maximum of useful information. It is particularly important, for example, that the title should contain references, where relevant, to the crop, the character of the investigation, the factors under review, and the climatic or geographic area in which the work was done.

**Headings.** The following details should be given at the head of the first sheet: the full title of the paper; a short title for running headlines, not exceeding 48 characters, counting each letter and space as one character; the name(s) of the author(s); the address at which the work was carried out; the present address(es) of author(s), if different from the previous item; and the address(es) to which proofs should be sent (see under 'Proofs' below).

**Summary.** A short but accurate and informative summary must be included, *not longer than ten lines of typescript*. The preparation of the summary, which requires much care, is not an Editorial responsibility.

**Experimentation.** This journal specialises in the presentation of data based on up-to-date methods of field experimentation. It is therefore important, where appropriate, that papers should include: an adequate account of experimental lay-outs; a description of treatments and general management; and assessments of experimental variability (e.g. coefficient of variation) and of the statistical significance of the results, specifying the methods used for the analysis (but without showing any details of the calculations). Papers can rarely be accepted if the work was carried out in containers, and/or under glasshouse conditions, unless it forms part of an investigation on field problems. The journal does not normally publish accounts of straightforward trials of pesticides, herbicides or varieties, since such papers are usually of local interest only.

**Plates.** Illustrations are welcome if they contribute to an understanding of the paper, but will only be accepted if of high quality. Photographs should be provided as unmounted glossy black-and-white prints (colour prints, but not colour transparencies, are acceptable for reproduction in black-and-white; they can only be reproduced in colour if a financial subsidy is provided). If lettering is to be inserted on a print, this should be shown on a spare copy or an overlay, and an unmarked print should be provided for marking by the printer.

**Diagrams.** Diagrams, including lettering, should be drawn in Indian ink on white drawing paper. Each illustration should bear the name of the author(s) and the figure number, written clearly in the margin or on the back. *On no account should diagrams be submitted on sheets larger than foolscap size.*

**Legends.** The legends for all illustrations should be given on a separate sheet of paper, clearly marked with the number of each plate or diagram. The ideal position for each diagram should be marked in the text, although it may not be possible to put the illustration exactly in that place. Plates will normally be bound immediately after the end of the paper.

**Dating the work.** Dates should be given for the beginning event of each experiment. *The journal is reluctant to accept papers submitted more than three years after the end of the relevant experimental work.*

**Tables.** Each table should be typed on a separate sheet of paper, and its preferred position indicated on the typescript. Each table should be numbered and bear an appropriate title, along the lines normally used for tables in this publication. Contributors are specially asked to avoid presenting tables that are too large to print across the page, hence the limit of 80 typewriter characters referred to earlier.

**Use of metric units.** All data must be presented in metric units, preferably SI units. Comparable data in local units (e.g. acres, ounces, etc.) may be given in parentheses at the first mention, if authors wish, or factors for converting metric into local units may be given as footnotes. The use of SI units will probably become mandatory at some time in the future.

**References.** The Harvard system of citation is used throughout as follows: name and initial(s) of author(s); year of publication in parentheses, further distinguished by the addition of small letters a, b, c, etc., where there are citations to more than one paper published by the same author(s) in one year; contracted title of periodicals as given in the World List of Scientific Periodicals; volume number in arabic figures; number of the first page of the paper. In the text, references should be denoted by giving the name of the author(s) with the date of publication in parentheses, e.g. Brown (1937) . . . (Brown, 1937), (Brown, 1927a; Jones and Smith, 1942a, b; Smith *et al.*, 1950). In the list of references all authors' names should be given. **Not more than fifteen papers should normally be cited.**

**Referees.** All manuscripts are critically reviewed by expert referees, on whose advice the Editor accepts or rejects contributions, or returns them to authors for reconsideration.

**Proofs.** Two sets of single-sided page proofs will be sent to each author, but it is the responsibility of the senior author to collate the views of his co-author(s) and submit a consolidated set of corrections to the Editor, by returning to him the printer's marked proof (identified by the words 'marked copy') with all required corrections. No further corrected proof will be sent to the author(s), unless this is specially requested. Excessive alterations, other than corrections of printer's errors, may be disallowed or charged to the author.

**Offprints.** Fifty offprints will be sent free of charge to the author. Where there are two or more authors, all fifty offprints will be sent to the senior author, unless the printer is asked to divide them. Additional offprints may be ordered on the form sent out with the proofs (to the senior author only if there is more than one) provided this is returned to the printer within seven days of its receipt by the author.

**Return of manuscript.** Where a submission is not accepted for publication the top copy will be returned; manuscripts on thin (air-mail) paper will usually be sent by air but bulky manuscripts from overseas may be returned by surface mail.

**EXPERIMENTAL AGRICULTURE**
