Intending members of the Mathematical Association are requested to communicate with one of the Secretaries, F. W. Kellaway, 87 Pixmore Way, Letchworth, Herts.; Miss W. Cooke, Yarningale, Pitts Road, Salt Hill, Slough. The subscription to the Association is 21s. per annum, and is due on Jan. 1st. Each member receives a copy of "The Mathematical Gazette" and a copy of each new Report as it is issued.

Change of Address should be notified to the Membership Secretary, Mr. M. A. Porter, Gordon House, 29 Gordon Square, London, W.C. 1. If Copies of the "Gazette" fail for lack of such notification to reach a member, duplicate copies can be supplied only at the published price. If change of address is the result of a change of appointment, the Membership Secretary will be glad to have notice of this.

Subscriptions should be paid to the Hon. Treasurer, Mathematical Association, Gordon House, 29 Gordon Square, London, W.C. 1.

BELL

GEOMETRY FOR SCHOOLS

by A. H. G. PALMER, M.A. and H. E. PARR, M.A.
Twelfth Edition. 7s. Also issued in two parts.

“A great feature is made of easy riders; success in solving them will greatly encourage pupils. The bookwork is clearly set out, and is reduced to a minimum without neglect of essentials. And the examples are classified so that rapid selection can be made. An excellent course.”—*The A.M.A.*

SCHOOL GEOMETRY AND TRIGONOMETRY

by C. V. DURELL, M.A. *Second Edition. Complete, 9s. 6d. Also in parts.*

A unified course of Stage B geometry and trigonometry. “We commend this textbook unreservedly to those teachers who are on the outlook for a course in geometry and trigonometry which combines practical and theoretical elements with the minimum of formalism.”—*Scottish Educational Journal.*

A FIRST COURSE IN STATISTICS

by D. CARADOG JONES, M.A. *Tenth Edition. 17s. 6d. net. Part I, 8s. 6d. net.*

“An excellent ‘first course’ . . . the examples are well chosen . . . the work is clearly expressed.”—*Mathematical Gazette.* “A very compact, clear and sufficiently complete account of the mathematical machinery employed in analysing raw statistical material and in deducing general statements regarding its characteristics.”—*Journal of Education.*

MATHEMATICS QUEEN & SERVANT OF SCIENCE

by E. T. BELL, M.A., Ph.D. 458 pages. *About 21s. net.*

This new book by the well-known author of *Men of Mathematics*, will be widely welcomed for the school library and for sixth form reading, as well as for the teacher's own personal library. It is a survey of mathematics from Euclid to the most recent developments in mathematical physics, not a history but a stimulating presentation of the ideas of mathematics.
