# FIGHT IV INFECTION\*

SEPP® from Marion Scientific  
makes it easy to apply PVP iodine prior to IV infusion.

## Easy to use.

Just squeeze to break ampule, remove SEPP from sterile wrapper, and you're ready to prep. Pre-measured, single-use amounts of solution save time, eliminate spillage and waste.

\*10% PVP iodine is an effective bactericidal, fungicidal and sporocidal agent.

Maki, Dennis G., MD: Preventing infection in intravenous therapy. **Anesthesia and Analgesia** ... **Current Researches**, Vol. 56, No. 1, Jan. Feb. 77.

© 1979 Marion Scientific Corp.

## Easy to control.

SEPP puts you in control of antiseptic placement and flow. Patented polyester tip applies solution evenly, absorbs excess and prevents dripping. Pinpoints antiseptic **only** where you want it, minimizing the danger of hiding vein with excess iodine.

## No mess.

Pinpoint precision eliminates excess antiseptic, dripping, and uneven application. Fingers never touch applicator tip, solution, or prepping area. Clean. Efficient. Easy-to-use and dispose of.

Send or call for a free  
SEPP® sample and see how  
easy prepping can be.
